Subject : Re: Audio subpoena idea - Lets add security cameras to the mix

Attachment : IMG_0377.pdf; ATT00002.bin;

I did a general inquiry this morning asking what entity is responsible for the security cameras hanging from the ceilings in the courtrooms.

I was bounced around from the general line to the clerks office to the sheriffs office and finally to the court administrators.

The reply I got was disturbing.

I was told that there are no cameras inside the courtrooms period, and when I replied, anyone who walks in there can see the cameras hanging from the ceiling, I just need to know what entity is responsible for the data it collects so we can either subpoena it or have a judge put it in a court order, I was told, even if there are cameras they cannot be FOIA requested, subpoenaed or ordered released by a judge and was told good luck and the conversation ended.

I have attached a PDF of a photo I took off the web with a red circle drawn around the camera hanging from the ceiling.

Admittedly its a poor out of focus picture but I took the first one I found with the camera in the picture. I'm sure I can find a very high resolution picture if I need to.

I think I remember 3 or 4 cameras, maybe more in judge Meyers court room.

Paul
