I am trying to summarize your case in 2 or 3 simple sentences that anyone can understand.

I think you should try the same thing. You should be able to describe what Mast and Popovich did to you in just a few sentences in a way that anyone can understand and relate to.

My opinion is that best way to summarize your case is as written in the attached text.

New version includes how each simple description is described in legal terms. Also includes how each party is personally responsible to what happened to you in clear, simple terms and in legal terms.

Newest version. Same ideas as before, much more developed. Attached.

Also I include another text file called "Cascading effects". This text looks at the possible cascading effects of all 10 depositions taken in the underlying case being shown to be crafted deposition look-alikes. I also look at the possible cascading effects from Mast exhibit 12 being shown to be a forgery.

I didn't know there was this difference.  
I believe we are dealing with both types of fraud  
Look the following line up on google  
intrinsic fraud vs extrinsic fraud
