3. On June 28, 2011, the Defendant, DAVID GAGNON, was living and/or staying at his parent's home at 1016 W. Elder Avenue, in the City of McHenry, County of McHenry, Illinois.

4. On June 28, 2011, the Defendants, CAROLINE McGUIRE and BILL McGUIRE contracted, hired the Defendant, DAVID GAGNON, to cut down, trim and/or maintain the trees and brush at their premises at 1016 W. Elder Avenue, in the City of McHenry, County of McHenry, Illinois.

5. On June 28, 2011, and at the request and with the authority and permission of the Defendants CAROLINE McGUIRE and BILL McGUIRE, and for their benefit, the Defendant, DAVID GAGNON, was working under their supervision and control while engaged in cutting, trimming and maintaining trees and brush at the premises at 1016 W. Elder Avenue, in the City of McHenry, County of McHenry, Illinois.

6. On June 28, 2011, as part of his work at the subject property, the Defendant, DAVID GAGNON, was authorized, instructed, advised and permitted to use a chainsaw to assist him in his work for Defendants, CAROLINE McGUIRE and BILL McGUIRE, which was owned by the McGuires.

7. On June 28, 2011, the Defendant, DAVID GAGNON, was under the supervision and control of Defendants, CAROLINE McGUIRE and BILL McGUIRE, and was working as their apparent and actual agent, and was then acting and working in the scope of his agency for Defendants, CAROLINE McGUIRE and BILL McGUIRE.

8. On June 28, 2011, and while the Defendant, DAVID GAGNON, was working in the course and scope of his agency for Defendants, CAROLINE McGUIRE and BILL McGUIRE, and was under their supervision and control, Defendant, DAVID GAGNON was in use of a chainsaw while trimming a tree and branch.

9. On June 28, 2011, and while Defendant, DAVID GAGNON, was in use of a chainsaw while trimming a tree and branch, Defendant, DAVID GAGNON, asked for and/or requested the assistance of the Plaintiff, PAUL DULBERG, to hold the tree branch while Defendant, DAVID GAGNON, trimmed the branch with the chainsaw.

WHEREFORE, Plaintiff, PAUL DULBERG, demands judgment against Defendants, DAVID GAGNON, and CAROLINE McGUIRE and BILL McGUIRE in an amount in excess of $50,000.00, plus costs of this action.

MOTION FOR GOOD FAITH FINDING AND FOR ORDER OF DISMISSAL WITH PREJUDICE BY DEFENDANTS BILL McGUIRE AND CAROLYN McGUIRE

Defendants, BILL McGUIRE (aka William McGuire) and CAROLYN McGUIRE (improperly named Caroline), by and through their attorneys, Cicero, France, Barch & Alexander, P.C., hereby move this Court to dismiss all claims against them with prejudice and further request this Court to find that the settlement set forth in this motion was made in good faith and within the meaning and contemplation of the Illinois Contribution Among Joint Tortfeasors Act, 740 ILCS 100/1, et seq. In support of their Motion, Defendants Bill McGuire and Carolyn McGuire state as follows:

1. On or about March 15, 2012, Plaintiff Paul Dulberg filed a multiple count complaint seeking damages for personal injuries he generally attributes to a chain saw incident that occurred on or about June 28, 2011, at and upon the premises owned by Defendants Bill McGuire and Carolyn McGuire, known commonly as 1016 West Elder Avenue, City of McHenry, County of McHenry, State of Illinois.

2. Plaintiff generally alleges that Defendant David Gagnon injured him with a chain

saw while working under the supervision and control of Defendants Bill McGuire and Carolyn McGuire. Defendant David Gagnon denies any and all liability for Plaintiff Paul Dulberg's injuries. Defendants Bill McGuire and Carolyn McGuire also deny any and all liability for Plaintiff Paul Dulberg's injuries and further deny that Defendant David Gagnon was under their control and supervision and working or acting as their employee or agent at the time of the alleged chain saw incident.

3. On February 1, 2013, Defendants Bill McGuire and Carolyn McGuire filed a cross-claim for contribution against Defendant David Gagnon. The cross-claim for contribution seeks contribution from Defendant David Gagnon for injuries claimed by Plaintiff Paul Dulberg and is based upon the terms and provisions of the Illinois Contribution Among Joint Tortfeasors Act, 740 ILCS 100/1, et seq.

4. Plaintiff Paul Dulberg and Defendants Bill McGuire and Carolyn McGuire have negotiated a settlement of all claims which Plaintiff brought or could have brought against Defendants Bill McGuire and Carolyn McGuire. The settlement was negotiated at arm's length over a substantial period of time, and with the advice of counsel on the part of both parties. There is no collusion or fraud on the part of any of the parties to the negotiation.

5. Pursuant to Section 100/2(c) of the Contribution Act, an alleged tortfeasor that settles with a claimant in good faith shall be discharged from liability for contribution to any other tortfeasors.

6. Defendants Bill McGuire and Carolyn McGuire deny and continue to deny liability to Plaintiff Paul Dulberg and further contest the nature and scope of the injuries Plaintiff Paul Dulberg attributes to the subject chain saw incident.

7. The lump-sum payment of $5,000.00 to Plaintiff Paul Dulberg by or on behalf of

Defendants Bill McGuire and Carolyn McGuire constitutes adequate consideration for purposes of a good faith settlement under Section 100/2(c) of the Contribution Act.

8. Defendants Bill McGuire and Carolyn McGuire respectfully suggest that the settlement with Plaintiff Paul Dulberg is and was made in good faith within the meaning of the Illinois Contribution Among Joint Tortfeasors Act, 740 ILCS 100/2(c).

WHEREFORE, the Defendants, BILL McGUIRE and CAROLYN McGUIRE, respectfully pray for the Court as follows:

(1) For an Order declaring that the settlement between Plaintiff Paul Dulberg and Defendants Bill McGuire and Carolyn McGuire was made and entered into in good faith within the meaning of the Illinois Contribution Among Joint Tortfeasors Act, 740 ILCS 100/1, et seq.;

(2) For an Order dismissing all civil complaints, cross-claims, counterclaims and contribution claims currently pending against Defendants Bill McGuire and Carolyn McGuire, and arising out of or otherwise connected to the injuries claimed by Plaintiff Paul Dulberg, with prejudice;

(3) For an Order declaring that any potential future claims against Defendants Bill McGuire and Carolyn McGuire, including, without limitation, claims for contribution arising out of or otherwise connected to the chain saw incident and injuries claimed by Plaintiff Paul Dulberg, are barred;

(4) For an Order declaring for purposes of Illinois Supreme Court Rule 304(a) that there is no just reason to delay enforcement or appeal of the Dismissal Order; and

(5) That this Court enter an order granting such further relief as this Court deems just.

GOOD FAITH FINDING AND ORDER OF DISMISSAL

THIS CAUSE coming on to be heard on the Motion for Good Faith Finding and for Order of Dismissal with Prejudice filed by Defendants Bill McGuire and Carolyn McGuire, and the Court being fully advised in the premises,

IT IS HEREBY ORDERED, ADJUDGED AND DECREED:

1. That settlement between Plaintiff Paul Dulberg and Defendants Bill McGuire and Carolyn McGuire (improperly named Caroline) constitutes a fair and reasonable and good faith settlement within the meaning of the Illinois Joint Tortfeasor Contribution Act, 740 ILCS 0.01 et seq.

2. That the good faith settlement shall henceforth constitute a bar to any and all claims that Plaintiff Paul Dulberg and Defendant David Gagnon and other known or unknown tortfeasors may have against Defendants Bill McGuire and Carolyn McGuire on account of or arising out of the injuries, if any, sustained by Plaintiff Paul Dulberg as a result of the alleged chain saw accident that occurred on June 28, 2011, whether by way of original action, third party claim, cross-claim, counterclaim, claim for contribution or otherwise.

3. That Defendants Bill McGuire and Carolyn McGuire be and are hereby dismissed from the above-captioned lawsuit as party defendants and cross-claimants, with prejudice, and in bar of further suit.

McGUIRE DEFENDANTS' MOTION TO VACATE PROTECTIVE ORDER

Defendants, CAROLYN McGUIRE and BILL McGUIRE, by their attorneys, Cicero, France, Barch & Alexander, PC, herby move this Court to vacate the Protective Order entered on August 8, 2012 and modified on April 3, 2013. In further support of the Motion, Defendants Carolyn and Bill McGuire state as follows:

1. On or about May 5, 2012, the Plaintiff, Paul Dulberg, filed a multiple count complaint alleging he suffered injuries as a result of negligence on the parts of David Gagnon, Carolyn McGuire and Bill McGuire. In general, Plaintiff alleges he sustained severe and permanent injuries when a chain saw being operated by David Gagnon made contact with his arm.

2. On July 31, 2012, Plaintiff filed a Motion for Protective Order wherein he alleged that Plaintiff's counsel (Attorney Hans Mast) wanted an opportunity to photograph and inspect the subject "chain saw" and any parts, accessories and manual/paperwork pertaining to the saw. In his prayer for relief, Plaintiff requested a protective order declaring the "saw and its parts and

accessories and paperwork/manual be preserved and protected without destruction or loss until further order of this court." A copy of Plaintiff's Motion for Protective Order is attached as "Exhibit A."

3. On August 8, 2012, the Court granted Plaintiff's Motion for Protective Order. A copy of the Court's order of August 8, 2012 is attached as "Exhibit B."

4. On March 20, 2013, the depositions of Carolyn McGuire and Bill McGuire proceeded with counsel for Plaintiff (Attorney Hans Mast) and counsel for Co-Defendant (Attorney Perry Accardo) present. Prior to the start of the depositions the "chain saw" allegedly involved in the injury to Plaintiff was presented for inspection and photographing. Plaintiff's counsel photographed the chain saw and also photographed the Owner's Manual.

5. On April 3, 2013, the Court's protective order was modified to allow the owners to utilize the chain saw and Owner's Manual in the ordinary course. The protective order further directed that the owners shall not sell or discard the chain saw, parts, accessories and associated paperwork without further order of the court. A copy of the Amended Protective Order dated April 3, 2013 is attached as "Exhibit C."

6. Subsequent to the entry of the amended protective order the Plaintiff reached a settlement agreement with Carolyn McGuire and Bill McGuire as to all matters in controversy, whereupon the negligence claims and contribution claims against them were dismissed with prejudice. A copy of the Good Faith Finding and Order of Dismissal entered on January 22, 2014 is attached as "Exhibit D."

7. With the claims against Carolyn McGuire and Bill McGuire fully resolved, counsel for the McGuires issued a letter to Attorney Mast and Attorney Accardo seeking an agreement to

have the pending protective order vacated. A copy of the February 12, 2014, letter to counsel is attached as "Exhibit E."

8. During a chance meeting in the Winnebago County Courthouse shortly after the February 12 letter issued, Attorney Accardo advised informally that he had no objection to vacating the protective order. Counsel for the McGuires has not heard from Attorney Mast.

9. Counsel for Plaintiff and Counsel for Defendant Gagnon have both had an opportunity to photograph and inspect the subject chain saw. In addition, both attorneys have copies of the Owner's Manual associated with the subject chain saw.

10. The subject chain saw was brand new on the date of Plaintiff's claimed injury and Plaintiff does not allege or claim that he was injured due to a manufacturing defect associated with the subject chain saw.

11. No prejudice will result to Plaintiff or Defendant Gagnon should this Court vacate the Amended Protective Order.

12. No just reason exists to delay the McGuires' request to vacate the Amended Protective Order.

WHEREFORE, the Defendants, Carolyn McGuire and Bill McGuire, respectfully pray this court to vacate the Amended Protective Order dated April 3, 2013.

Case: *Paul Dulberg v. David Gagnon, Caroline McGuire and Bill McGuire*
(McHenry County Case No. 12 LA 178)

Dear Counsel:

With my departure from the case I feel compelled to address the subject of the chain saw that was involved in Mr. Dulberg's injury. Early on in the case a protective order was entered which prohibited Mr. and Mrs. McGuire from destroying or otherwise disposing of the chain saw and any associated documentation. The primary purpose behind the order of protection was to preserve the chainsaw and associated documentation until such time that Plaintiff's counsel could inspect and photographs same.

On March 20, 2013, the chain saw and owner's manual were made available for inspection and photographing. Plaintiff's counsel inspected and photographed the chainsaw. Plaintiff's counsel also secured a photocopy of the owner's manual.

On April 3, 2013, the protective order was modified to allow the Plaintiffs to use the subject chainsaw, owner's manual and associated paperwork in the ordinary course. The order further provides, however, that the owners may not destroy, dispose of, or sell the items without further order of the court.

Given the above, I am concerned about the possibility of a spoliation claim in the event the McGuires destroy, dispose of, or otherwise sell the chainsaw following my departure from the case. Please advise in writing whether you believe there is any reason to maintain the protective order as it currently exists. If not, I believe it makes sense to have the April 3, 2013 version of the protective order vacated.

I look forward to hearing from both of you at your earliest convenience.

Very truly yours,

RONALD A. BARCH

Dear Loyal Friend : PAUL DULBERG

Thank you for inquiring about your Prescription records. Our research for records is conducted with your first and last name and complete date of birth. Social Security numbers are not used by Walgreens for retrieving Pharmacy records.

In processing your record request, we have carefully scrutinized two separate computer systems to locate both the past and current prescription items purchased in our Pharmacies or through our Mail Order Facility. The records we have enclosed represent a thorough search of all records available, pursuant to retention policies and periods assigned by the state in which you filled your prescriptions.

In some instances, we have been unable to find record of prescriptions filled. If you did not receive records with this letter, please check the enclosed information to confirm your name and date of birth were provided to us correctly. If they are not correct, please advise us and we will be happy to conduct a new search. It would be most helpful in locating your records if you would please provide us with as much of the following information as possible:

your first and last names, including a/k/a's, nicknames, maiden names, or other names you may have used to fill prescriptions;
any of your past address information (particularly city and state);
current address, telephone number and date of birth;
location of the Store(s) in which you filled prescriptions (street name, city, state);
current and past telephone numbers, including area codes; and
a copy of any bottle, labels, or receipts you may have kept from the past.

Please submit this information in writing to us at the address listed below.

So you are aware, the law requires us to retain your prescription records for a minimum of only two years, in some states. As a courtesy to faithful customers like you, we maintain your prescription records for at least 10 years to better service your needs. If there is anything further we can do for you, please feel free to contact us, and thank you again for entrusting us with servicing a portion of your medical needs.

Sincerely yours,

I can keep going...
I have witnesses to all of this. It's not just your word vs mine.

Bottom line is if you want out simply because you feel I have no respect for you then all of your fees are subject and any lean you have is subject.

I'm giving you the opportunity to remedy this coarse of action you have chosen.

Do you chose to be professional and do the job your capable of or do you chose to remove yourself for some made up reason. Our emails alone show there is no breakdown in communication. We are still communicating. This email proves that.

So, unless you can explain your action to remove yourself from this case for some excusable reason I see no reason why you feel your entitled to being able to get excused from it at all.

I put you to task to do as you agreed to and represent me to whatever ends this case comes to. Will you be professional and finish what you started?

Damn these emails hurt to type...

Wish you had it in you to go after the bad guy who did this and not your innocent client.

Subject: EMG Test

Hi Hans,
I had a new EMG test done on Tuesday by Dr. Levin at Associated Neurology. She said I should hear from Dr. Sagerman by Friday with results but she doesn't think the test will show anything because of the localized type of damage to the nerve. She did say that it looks like the paralysis in my right hand is probably permanent since it hasn't shown any signs of healing.

When I was at Dr. Seks office he told me that the Hand Surgeon (Dr. Sagerman) had contacted him and talked about possible exploratory surgery in my arm.

Hi Hans,
Time for an update. I went to see Dr Sagerman today. He was able to look at the X-Rays, EMG, MRI and Physical Therapy Reports. He did a much better evaluation then I've had in the past and seemed to nail the symptoms and provide possible outcomes. I feel much more confident in his abilities. He is sending me for a new EMG to see if anything has changed. I called Dr Levin and have an appointment for March 8th to do the test.

Thanks again for all your help,

Paul

Hi Hans,
I received the results from the MRI done on my right arm and Dr. Levin said the MRI came up negative. The physical therapist had already told me that this type of damage seldom shows up on an MRI. Dr. Levin said it was all muscle and tendon damage. Dr. Levin and the physical therapist both suggested I see an hand and arm orthopedic specialist.

I am going to try and make an appointment with DR. Scott Sagerman. Will keep you updated.

Oh, add walking, brushing and playing fetch for more than a few minutes with the dogs to that list.
Another item for the dogs is getting their food. Moving Large bags of dog-food from in the store to the car then into the house and up a flight of stairs is something I have a lot of trouble with. It's why Dr. Kujawa got me the handicap placard for my car.

Hi Myrna,
Kelly was asking what hobbies I had prior to the accident so I started a list.
All of the following are things I used to do that are now affected or altogether stopped after the accident.
This is the quick short list.

Camping, Canoeing & Fishing
Vegetable gardening & other yard work
Cooking, Baking, Candies & canning
Motor Sports, boating, ATV & motor cross, snowmobile

Water Sports, skiing, tubing, etc...
Winter sports, skiing, tubing, snowmobile, etc...
Building, maintaining and repairing motors on cars motorcycles lawn mowers and boats
Playing Guitar
Off road Bicycle riding
Building, repairing, remodeling and maintaining my home
Art, Design & Sketching
Photography
Typing
Writing

Like I said earlier, this is a short list. I had a lot of hobbies but these are the ones that I remember the most and miss

Hope this helps,
Paul

I forwarded the IME to her office a week or so ago and left a message for her nurse stating we were requesting her to review the report prior to your appointment this week.

There's nothing in particular that you need to ask her. After your appointment, Randy and Kelly will be contacting her to see if she has any commentary regarding the report or if any of her opinions have changed and/or why. They wanted her to be the most recent doctor to see you prior to the mediation and wanted her to see you again since the IME.

Randy will not be attending your appointment tomorrow though.

Hi Myrna,
Tomorrow I'm visiting Dr. Kujawa.
Is there anything Randy or Kelly would like me to bring up with Dr. Kujawa?

Also, will Randy be there like he was at that farce insurance examination we had to endure?

Thanks,
Paul

My case is "gross negligence" causing "untreatable, irreversible and debilitating harm"

Never had a lawyer who needed me to help write or correct anything before.
The SSDI lawyer pulled everything from the record and it was perfect.

Yes, I would like to reword much of it because I wouldn't want anything used in it twisted later if we do go to trial.

Yes, I understand that your firm won't back me but it doesn't mean I'm not going to take it to trial anyway. I need the wording to match exactly what I need should I go the distance.

I can honestly say the dollar amount you listed I would never agree to. It wouldn't even cover my wages for the years in physical therapy yet the rest of my life.
If I end up with a structured settlement where I have to chase this guy I believe we can always sell the settlement and cash out. Is that possible?

Hi Myrna,
Apparently Barb, my mom, called and talked to Kelly today.
Barb told me that Kelly would like me to make an appointment with Dr. Kujawa before the mediation.
I did make a new appointment.
It's November 11th at 11:30 am.

Did we send Dr. Kujawa the Independent Medical examination report or am I supposed to take it with me to the appointment?

Thanks,
Paul

Hans,

Your cornering of me and my brother in your office, bullying me into signing off on The McGuires policy citing cases that have nothing to do with the agency clause in the homeowners policy, which clearly makes her policy accountable.
You sir are the one whom told me that I would never see a dime from either case if I didn't sign that piece of paper before leaving your office that day. You wouldn't even let me sleep on it as I had asked. You said you needed the $5,000 settlement with the McGuire's insurance to help fund your costs for the case with David Gagnon.

Then when the physical therapists tried to demand payment in full you told me and my mother that medical leans against lawsuits often expire before the case is resolved saying yes the medical providers can proceed in collecting funds from my assets. Meaning my home. Forcing me into bankruptcy. Then, after filing for bankruptcy, denying you ever said that to both me and mother and going on to say to us that filing for bankruptcy protection had ruined the case.

All that followed up by getting a brief to review from you on the David Gagnon case that was of such a poor understanding of the facts are what lost any hope of respect I had.

I am and have been trying to get you to be professional and earn that respect back at every step.

If you had not taken advantage of my ignorance you would not be receiving this letter nor trying to squirm your way out of representing me today.

As far as your costs and in light of your poor performance to date, it throws into question all of the work you have done on this case. Even the depositions you sat in on are in question. Do you actually think anyone in their right mind wouldn't see it that way.

You may argue strategy as a defense for incompetence but since you sat in on the medical depositions and don't even know what medications I was and wasn't prescribed after almost 3-1/2 years on this case I highly doubt anyone will see your defense as viable.

Exactly, What part of being harmed by both the McGuires and Gagnon through no fault of my own is 9 out of 10 times a losing case?

Exactly what part of you manipulating me into a settlement for only $5000 was seeing to my best interests?

Exactly how is lying in a briefing you were prepared to put before a judge is in my best interests?

Exactly how is giving you chance after chance to correct yourself not giving you the respect you think you deserve from me?

I can keep going...
I have witnesses to all of this. It's not just your word vs mine.

Bottom line is if you want out simply because you feel I have no respect for you then all of your fees are subject and any lean you have is subject.

I'm giving you the opportunity to remedy this coarse of action you have chosen.

Do you chose to be professional and do the job your capable of or do you chose to remove yourself for some made up reason. Our emails alone show there is no breakdown in communication. We are still communicating. This email proves that.

So, unless you can explain your action to remove yourself from this case for some excusable reason I see no reason why you feel your entitled to being able to get excused from it at all.

I put you to task to do as you agreed to and represent me to whatever ends this case comes to. Will you be professional and finish what you started?

Damn these emails hurt to type...

Wish you had it in you to go after the bad guy who did this and not your innocent client.

Hi Hans,
I had a new EMG test done on Tuesday by Dr. Levin at Associated Neurology. She said I should hear from Dr. Sagerman by Friday with results but she doesn't think the test will show anything because of the localized type of damage to the nerve. She did say that it looks like the paralysis in my right hand is probably permanent since it hasn't shown any signs of healing.

When I was at Dr. Seks office he told me that the Hand Surgeon (Dr. Sagerman) had contacted him and talked about possible exploratory surgery in my arm.

Hi Hans,
Time for an update. I went to see Dr Sagerman today. He was able to look at the X-Rays, EMG, MRI and Physical Therapy Reports. He did a much better evaluation then I've had in the past and seemed to nail the symptoms and provide possible outcomes. I feel much more confident in his abilities. He is sending me for a new EMG to see if anything has changed. I called Dr Levin and have an appointment for March 8th to do the test.

Thanks again for all your help,

Subject: MRI-Results

Hi Hans,
I received the results from the MRI done on my right arm and Dr. Levin said the MRI came up negative. The physical therapist had already told me that this type of damage seldom shows up on an MRI. Dr. Levin said it was all muscle and tendon damage. Dr. Levin and the physical therapist both suggested I see an hand and arm orthopedic specialist.

I am going to try and make an appointment with DR. Scott Sagerman. Will keep you updated.

Please find the attached .jpg's. They were taken this afternoon. It is hard to get a picture of the whole scar in one shot because it wraps around my arm. Hopefully these help. I can take more if these don't work.

I have a Dr.'s appointment this friday and will let you know what happens.

Ok got to break that promise and make a new one.
I can't help myself cause it's been 51/2 years since I did these hobbies.
Bowling, I was good at it and did it once a week since I was a kid till this happened.
Ok that's all for today but the list of things I used to be able to do is a long one. Sorry

One more thing I totally forgot about cause I just can't do it anymore but used to do at least twice a year, usually more.

Oh, add walking, brushing and playing fetch for more than a few minutes with the dogs to that list.
Another item for the dogs is getting their food. Moving Large bags of dog-food from in the store to the car then into the house and up a flight of stairs is something I have a lot of trouble with. It's why Dr. Kujawa got me the handicap placard for my car.

Hi Myrna,
Kelly was asking what hobbies I had prior to the accident so I started a list.
All of the following are things I used to do that are now affected or altogether stopped after the accident.
This is the quick short list.

Camping, Canoeing & Fishing
Vegetable gardening & other yard work
Cooking, Baking, Candies & canning
Motor Sports, boating, ATV & motor cross, snowmobile

Water Sports, skiing, tubing, etc...
Winter sports, skiing, tubing, snowmobile, etc...
Building, maintaining and repairing motors on cars motorcycles lawn mowers and boats
Playing Guitar
Off road Bicycle riding
Building, repairing, remodeling and maintaining my home
Art, Design & Sketching
Photography
Typing
Writing

Like I said earlier, this is a short list. I had a lot of hobbies but these are the ones that I remember the most and miss

Hope this helps,
Paul

I forwarded the IME to her office a week or so ago and left a message for her nurse stating we were requesting her to review the report prior to your appointment this week.

There's nothing in particular that you need to ask her. After your appointment, Randy and Kelly will be contacting her to see if she has any commentary regarding the report or if any of her opinions have changed and/or why. They wanted her to be the most recent doctor to see you prior to the mediation and wanted her to see you again since the IME.

Randy will not be attending your appointment tomorrow though.

Hans,

I have found in the paperwork you provided me of the notice of discovery for the Dr's depositions.

All of the paperwork clearly states they were to be deposed before Merrill Legal Solutions on various dates.

Upon contacting Merrill Legal Solutions, none of the Dr's depositions were recorded by that company. In fact, Merrill claims that they did not record any depositions in my case whatsoever.

So, what company did the recording of the Dr's depositions you claimed to have attended?

Thank you in advance for sending the audio recording.

I noticed none of the medical depositions have been included in the file.
Do you have them?

In the Paper file I received It appears that it is incomplete, sections of the depositions are missing as well as all the Dr's depositions.
Makes me wonder what else isn't included.
Any chance you have the complete file?

Hi Brad,
Called your office numerous times today and was told you would return my call.
You failed to call me back each time.

I want a copy of my file including the digital file along with a release of all interest in any fees in the case before 9am court at the McHenry County Courthouse.

If not I'm informing Judge Meyer of your attempts to block this case from moving forward by Holding both the file and the Lean and calling the Illinois State Bar.

Paul

Hans,
If your referring to Brad Balky, he no longer represents me in this case And I am unaware of the deal you two agreed upon.

Here's the deal;
I'm offering cash in return for all leans on this case before Friday or no one gets anything.
Let me know what you want, cash amount or nothing?

Hope your vacation is wonderful,
Paul

Brad,

Before I decide to sign this release I'd like to know exactly why it is you don't think this case is easily winnable?
And please don't spout that it's his word vs mine. That is obvious and is the situation in most cases.
And don't give me the old your only getting 15k no matter what excuse because that's not about this case being winnable or not.

I want some honesty
I deserve that much

Please feel free to call me with the answer

Brad,
You could have just stopped with this is the best deal you could get but you didn't.
You pulled a Hans and assaulted me when you threatened to remove yourself from this case if I didn't sign this release before you see the judge.

That's an ultimatum and it's not something I'm going to react to positively.

The way I see it, there is more than just the 2 options in your ultimatum...

A.) I can take this deal, shut up, go away and keep suffering and praying for SSDI

B.) I can refuse to take this deal, lose you as an attorney and have to find new council or simply represent myself and start over with the same 15k on the table and possibly an extra 15k in bankruptcy surplus while still suffering and preying for SSDI.

C.) I can stop this suit all together and lose 15k, in which no one gets anything while I suffer and prey for SSDI

Any which way I go, I'm the one who's getting thrown under the buss and I'm tired of being a victim of others threats.

As of now I'm leaning towards option "C".
As you said, the medical providers have already written off my accounts as loses and that leaves Option "C", me losing 15k, well, it is kind of a cheap way of saying how I feel about the state of my legal representation and their efforts because their afraid they can't prove the defendant put a chainsaw into my arm and that the defendants mother is an elderly woman with whom the jury may sympathize yet didn't see the actual incident, refused to call 911 for help, but did call her insurance followed by a call to the hospital and lied to the staff claiming to be my mother only to disrupt the emergency room treatment not to ask how I was doing but to tell me she was insured. Good for granny, she is insured. Where was her slick phone skills when I needed an ambulance and for god sakes why lie to the hospital staff and call me in the emergency room to tell me the most important thing on her mind... The fact that she was insured. Big deal what did it do to help me?

These people had no concern for anyone's well being other than their own.
They are the type that deserve to get sued. Granny or not.

This may all make a great documentary one day about the state of legal representation and their ethical commitment to following through once they commit themselves to a client. A series false dichotomies of sorts.

It is just a leaning towards option "C" not an actual commitment yet.

I need to sleep on the options for a couple nights

I'll get back to you with my answer just before court starts later this week.

Please remind me, what is the time and date the judge set?

Thanks for everything,
Paul

Morning Brad,

Talked with my mom and it seems to us that if all I'm going to get is 15k even if we max out the defendants policy limit then I should seriously look at taking this to trial and leaving it up to a jury to decide an appropriate amount. 15k might as well be 0 because it doesn't even begin to pay for the damages I've suffered.

I know the risks and that it would cost me almost 20k more in expenses and that the defendant can run off and pay nothing beyond his insurance limits.

Assuming that Allstate may claim the act was criminal and that their not responsible has to be overcome. I'm not a mind reader and can't make any claim as to their clients intentions and their client isn't going to self incriminate himself so I don't see how their claim of something criminal can hold water. Especially since their client hasn't been charged with any crimes associated with his actions on that day.

At the last court date, The judge asked if I was doing this for principles. I answered no.
However, after thinking it through... Seeing as how I'm getting virtually nothing out of this and will eventually lose my home, that I was working most of my life to keep, because SSDI can't cover living here or almost anywhere that I can consider worthy, my principles are evolving and I'm not opposed to going the distance and taking this to trial. I'm willing to make a principled point that people should not get off 'scot free' other than having to find a new insurance company after using a chainsaw on another person causing real life threatening harm with permanent damages.

I'm more than positive that a jury will award more than the insurance limits and that we will not recover anything more than those limits, but one thing is almost for sure, the defendant will most likely have to file bankruptcy to protect his assets and the next person he hurts over the next 7-10 years will have full access to his assets because he won't be able to file bankruptcy again for that period.

Either way, I get virtually nothing so principles are all I have.

On the positive side, If the jury does award an amount more than the insurance limits we get to see if the defendant has any assets that can't be protected and if he does I stand to get the costs of a trial covered a perhaps a smidgen more than 15k, if not, well then I'm in the same boat I am already and nothing changes.

Have you talked with the trustee?

My understanding was its over and that **if I felt** strongly about paying those I owed I still could but wasn't required to anymore.

If it turns out the suit is still in play for the bankruptcy I wonder why the order from the court I sent you doesn't list the suit as an exemption from the order. On the back of the order it details what the exemptions listed on the front mean and my order didn't have any exemptions listed.

Either way it doesn't matter.
My thoughts are, if we get enough to pay the debts all the better.
Perhaps we can get enough to undo the bankruptcy altogether.
Would be nice not having a bankruptcy on the record.

Thanks again,
Paul

Hi Brad,
My mom came up with a good question.
Doesn't David Gagnons homeowners insurance have different parts to the policy that apply?
Parts for just the medical, parts for just damages, parts for pain and suffering, etc...
I suppose it depends on his actual policy and how it's written but I wanted to understand your take on David's policy

Hi Brad,
Thanks for the heads up.
My understanding was the 15k bankruptcy protection limit included all my assets, not just the proceeds from this settlement. I was also informed that I can receive much more than just 15k if the settlement or trial verdict produced enough to satisfy the creditors.

Just so you know...
I won't settle just for the insurance. It isn't enough.
I don't know what a crippled dominate hand/arm is worth but it would seem to me that it is worth a whole lot more than the insurance limits the defendant has.

Thanks and feel free to call me,

Hi Brad,

Yesterday Saul Ferris office called and said they just received back the packet they mistakenly sent to Hans Mast at Popovich law firm.
In it is the pretrial settlement memo you wanted to see.
There is also the printed depositions of both the homeowners, the defendant and myself.
I picked these up this morning.
Let me know how to get these to you.

Thank you,
Paul

Morning Brad,

You have power of attorney to endorse the draft on my behalf.

Paul

Ps. Wish I could make Hans choke on this check for his lies/incompetence that lead to such a small amount!

Hi Brad,

As we discussed, I was to receive via certified US Mail depositions and communications between Hans Mast and myself from Saul Ferris an attorney in Gurnee, IL. Saul Ferris number is (847) 263-7770

I called Saul Ferris office last week and was assured they were sent. I was told to give it another week.

I called Saul Ferris office again today to find out they were mailed to and signed for at 3416 W. Elm St. McHenry, IL. by someone named Anne Oupl on March 7th. This is Hans Mast office.

I called Hans office and apparently no one by that name works there and no one knows anything about receiving the certified mail.

I'm at a loss as to how these documents were sent to the wrong place and am a bit furious because it has the memo about the pre-trial settlement you wanted to see.

Please advise.

Thank you in advance for your help with this matter,
Paul

Hans,

May I remind you, Less than 2 weeks ago you said in an email you had all the records ready for my new attorney. I can provide a copy of that email if you can't even remember two weeks ago or can't figure out how to go back that far in your email account.

Now that you removed yourself, you claim that you cannot turn over the records until your paid.

The lean is your only guarantee. It's the same guarantee all the medical professionals have against this case.

If you are unwilling then This has all the makings of what society calls a shyster lawyer.

Please Turn over all records pertaining to this case from start to finish for you may not speak with my new council.

I most likely already have to pay double attorney fees for this case thanks to you.

Please don't cost me any more money or I may just let this case expire and you get nothing.

Is that what you want?

Please note and notify whomever needs to know pertaining the bankruptcy

As of this morning Hans Mast and the Popovich law firm are no longer representatives in the lawsuit that is pending.

I was granted 21 days to find new council.

I ask that any and all communications cease immediately with the Popovich firm pertaining to this case.

Thank you,
Paul

I'm giving you the opportunity to remedy this coarse of action you have chosen.

Do you chose to be professional and do the job your capable of or do you chose to remove yourself for some made up reason. Our emails alone show there is no breakdown in communication. We are still communicating. This email proves that.

So, unless you can explain your action to remove yourself from this case for some excusable reason I see no reason why you feel your entitled to being able to get excused from it at all.

I put you to task to do as you agreed to and represent me to whatever ends this case comes to. Will you be professional and finish what you started?

Damn these emails hurt to type...

Wish you had it in you to go after the bad guy who did this and not your innocent client.

Hans,

Your cornering of me and my brother in your office, bullying me into signing off on The McGuires policy citing cases that have nothing to do with the agency clause in the homeowners policy, which clearly makes her policy accountable.
You sir are the one whom told me that I would never see a dime from either case if I didn't sign that piece of paper before leaving your office that day. You wouldn't even let me sleep on it as I had asked. You said you needed the $5,000 settlement with the McGuire's insurance to help fund your costs for the case with David Gagnon.

Then when the physical therapists tried to demand payment in full you told me and my mother that medical leans against lawsuits often expire before the case is resolved saying yes the medical providers can proceed in collecting funds from my assets. Meaning my home. Forcing me into bankruptcy. Then, after filing for bankruptcy, denying you ever said that to both me and mother and going on to say to us that filing for bankruptcy protection had ruined the case.

All that followed up by getting a brief to review from you on the David Gagnon case that was of such a poor understanding of the facts are what lost any hope of respect I had.

I am and have been trying to get you to be professional and earn that respect back at every step.

If you had not taken advantage of my ignorance you would not be receiving this letter nor trying to squirm your way out of representing me today.

As far as your costs and in light of your poor performance to date, it throws into question all of the work you have done on this case. Even the depositions you sat in on are in question. Do you actually think anyone in their right mind wouldn't see it that way.

You may argue strategy as a defense for incompetence but since you sat in on the medical depositions and don't even know what medications I was and wasn't prescribed after almost 3-1/2 years on this case I highly doubt anyone will see your defense as viable.

Exactly, What part of being harmed by both the McGuires and Gagnon through no fault of my own is 9 out of 10 times a losing case?

Exactly what part of you manipulating me into a settlement for only $5000 was seeing to my best interests?

Exactly how is lying in a briefing you were prepared to put before a judge is in my best interests?

Exactly how is giving you chance after chance to correct yourself not giving you the respect you think you deserve from me?

I can keep going...

Today I had another appointment with her. She set me up to see her again in 6 months on September 15th and it will be every 6 months from this point on. This visit is not included in the Billing you received.

Technically it's one third of the recovery but obviously that's not going to work because your attorney needs to be paid for something too. The whole calculation is done at the end of the case. There's simply no way to do it until the case is settled and we know what the amount is.

Hans,

Did Tom Popovich go to high school with the defendant David Gagnon and the defendants sister Diane Gagnon?

Hans,

If I have to get a new attorney in the 11th hour of this, The damage done to my case far outweighs your lean.

If you sign off the lean I'll see to it your paid for your real costs.

Hans,
I'm just a laymen but my eyes are opening, As you should very well know, I can't have a new attorney until we are dissolved. So, your suggestions to me for over a year to get a new attorney is in error, one of many to my dismay.
I no longer feel you or your firm are seeing to my best interests and most likely haven't been since I signed on.
It's a shame because you come across to me as a Jon Stewart type and I honestly thought you would be good.

All that needs to be done is deposing experts and going to trial. But don't get me wrong I think we can work out something very reasonable. Typically any type of lien arrangement is done when the case is concluded.

Oh, and unless I'm wrong, David did admit to having control over the chainsaw. David, in his lie, admitted to seeing me move my arm and continued along his path with the chainsaw at cutting rpm's.
In effect he did admit it was his fault.

Now you back out because the value of the case isn't worth your time?
You got some nerve and your earning the reputation of a shady lawyer

This is as total as it gets for us in the working class short of being paralyzed or dead.

I need someone who is on my side, top of their game and will see to it that I'm comfortable after all this is over.

What I feel is an attempt to settle for far less than this is remotely worth just to get me off the books.

I know you don't believe I'm hurt...
I'm not interested in belief, I think the facts speak volumes above belief

I question who's side your on?
Your comments about believing David's deposition, etc...

Hans, I have no degrees but I was better at my career in printing and graphic design than anyone I ever worked with who did. If I need character references from past clients, employers, coworkers, teachers, etc... I have an army of people who know I'm one of the most genuine, honest, dedicated hard working persons who takes responsibility for my actions. David on the other hand isn't a stand up guy at all. He couldn't even take responsibility for his actions not to mention his attempts at collecting from this, which I believe constitutes insurance fraud.

Oh and I'm contacting the McHenry county states atty... I know too much time has passed since the threats but those threats were for a future time once all this was settled. If he attempts to collect or make good on his threats and if I end up back in the hospital I want everyone to know who to go get. I'm done playing nice with this guy and I can only hope I have an attorney who feels the same.

I have to ask since you think I don't understand, what is it your trying to do?

Paul

important. This is just a memo to introduce the judge to the case. If there are different ways you want to say things I'm happy to do that. It's going to serve it's purpose perfectly.

How hard is it to sue an atty?

The issue of my word vs David Gagnons... Did he cut me or did I cut myself?

Of coarse he cut me.

The SSDI lawyer pulled everything from the record and it was perfect.

One more ?
Why isn't David Gagnon being charged for either the chainsaw incident or his coercion and intimidation to try and get money out of this in a criminal court?

Hans,
I got it...
Why does your mail always arrive opened?
Also, many statements in the memo appear inaccurate. Not sure if it really matters.
I'd ask for more $ in the demand... There is no way what is written is enough

I have to wonder...

Is it the fact that David Gagnon doesn't have a bigger insurance policy?

Or perhaps that I didn't lose my arm?

What is it that isn't good enough for your firm that they would actually drop a client they chose to represent?

I'm betting in the end it's all about the amount of money your firm can make off of my injuries because I've done nothing to exaggerate or hide anything.

Have a merry Xmas, now I'm late to see a dr and my arm muscles are in spasm from trying to type this waisted email as fast as I can.

Oh and that stupid statement I heard you say in the past that part of my injuries were to distal from the cut...

I dare you to Try fending off a chainsaw that's violently cutting into you unexpectedly and survive without any other issue other than where the chainsaw cut you.

And if during that event you should twist an ankle, hit your head, another part of the body or anything else from trying to save yourself... Remember it's too distal from the wound so you lose...

That is absolutely retarded to think that my elbow was too distal from the cut... Think about what it takes to fend off an aggressive chainsaw cutting into you and then tell me if any other smaller, at first unnoticed injury is too distal to be real?

I'm tired of this crap

Talk with you after Monday,

On another note,

David Gagnon already received more than any lawsuit will bring me...
If this was someone I didn't know...
I'd find out how to put the guy in prison for as many years as I could.

No one should be allowed to use a chainsaw like he did and get away with it!

The gift I gave David by providing him with the benefit of the doubt has turned out priceless for him...

What I received is a life sentence even if I win some lawsuit...
What can I do with the money, pay someone else to do the things I would have been able to do myself if this didn't happen?
What part of life makes that appealing?
And how long will that last?

I went from being a doer with some potential to being a watcher and beggar. There is nothing that can change that...

Neither David nor his insurance policy can fix any of this.

Your position of fear in this case is appalling.

Oops, hit send accidentally. . Another issue from a shaky muscle in my forearm...

Hans,

What and where does "you weren't hurt that bad" mean or come from?

It was a deep laceration from a chainsaw and I'm only hurt as bad as it is and that's it.
I obviously have long term issues with/from the injury so no exaggeration is needed on my part.

Whether or not it's considered disabling is the only real question and that is being decided for us at the federal level with other dr's and vocational experts that I didn't pick.

All that I hope for is that I'm treated by those like you as you would want to be treated.

Thanks for the honesty and I will get back with you after Monday.

Hans,

At first my goal was to get my medical paid for...
That's changed because it's turned out worse than I thought...
Now it's simply to get as much as we can and move on with my life...

What are your goals in this case?

Subject: Associated Neurology

Hi Hans,

Just got a call from associated neurology because of the bankruptcy notice they received.

Tried to explain that the leans on the lawsuit expired after 3 years and I really don't have any choice.

They said they never heard of such a thing and are looking into the lean issue and will get back to me.

On another note, Baudin's firm must not be interested because they never called me.

Do I need to find a new firm or what?

Thanks,

Paul

Hans,
Your risk...

I just had to file bankruptcy because of that incident 3-1/2 years ago. I could no longer make all the payments to my creditors. I also have a disability suit because of it.

I don't care about a settlement unless it's enough to drag David Gagnon through bankruptcy for his idiotic use of a chainsaw and made up story under oath. Gagnon sure showed his true colors when he was deposed, he just isn't a standup guy at all.

Either way it goes, (settlement or trial) I'm not going to make anything near what I've already lost or what my future losses are going to be so it just doesn't matter.

The only thing that would be remotely satisfying is knowing that David Gagnon had to go through a settlement or trial and lose, then find himself actually having to face bankruptcy.

I can only hope he has enough assets that it actually hurts.

Paul

notice they received.

Tried to explain that the leans on the lawsuit expired after 3 years and I really don't have any choice.

They said they never heard of such a thing and are looking into the lean issue and will get back to me.

On another note, Baudin's firm must not be interested because they never called me.

Do I need to find a new firm or what?

Thanks,

Paul

Hi Hans,

I heard from Meredith (my lawyer for SSDI) about when I should expect a response from SSDI.
Apparently the SSDI courts are understaffed and it may take up to a year or a little longer from the date the appeal was filed.

I'm unsure of the exact date it was filed but the last hearing was in April or May and I believe the appeal was filed just after that so it may be a while before I hear anything and then it all depends if it's dismissed and I actually have to sue or its remanded back to the lower court for reconsideration.
Either route it's going to be many months before I know anything more.

At my last visit with Dr. Kujawa she said she is filing my injury as permanent but I'm not sure if that is admissible to the appeal at this point. Meredith is working on that.

On another note, I called Randal Baudin's office again and am waiting to hear back again.

Thanks for everything,
Paul

Hi Hans,

Coleen at dynamic hand therapy called with a proposal.
She is going to write up an agreement.
It will be $25.00 per month till the SSDI judgement is finished.
After that it will increase to $100 per month if the SSDI judgement is favorable or stay at $25 per month if it isn't.
Payments end once your case against David Gagnon is settled and they receive their share of the settlement.

This keeps it out of collections.

Does this sound fair?

Won't they be better off if they resign a new lean against the suit rather than wait 30 years for me to sell this house?

Just so you know...

Last week when Coleen from dynamic hand called to inform me that the lean against the suit expired, I offered to make payments and that was also refused.

So technically this is the second time they refused compensation.

Honestly, what can dynamic hand therapy hope to get from me if they don't accept the insurance?

The only asset I have is a home that is probably underwater.

If all they can do is put a lean on it their better off taking what the insurance offers.

What legally can be done to me?

Hi Meredith,

Curious if I am entitled to Medicare or Medicaid during the period the judge determined I was disabled?
If so where do I need to go to get help with the medical bills during that period?
Thanks so much,
Paul

Hans,

Since I was determined disabled by the SSDI judge during the time of treatment does that entitle me to Medicaid or Medicare? If so can't they help to pay the past due medical bills during that time?

Hans,

Last evening I was in the hospital with the most severe migraine I've ever had.

This morning I filed for bankruptcy with David Stretch.

This afternoon I spent with my regular physician Dr Zaide doing a follow up from yesterday.

And right now, I have to email you. All when I still have a slight residual headache and should be in bed.

At first I thought the migraine was brought on by the medications I'm taking but it wasn't, it was brought on after our discussions. Now I can't prove that but it seems pretty obvious to me. Joke no pun intended there!

That migraine made me realize I need the stress of this situation over with. All the stress on top of losing everything is too much and I'd rather live than die from it all before my body does something worse.

My body is not reacting well and the migraines are getting more frequent and worse. Have you ever vomited at the same time as deficating while being in some of the most excruciating pain in your life?

If not, neither did I till the chainsaw went through my arm. That's when the migraines became more frequent, stronger and faster coming on. And now for the first time during the day.

Ever since I awoke this morning, all I can I think is the stress of it all is killing me more and more as the reality sets in and I just can't afford to care about it anymore.

My health means more than some lawsuits and the lure of money.

All because some idiot named David Gagnon forgot to tell me to move out of the way and he can't seem to admit it.

Yes, after reading his deposition and hearing it was my fault I was pissed.

In my anger I suspected all sorts of things. Including it being intentional especially after my discussions at his home only trying to get his homeowners policy number and him wanting money and threatening me for it.

Yes, my arm and elbow were hurt from his stupidity irregardless if some dr can link the two together or not.

Yes, there will be ongoing medical as a result of all this because it still hurts and doesn't work right.

Yes, I am now disabled irregardless of what SSDI appeal goes because of this.

Yes, I understand I'm screwed because of a system that allows one person to hurt another and even after a trial and judgement entered all they have to do is go file for bankruptcy in the same courthouse on the same day.

Yes, it just took me almost an hour just to type this.

Yes, yes, yes...

but none of it matters anymore!

Bottom line Hans... Do the best you can with what you got, I've got nothing more to lose or give. I need it all to just go away.

Paul

Hans,
if I use a chainsaw and cut you badly who is going to believe me when I say it's not my fault, Hans just fell into it?

Who in their right mind is going to believe me when your pointing your finger at me saying I did it?

Who?

case to trial. I just don't think we have enough evidence to prove our case and to invest the time and cost and preparing for trial and moving to trial just in my mind does not make sense to me. I have to be very realistic about things and honest with my opinion. It doesn't do you any good if I do not feel strongly about the case.

That's the very reason why I wanted to have this discussion. I want to give you the option of finding other counsel at this point if you really want to take the case to trial which I think ultimately will be necessary. I just do not believe strongly that defense counsel will offer much in the way of a settlement. Although I will ask him if he is going to make an offer and maybe that will allow you to make a better judgment on this.

A few questions from a layman,

How much could a trial actually cost?
What,
$50,000
$150,000
Does it even cost as much as a car?
What number?

How much would you hope to get for us in a settlement?

How much could be expected if the trial does proceed and we have a favorable outcome?

Hans, if your heart is not in this I'm sorry

Hi Hans,

I spoke with dr. Kujawa's assistant Elsie by phone on Friday. I updated her on how the increased dosages of Neurontin/Gabapentin are having an effect on the burning spasms in my arm. I told her that each week that I increased the dose I was able to get a 75-80% reduction in the amount of burning spasms for approximately 2-1/2 to 3 days tops before I adjusted to the new dosage and the beneficial effects wore off. Unfortunately, I also sleep for 2-1/2 to 3 days each time the dosage is increased.
I am now at the recommended level of 1800mg a day and don't have anymore dosage increases scheduled and it's as if I'm not getting any relief again. She said dr. Kujawa wants to keep me at that dosage until our next office visit.
As far as the Botox injections go, I told her this time it definitely had an effect. My hand is now weaker and I can't even my full coffee cup up straight. She said that's what it's supposed to do and that as it wears off the spasms may get stronger and that we will do another round of injections at the 3 month office visit. She also said that I shouldn't be grabbing anything more than a couple of pounds.

Hi Hans,
I spoke with David Stretch, a bankruptcy lawyer, about possibly going the route of Bankruptcy. He said if I have a pending a suit that it is considered a possible asset and may allow the court to hold off any bankruptcy judgement pending the outcome and that I would only be able to exempt 15,000 before the creditors get their share.
He also said if all I default on is credit cards but keep up on the mortgage and basic needs all that can happen is a judgement will be issued against me and it goes on my credit report and it can be cleared later by filing.

I know my personal financial issues are not your problem but I am to a point for the first time ever that I am stopping all payments to my credit cards and focusing on the house, food and utilities. Or rather I should say my Mom is thanks to the chainsaw.

Does filing bankruptcy make any difference on your end and would it complicate anything?

In your opinion what would be the better route, file bankruptcy now or just default on the credit cards and deal with it later?

I added the contact info for David Stretch below

Thanks,
Paul

Hi Hans and Meredith,

I had an appointment with Dr. Kujawa yesterday.
She said the Botox injections will not solve the spastic pains you saw marked on my arm in the video I sent you but it should help with opening and closing my hand so I did another round of injections.

Of coarse I asked, am I stuck with those pains the rest of my life, it's been almost 3 years?

She replied, most likely but that's what the Neurontin/Gabapentin are for and it should help curb some of those pains.

She prescribed Neurontin/Gabapentin for the pains and asked that I report any changes to her and to see her again in another 3 months.

My next appointment is set for August 14th.

Thanks again,
Paul

I spoke with my counselor at Rosecrance, Dennis, he said the issue is the old records are kept on their old system. He is going to try and have them for me Monday morning.

I got the records from rosecrance (minus the original councilors stuff and gave them to Meredith the day of the hearing. Rosecrance was in the process of getting the original records. I'll call and see if they have them.

What is a small amount?

Its your word against Mr. Gagnons. Most times, that means we lose - as plaintiff. I don't think we want to invest the time and expense to get to that result. Im happy to try to settle the case for you, but it will probably be a low amount. So, I want to advise you now should you wish to retain other counsel to try the case for you. Please advise how you wish to proceed. I know this is not good news, but I have learned a long time ago, some cases just are not proveable - not because you are not credible, but because jurys demand more than we can give at trial.

Paul,

I was able to get this email! I had written Meg to see the status of the records.

Again, here is what we discussed:
(1) the medical expert gave you a closed claim of benefits - we don't want to take that (i want you to have the ability to appeal any unfavorable decision/not be foreclosed from getting a closed period of benefits and then reapplying if need be) so that is why we went to the vocational expert testimony.
(2) when we went to the Vocational Expert, he gave jobs that conflicted with his testimony so I eliminated the jobs through his testimony (I just need to write a post-hearing memo for that and I am holding off and waiting for the medical records from Dr. Kujawa so i can address ongoing treatment in a memo to the judge as well)
(3) your psych records also reflect you can't do the jobs the vocational expert listed because they all require social contact which your records reflect that you really shouldn't do and the ALJ didn't develop the testimony there - kept saying we were running late - i will address that as well in the memo to the judge.

The records we addressed were requested previously by Meg and from my knowledge we are still waiting on the records (medical records often take quite a long time to come in).

I'll be happy to follow up with Meg/Janet tomorrow to find out the status of the records and if we may require you to get the updated records. While the Dr. Kohn records would show old treatment, it is Dr. Kujawa's records that are more useful (they show ongoing issues during the period in which you are claiming disability). Old records from 2002 will only show that you had problems in 2002 - updated records (from 6/28/11 onward) are key to your case at this point.

I'll be in the office tomorrow to speak further as well (312) 561-3030 if you have any questions.

Hi Janet,
I had the SSDI hearing last Thursday. It was a learning experience and I am not sure how it went. Much of it I didn't understand.
We were missing some of the reports. Particularly anything from Dr. Kujawa showing ongoing care for post traumatic Dystonia in the right forearm and some old reports from Dr. Kohn who was the Dr. who gave me over 100 shots in my neck, shoulders and back for severe muscle spasms after the car accident over a decade ago. Dr. Kohn from Kohn medical group in McHenry, I completely forgot about until the questions about muscle

spasms came up in the hearing.
The judge left open the record for 30 days for us to add anything to the medical record.
Should I be the one to get the old reports from dr Kohn and the ongoing reports from dr Kujawa?
Also, Meredith Marcus, the attorney from Daley Disability law, asked me to send her Dr. Kujawa's contact information but her email (mmarcus@fdaleylaw.com) keeps getting sent back to me with an error saying its undeliverable. I'm not sure how to get around the emails being sent back. What should I do?

Thanks again for everything,
Paul

Hi Hans,
Had an SSDI hearing yesterday. Won't know outcome for possibly 6 months. It was a learning experience.

Ok, it's signed and in the mail.
Hope that some yahoo in the govt. doesn't someday decide to go after everyone they think they might get a dollar out of and end up holding me responsible for the McGuires fees incurred while they fight it out.
I'm not in the business of warranting, insuring or protecting the McGuires from government. Especially for only 5 grand. For that kind of protection it could cost millions but I trust your judgement.

Particularly the one about being eligible.

Also, I cannot warranty against what SSDI, Medicare or any other government institution wishes to do.

Is it possible to make this agreement blind to the McGuires or David Gagnon?
What I mean is can we make it so that the amount of money cannot be told to them in any way?
It would drive David's ego crazy if he thought it was a large sum and was banned from seeing how much it is.

David was the one the neighbor talked to. The neighbor did not know Dave's name but described him to a T and did say he would know him if he saw him.

On another note: I noticed David had the order of cutting down the apple tree before or after the pine tree goofed. Not a big deal but I think Bill, Carols and my own deps agree it was done prior. I remember the same neighbor talking about that day prior to the big trees coming down.

That neighbor has a better view from inside his house of the McGuires back yard than the McGuires do from their own house.

I think David wasn't just confused about the timing, he was trying to show he hadn't done any work prior to this incident. Not sure why but the complete fabrication as a whole shows that David was right, he wouldn't lie to help me but he would lie to help himself.

I'm done ranting...
Reading that dep got me going. Need to let this thing rest for a bit.

Have a good day and enjoy your holidays,
Paul

Hi Hans,

A while back I sent you the name and number of the McGuires neighbor. I don't have it in front of me at the moment but it's in our correspondence.

The neighbor claimed that the McGuires had asked him to borrow his chainsaw to cut down the trees on the McGuires property just a few days prior to the trees coming down.

It would seem to reason that the McGuires did not own a chainsaw at that point and tried to borrow one from a neighbor before going out and purchasing one specifically for that project.

So my question is, if the McGuires can be proved to be hiding the reason and timing of purchasing the chainsaw can this benefit us in any way?

Thanks,
Paul

Hans,

I read through David's dep. it's mostly lies with a few truths.

Where should I begin or better yet where would you like me to begin?

Almost everything he said was made up, from which end of the branch I was holding, at who's direction I was doing it under and even as to why I was even there on the McGuires property, etc...

Not to mention the nonsense of $10,000.
The only good thing he has coming from me is my ability to hold back my primal side be civil.
It's a shame we don't live in ancient times under the old eye for an eye philosophy of justice.
I'd much rather take a chainsaw to his arm than get any money.

As far as the McGuires are concerned give me a call.

Paul

Is the typed version of the dep actually verbatim or edited somehow?

After reading my own it made me realize not everything said was included.

Hans,

I wanted to review David Gagnons dep before letting the McGuires off the hook.

And that word "foreseeable" in the McGuire suite...
Well I suppose if I gave anyone a chainsaw and told them to use it, given enough time, an injury is foreseeable, very foreseeable just not hoped for.

And the comment about people not liking friends who sue friends, um well we all should know other than entirely random acts such as auto accidents, train derailments, air plane accidents, etc. Etc.. That most of the time it's those we know who hurt us most often than not. and if it's serious we must be able to sue even if it is or once was a friend.

Hi Hans,

After reading the McGuire deps it lead me to do a lot more searching online and now I realize the difficulties I created in my own dep when asked about the right elbow and left arm tennis elbow being a natural progression of injury from the original cause. I probably shouldn't have commented on them at all even though I believe it's all connected.

Is there any way to amend the suit to correct for my ignorance and confusion?

I'm not a dr and tried to say in my dep that I don't want to pretend to know what dr's mean when they say things.

Thanks,
Paul

I hope not.
Sounded to me like they claimed to be hiding in their home all day when the neighbor saw them outside actively participating all day.
And carol seeing me pick up a 200 lb. tiller alone with her own eyes when it was really someone she knew very well since the 1970's and sees once a week at least. This shows a desperate wanting to prove my claim of injury as false.
Those are a bit more than a bad recollection by anyone's standard.
I would feel better if we had in reserve and were ready to use all tools needed to win.

Hans,
If we take the McGuires off the suit can their deps still be used against us in any way?

John Choyinski stopped by yesterday and I asked him about the tiller. He openly admits being the one who loaded and unloaded the tiller. I recorded the conversation and my Mom was also present and on the tape. Both knew I was recording it in my home. I can send it to you if you need it.

Brian Beebe, McGuires neighbor told me he saw the McGuires out working in the yard most of the day. He doesn't know their names but said he would recognize them if he saw them.

If their deps can or will be used in any way against us can or should we bring provable perjury charges and have them thrown out?

Thanks,
Paul

Hans,
Just got done reading those deps.

First off, Glad I'm not a lawyer.
Secondly, it's full of half truths and flat out lies.

Your right, going after those half truths are probably not worth anything in the long run but I do have to comment about the tiller because that one was hysterical.

Dave's best friend John Choyinski was with me when I delivered the tiller and he was the one unloading the trailer and I'm more than positive he would testify to that effect.
It's just amazing how families lie and exaggerate to protect each other but I do understand it, it is Caroline's son.

Hans,
I'd like to read David's dep before accepting the McGuire offer.

Even after reading the McGuire deps and seeing how things easily get skewed in all honesty, I can't blame Carol or Bill for Dave's actions I just thought I was covered under their insurance. I know Carol & Bill thought I was covered as well irregardless of all the half truths in their dep.

Thanks again,

Hi Hans,
Talked with the McGuire neighbor Brian Beebe

Brian Beebe
815-669-0655
1015 oak leaf ave.
McHenry, IL 60051

He remembers the day the tree work was done and said he watched for a while and talked with the people over there because they had asked him to borrow his chainsaw for the same project but doesn't remember the incident itself. He did tell me he has been used as an expert witness for chainsaw incidents because of the kind of work he does.
He did say that his "x" lived with him at the time and is going to ask her if she remembers anything at all and will get back to us. He seems very willing to help.
He has both yours and my number.

Morning Hans,
Ok we can meet. I will call Sheila today and set up a time.
Please send me a link to the current Illinois statute citing that the property owner is not liable for work done on their property resulting in injury to a neighbor.
I need to read it myself and any links to recent case law in this area would be helpful as well.
Thanks,
Paul

The legality of it all is that a property owner does not have legal liability for a worker (whether friend, son or otherwise) who does the work on his time, using his own independent skills. Here, I deposed the McGuires, and they had nothing to do with how Dave did the work other than to request the work to be done. They had no control on how Dave wielded the chain saw and cut you. its that simple. We don't have to accept the $5,000, but if we do not, the McGuires will get out for FREE on a motion. So that's the situation.

Hans,

A while back you told me that the jury's here in this county are primarily conservative and that they know the only reason we are before them is for money.

Not sure if that statement was meant to scare me or not but I do agree, they are, for the most part conservative and I would hope we should make it known we want money for damages, lawyers fees and the medical bills, etc... loud and clear.

We should also make it known to the jury that the parties or their insurance companies have never even offered to pay 1 cent for any of the medical damage and that's why we seek the juries help in settling this dispute. Perhaps if the insurance companies would have paid for these basic things none of us would even be here. but they didn't and now yes after years of waiting I am seeking money to pay for the medical treatments, you as the lawyer and finally myself as I'm the one who has had to suffer the consequences of the Gagnon/McGuire choices on that day.

I cannot believe that a conservative jury isn't going to award anything less than the cost of the medical damages and lawyer fees from them unless something catastrophic changes. I do see them being conservative as to what I will end up with at the end but not the real medical and lawyers bills. Even the conservative juries in this county are not so conservative that they won't give the base bills.

The McGuires insurance is free to go after David for damages if they lose.

Other than fearing a motion to dismiss the suit against the McGuire's insurance based on some false concept that because they didn't have their finger directly on the chainsaw trigger they hold no responsibility for damages.

what are the real benefits of letting them off so easy?

And I don't want to hear its because 2 parties vs 1 is much easier.

Letting off the McGuires insurance for such a small amount is anything but reasonable and I just can't see any ethical judge in this county not keeping them in the suit all the way for a jury to decide whether they had any part to play in the days events and the level of responsibility they share with David for the consequences considering it was the McGuires project, their land, their choice of who did the labor etc. etc...

When you advised me to seek a settlement with the McGuires insurance, I agreed to look at it only because they didn't have their hands directly on the trigger of the chainsaw and That you would get at the least the medical bills paid for out of it. I thought that was made clear in your office.

I know you work on approximately 33%. Is 33% of 5,000 even worth the time and money you already invested? It's only $1650 for you and I'm sure your hourly fee eats that up rather quickly, I know mine did back when I had hands and arms that worked so I could charge.

That's their personal issues of control with their own son. I will testify all day long about the things they wanted him to do that he did do throughout the day.

By claiming they had no control over the work dave did after all the preparation, money and time spent out in the yard yelling at him that they wanted certain things done in a particular way I don't see how they get out of the direct over site of the project because now that there is an injury they don't feel they had any real direct control over their own workers actions?
This is ridiculous.
Hans, they have to do better than claim they had no control over David that day. If that's the case why were they there watching the work most of the day? Even Bill had hands on doing some of the work and rarely let David go to long without checking and seeing if things were being done the way Carol and Him wanted it.

Thinking of what I just wrote,
Should we take the 5 and let them off David's suite and then charge them with the aftermath?
The same can be done with David.
He absolutely refused me a ride to the hospital in his car because I was bleeding so bad.

Only 5, That's not much at all.
Is this a take it or leave it or do we have any other options?

If you want a negligence case for the homeowners ask what happened immediately after the accident.

Neither of them offered me any medical assistance nor did either of them call 911 and all Carol could think of besides calling David an idiot was calling her homeowners insurance.

They all left me out in the yard screaming for help while they were busy making sure they were covered.

She even went as far as to finally call the Emergency Room after I was already there just to tell me she was covered.

How selfish are people when they worry about if their insured over helping the person who was hurt and bleeding badly in their yard.

I'm glad she got her answer and had to share it with me only to find out her coverage won't even pay the medical bills.

I'm not happy with the offer.

As far as John Choyinski, he knows he has to call you and said he will tomorrow.

I am leaving your number with him as he has agreed to talk with you about David Gagnon.
I believe he will try and call sometime tomorrow.

Oh and I know that nothing that happened right after the incident makes any difference as to the validity of the injuries but David's conduct immediately after the incident does show his lack of moral values for other humans and what he was willing and was not willing to do to help me get medical help. For his actions towards me or any other human being is enough to sue the shit out him alone. It is the things that happened afterwards that upset me the most.
Sorry for the rant but Dave was a complete ass all the way and deserves this.

Subject: Sagerman deposition

Hi Hans,

Reading through the summary of Dr. Sagermans Deposition I'm curious as to whether Dr. Levin has been deposed? The reason for this question is because of the EMG tests. Dr. Levin only conducted both the tests from just above the scar in the right forearm to the right hand and fingers. She never tested the right elbow which most likely would have identified the compression in the ulnar nerve earlier. She told me she didn't see any reason to give a full test beyond the scarred area even though The Dr asked for a full test of the nerve. She did tell me that all of the branch nerves in the forearm were severed but that is considered minor nerve damage and most likely wouldn't repair itself. Those minor nerves that were ripped out is what caused the loss of feeling in the right forearm and loss of fine motor skills in the areas they control. Again, no major nerve damage was found, only minor nerves but they still hurt like hell and play a significant part.

As far as the MRI, I was told the test cannot tell the difference between scar tissue and good tissue by both Dr. Sagerman and Dr Levin and neither expected to see much from the test.

As far as proving the elbow is a direct, indirect or hypersensitive result from the chainsaw, I don't think anyone can prove or disprove this let alone bet their medical license on this. All I can say to this is that it never bothered me before the incident and I didn't have any of the numbness or tingling prior to the incident. It is possible that the compression existed before the incident and that the trauma to the arm aggravated the nerve causing a hyper sensitivity resulting in the sensations or lack of them. I don't know how or when the compression in the elbow happened. I believe it happened during the incident but cannot prove it. I was in panic mode followed by extreme shock following the chainsaw being lifted into my arm. All I do know is it didn't bother me at all prior to the chainsaw incident or I would have seen a Dr. about it.

On another note, Dr. Sagermans comment about sitting in front of a computer all day shows he has no idea how repetitious keyboarding is or how much work a graphic designer does. I'm curious as to the context of the question he was asked to reply this way and why he doesn't see typing as an extremely repetitious task requiring good dexterity. Every time I try to go at the keyboard, mouse or even write I don't get very far without suffering a spasm in the damaged muscles. It affects much more than just typing. My grip is shot as well and I have a lot of trouble doing regular daily activities like cooking, cleaning, driving, etc... Those spasms happen anytime I try to use those muscles for more than a few minutes repetitiously. Sit at your keyboard and type with your right hand and feel the muscles in your forearm at the same place the chainsaw entered, dug deep and tore out a huge chunk of my arm and ask yourself if issues in those muscles would affect your ability to type or use your fingers for anything. This is a no brainer, of coarse they do. I don't believe dr Sagerman gave this much thought or may have been asked this question in a context that would put computer keyboarding as a physically non stressful job overall but did not consider the extreme repetition, dexterity or fine motor control it takes to be a professional keyboardist 40-70 hours a week. If all I did was sit in front of a computer all day his statement would be true but to do my job requires one hell of a lot of keyboarding. Wish I could get paid to just sit in front of a computer and not have to type anything. Lol.

On another note, I did not see anything about the self dissolving stitches the Hospital used the day of the incident that never dissolved and Dr. Sagerman had to remove later. He said that accounted for the feeling of needles poking me in my arm and I believe he was right as those feelings stopped after he removed them. That was over a year of feeling those stitches aggravate the forearm and was a huge relief when they were found and removed. Removing those helped to pinpoint the Dystonia.

As far as the disability claim. This incident is what triggered me to file for disability but is only the piece of straw that broke the camels back so to speak and not the sole reason I filed. Disability looks at the whole body and not just this incident. In no way do I suggest the chainsaw is the sole reason I may or may not get disability. It is a cumulation of serious injuries I have suffered that will be the determining factor.

That's all I have for now but I'm sure more will come to mind as time goes on.

Oh, one more thing... You said a trial is like a theatrical production. If we had to go to trial how much approximately would you need in cash to make an overwhelmingly convincing production happen. Let me know so I have an idea of the ballpark figure and can

secure the funds needed.

Hans, I'm asking that when you consider either a settlement or a trial that you ask yourself what it would be worth to you if you had to suffered this type of injury that profoundly changed your day to day living and career.

Thanks again,
Paul

Hi Hans,

Just spoke with John Choyinski a lifelong friend of myself and David Gagnon.

First off I should mention that John has suffered a brain injury in his youth and did spend a few months in a coma and rehab but that was over 20 years ago and he's improved dramatically since. If you should talk with him you will notice something's off about him and I thought the heads up would help. One important note and you have to take my word for this till you talk to him and realize it for yourself, it is that John is damn near incapable of lying. Ask him anything and he's so darn honest he gets himself in trouble and doesn't know it. He often says way too much and I'm sure that can't be good except its what makes him so darn believable.

John is willing to talk about certain aspects of what David has said to him in confidence. John is extremely hesitant to go against David in fear of retribution and rejection from his lifelong friend and is on guard in his reactions and words but this can easily be avoided by asking him questions that skirt around the issue rather than directly at it until he already answered it.

John explained to me tonight that Dave is not the same person I knew a decade ago. These days Dave is all about himself and he has become money hungry. John told me I would have known that if I hadn't been off working all those years and been around more often. John went on to say that he knows that David is lying about how it happened because David seems to think he will have to pay more for insurance and he's so cheap he'd rather screw Paul over than paying 1 penny more or have to admit he did something wrong for no money. John went on to say that David was upset at having to do his Moms tree, didn't want to be there because he wasn't getting money for it and that he was trying to go too fast, didn't tell Paul what he was doing and that's how it happened. At this point Johnny showed confusion and said "um well I mean Paul moved his arm.... Ohhh whatever, I don't want to talk about it any more."

Hans, Johnny is David's longest lasting friend. These two were the closest of buddies growing up. Johnny said he would be willing to talk with you not to go against David but because he knows the troubles I have doing normal things that I used to be able to do very well.
If you start by asking Johnny about my grip or things I have trouble with like hand shakes or opening jars, writing or typing he will go on and on, he needs to be guided a bit in the right direction and soon you will have what you should need about his conversations with David.
But be forewarned, Johnny can go off on tangents and most of what you hear won't have anything to do with what he is there for and I'm more than positive he will say things that will ruin his own credibility.

When I asked johnny if it was ok for you to speak with him he said yes but to give you his home number and not his cell because he doesn't answer calls if he doesn't know the number. He also went on to say his parents told him to stay out of the issue between Dave and I because of David. They fear David may do something drastic if he feels Johnny went against him.

Best time to call him at home is either early morning before 9 am or at 6 pm but he is in and out all day.

John Choyinski Jr.
Home. (815) 385-8483

Hans, John has issues and may not make the best witness in my opinion but he is Dave's lifelong friend and if handled correctly can't lie or should I say can't keep one up for very long.

Paul

I don't believe that any reasonable person sitting in a jury is going to give dr talerico's 5 minute evaluation much credit next to dr Sagerman's extensive examinations. I'd bet the farm on Dr. Sagerman over Talerico any day.

And in cases that have complicated medical issues, many times the jury will not be so accommodating and give you the benefit of the doubt. That's why Plaintiff's always have a more difficult time at trial, because they have the burden of proof. And, if the jury doesn't like the evidence they can find against you.

Paul, here are my thoughts regarding your case. There are two issues. The first liability, or whether Mr. Gagnon is liable for your injury. If he is not proven liable, then it does not matter how badly you were hurt since he will not be found responsible for your damages. The second issue is your damages, or to what extent you were injured due to Mr. Gagnon's acts.

Both of these issues are strongly contested in your case.

As to liability, there were no witnesses to the accident. So, whether Mr. Gagnon will be held responsible for your damages is uncertain and a gamble. That is because it is your word against his word. Our argument is that you were simply holding a limb when he caused the chain saw to strike you. His argument is that you moved your arm in the path of the chain saw unexpectedly. If the jury determines that we did not prove your "version" of the accident, then they can find against you and in favor of Mr. Gagnon at trial.

As to damages, the issue is complicated. That is because your treating physicians do not all agree on exactly what injury you suffered or whether your had a fully recovery or not.

Dr. Talerico at MidAmerica Hand and Shoulder, saw you twice. The first time was in December, six months after your injury. He was not supportive of your claim in most respects. He didn't really feel there was anything wrong with you - as to the forearm. He said that you complained mostly of pain radiating down the forearm from the laceration site with numbness and tingling. On exam he noted no tenderness and it was mostly a normal presentation. Strength was good. He did not see any nerve problem. He prescribed physical therapy due to a muscular sort of symptomology - not nerve related. Apparently you did only 2 sessions of therapy and returned January, 2012. No new complaints at the time. The EMG was normal. He did not believe you were disabled. He continued you on therapy. He saw no evidence of nerve problems. The only symptoms were subjective - not represented by any abnormal exam finding.

Dr. Sagerman has also been deposed. I will summarize his testimony for your soon. His was more favorable, but still limited in what he related to the chain saw accident. Apparently he does not believe you presently have any symptoms relatable to the chain saw injury.

Think about these issues. I will provide you Dr. Sagerman's summary soon.

Morning Hans,
Wanted to touch base this morning because the call from you about something not being medically linked has been on my mind.
I'm not sure what was said during that deposition with the drs that prompted the call but I have been thinking about what it could be. Most likely it was the right elbow procedure.
During my deposition I remember being asked if the two were linked and I answered yes. Let me explain my answer to you.
If the chainsaw had not gone through my arm then the procedure on my elbow wouldn't have happened. That procedure was exploratory to find what was bothering the arm from the chainsaw. Upon opening up the arm they did find some compressions which from my understanding was nothing unusual for a male of my age and very well may or may not have happened during my retreat from the

chainsaw when I ended up half way across the yard on the ground. Incidental finding or not it still would not have been found if I hadn't had the chainsaw incident. So as I see it they are linked good or bad and cannot be separated. The exploratory procedure was to find and possibly fix issues relating to the chainsaw incident. They also removed a ton of scar tissue in the forearm on the same day during the same exploratory procedure that was a direct result of the chainsaw.
Hope this helps explain things better.
Let me know,
Thanks,
Paul

Lol, ok.

Hans, if your sick and this dr you don't know says your not, do you go see someone else or do you take his word for it and continue to suffer?
Ask dr Talerico that question.

This dr Talerico guy has no intimate knowledge of my injuries other than 2 very short visits that I walked out of feeling like I was waisting my time because there was no real examination.

I don't even agree with paying for his services.

I have been seeing Dr. Levin and Dr. Sagerman for a couple of years now. And I get to choose who is the best dr for me. Not David or his insurance.

His argument is that you moved your arm in the path of the chain saw unexpectedly. If the jury determines that we did not prove your "version" of the accident, then they can find against you and in favor of Mr. Gagnon at trial.

As to damages, the issue is complicated. That is because your treating physicians do not all agree on exactly what injury you suffered or whether your had a fully recovery or not.

Dr. Talerico at MidAmerica Hand and Shoulder, saw you twice. The first time was in December, six months after your injury. He was not supportive of your claim in most respects. He didn't really feel there was anything wrong with you - as to the forearm. He said that you complained mostly of pain radiating down the forearm from the laceration site with numbness and tingling. On exam he noted no tenderness and it was mostly a normal presentation. Strength was good. He did not see any nerve problem. He prescribed physical therapy due to a muscular sort of symptomology - not nerve related. Apparently you did only 2 sessions of therapy and returned January, 2012. No new complaints at the time. The EMG was normal. He did not believe you were disabled. He continued you on therapy. He saw no evidence of nerve problems. Medical link to what?
Weakness, spasms, loss of feeling, etc...
What has to be linked and why?

Hi Hans and Janet,

Today I met with Dr. Kathryn Kujawa at Alexian brothers hospital. She diagnosed my right arm as task specific Focal Dystonia and said it can be treated on a temporary basis with Botox injections every 3 months or so. My next appointment is for November 19th at 9:45 am to start the treatments. She said it is definitely caused from the trauma in my right arm. I have included her offices contact info below.
If you need anything else please let me know.

Hi Hans,

Thanks for the reminder on the bills. Should have new printouts of the totals by next week.

I have scheduled an appointment with Dr.Kathleen Kujawa on November 14th, 2:30pm at alexian brothers hospital for an evaluation/consultation to see if is in fact Dystonia affecting the severed muscles and branch nerves in my right arm.

Dr. Sagerman told me to finish physical therapy at home for the left arm and left scheduling another visit up to me if I should need it.

Thanks,
Paul

Morning Hans,

I started physical therapy after the cortisone shot at Fox Lake Dynamic Hand Therapy yesterday.

They notified me that I owe something around $25,000.00 and that they just had to close one of their clinics and that they were not willing to take on more at this time. I paid out of pocket for yesterday's session.

Hi Hans and Janet,

Sorry for sending you both the same letter but you both need the info.

I saw Dr. Sagerman today. He gave me an injection of cortisone and prescribed 6 more weeks of physical therapy.

Ok,
Thanks

One more thing, I am calling dr Sagerman this morning to set up an appointment. He offered cortisone shots and I had decided to give it more time to heal. Enough Time has passed and it has improved but still catches me off guard and is quite acute so I'm going to go ahead with the shots. I'll let you know.

Thanks,
Paul

Hi Hans,
Missed your call this morning. I'm here all day so feel free to call when you have time.

I'd suppose they want to know what I did for Mike Thomas.

Here is a brief summary,
I placed an ad to sell off some printing equipment and Mike Thomas came out to see if he wanted anything. This was the first time I met him.
In the process he mentioned that he was setting up a print shop in Richmond IL and asked if we (Mike McArtor and myself) could help. We did help him on and off over the next few months. Mike McArtor still helps out to this day and I do offer them advise when asked. My brother Scott Dulberg and Tom Kost also help Mike Thomas from time to time.

Mike Thomas wanted me to work for him on a regular basis. He offered many different proposals from direct employment, sub contracting, part time, etc... I had to decline after a few months of working with him on and off because I knew I couldn't do that type of work anymore on a regular basis. My arms and hands just can't be relied on.

Working with Mike Thomas taught me what I was and was not capable of doing. I did try to do many things for Mike Thomas that probably was things that I now know I shouldn't do anymore. I had to try, how would I know what i could do if I didn't.

It was a good test to see if I could go back to work on a regular basis. I did try many different types of work for Mike Thomas. It was everything from graphic design to doing little fix it up jobs around his building and even his house in Twin Lakes WI. I introduced my brothers, Scott & Tom, to Mike Thomas to recruit their help with what needed to be done because I wasn't able to do all the things myself anymore. All three, Tom, Mike McArtor and Scott filled in and acted as my hands to get things done.

I did receive compensation in the form of cash for my time. It wasn't much perhaps a few thousand in total but I'm not exactly sure what the exact total was. All the money went to my mother to help out with the bills she was paying on my behalf.

Other than that there isn't anything else I can think of that the defense counsel could hope to get from him.

Feel free to call or I could come in to discuss.

Thanks again,
Paul

Hans,

Mike is what/who your looking for. He seen and heard David's rant and threat about a lawsuit and any possible monies paid out. I expect him to be off work around 6 pm and I'm sure once he gets your message he will call you.
I'm not sure Mike has even thought about that event since it happened but he doesn't forget things too easily. I'm sure whatever he remembers he would be happy to testify to.

In the first place, why would I hold up the very end of a branch with my damaged left arm? And if I did do it as Dave Gagnon said, I would have had my back to him. What he said makes no sense.

In the second place, if you have ever been cut by a chain saw, the last thing on anyone's mind would be making a profit. I was in so much pain that I could not have talked seriously about anything other than stopping the bleeding and getting to a hospital fast.

David did not come into the hospital with me. He dropped me at the door and was parking the car. He was brought into the ER and questioned by the staff that was there. You can check with whoever was working the ER that day. It's not really my word against David's but David's word against those that were working in the ER.

There is one witness as to David talking about making money off of this accident. Mike Mcartor heard David say this to me in David's garage the day I went up to David's house to get his home owner's insurance policy number per your request. Mike Mcartor is a friend that grew up with David and myself and is currently living at my residence.

Will sign and drop off the medical release forms you requested.

Paul

In response to your letter about Gagnon's deposition:

In the first place, why would I hold up the very end of a branch with my damaged left arm? And if I did do it as Dave Gagnon said, I would have had my back to him. What he said makes no sense.

In the second place, if you have ever been cut by a chain saw, the last thing on anyone's mind would be making a profit. I was in so much pain that I could not have talked seriously about anything other than stopping the bleeding and getting to a hospital fast.

David did not come into the hospital with me. He dropped me at the door and was parking the car. He was brought into the ER and questioned by the staff that was there. You can check with whoever was working the ER that day. It's not really my word against David's but David's word against those that were working in the ER.

There is one witness as to David talking about making money off of this accident. Mike Mcartor heard David say this to me in David's garage the day I went up to David's house to get his home owner's insurance policy number per your request.
Mike Mcartor is a friend that grew up with David and myself and is currently living at my residence.

Will sign and drop off the medical release forms you requested.

David's description of the accident made sense to him and he described it in a way that "could have"occurred even though different from your description. I think the only way to prove him wrong is to show him to be incredible in other ways...for instance his assertion that you told him "you could be rich" in front of your room mate. If your room mate will cooperate and say that David is wrong - that you did not say this, this could be a very good way to show him to be wrong. Would your room mate agree to a deposition in the case? if so, have him call me...thanks Paul....

Do NOT speculate about anything. If you do not know something, say so - Don't guess!

The more you talk, the more information you are giving to be used later against you - it doesn't matter if you think you are saying things to help your case since the more information you give the more the attorney will ask questions and delve into matters that may not otherwise come up - ultimately obtaining information that could be damaging to your case.

Your job at the deposition is only to answer the questions asked of you

Your purpose at the deposition is NOT to explain, convince, argue or otherwise defend your case. If the attorney questioning you does not seem to understand something about your case, TOO BAD. Unless asked a specific question on a matter, you are not to explain or clarify things voluntarily.

The attorney's job is to disbelieve you. Don't think you will convince him/her to change his mind. Don't worry about this.

EXAMPLES

Q: How did you accident happen?

BAD RESPONSE: I was walking out of the store and I wanted to get to the car so I walked down the sidewalk and didn't see anyting until after I fell.

GOOD RESPONSE: I was walking down the sidewalk.

REASONING: You were not asked what you were intending to do or what you were thinking.

QUESTION: Did you miss any work due to the accident?

BAD RESPONSE: Yes, I did not go back to work for 2 weeks and lost about $800.

GOOD RESPONSE: Yes.

REASONING: You were not asked how long you missed from work or how much income you lost. Therefore, don't volunteer this info.

QUESTION: **Were you injured in the accident?**

BAD RESPONSE: Yes, I hurt my head, back and neck.

GOOD RESPONSE: Yes

Get the idea? If not, we can discuss any questions you have. Please call.

Thanks Paul

Hi Hans,
Just wanted to say its a good thing we rescheduled the deposition because I'm simply not doing well today at all after having the hemroids removed yesterday. I wouldn't have been able to make it in today at all and from what the surgeon said, I wont be able to walk or sit very well for 3 to 5 days. Let me know when you want to do another practice session but its probably best to do anytime after this weekend.

Thanks for all your help,

Hi Janet,
I met with Dr. Sagerman (hand and arm surgeon) for a follow up on Monday for both my right and left arms. He scheduled another follow up in March and prescribed more physical therapy.

I mentioned a new issue I had to Dr. Sagerman, (hemroids) that I first noticed on Saturday and asked him where I should go. He sent me to Dr. Rosenova an internist. Dr. Rosenovas office had me come in the same day. Dr. Rosenova took one look and sent me to Dr. Daniel Conway a general surgeon to have it removed ASAP.

Dr. Conway took one look and surgically removed the hemroid right there on the spot. I have a follow up with Dr. Conway on February 13th.

I was told by the dr's that hemroids can happen at any age however it usually doesn't happen till after 50 years of age. One of the things that may cause it earlier that seemed to hit home with me as to the cause is stress. With everything I've been through stress makes the most sense to me. Hemroids hurt bad and it's going to take me a few days to recuperate. It hurts to walk, sit, stand, etc...

On another note, I missed my appointment at rosecrance earlier this month because I had a bad neck day and didn't get out of bed all day. I rescheduled with them and will be meeting with them again in February.

I have those forms from SSDI and am going to try and fill them out today and get them to you but i cant promise that i will get it done. The pain meds are simply kicking my butt. With everything that happened this week (hemroid issue) I don't know if I am over the 10 day demand they gave me but I am doing my best. I need to go lay down.

Thanks for everything,
Paul

Hi Hans,

I went to see Dr. Sagerman this morning for a follow up from the surgery on my right arm almost 6 months ago. He wants to see me again in 6 weeks for another follow up.

My Mom, Barb, went with me this morning to make sure I talked to him about my left arm. It has been hurting bad for 3 to 4 weeks now and she wanted me to get his advice. Dr. Sagerman had an X-ray done and said it looks good but I have what is called lateral epicondylitis or tennis elbow in my left elbow. He said it was probably just from over use due to me not using my right arm and could be treated. He said I need therapy for the left arm and prescribed 6 weeks of therapy 2 times a week and would follow up with it at the same time as my next appointment for my right arm.

I went to Fox Lake dynamic hand therapy with the prescription to schedule the appointments. They set the appointment for this Friday at 1:30 pm.

When I got home Dynamic Hand Therapy called. They said they cannot see me because this is not part of the litigation pending from my right arm unless the Dr. says it is. And because I have no insurance it would cost me $70.00 a visit.

Which there is no way I can afford. I have no income.

Any advice?

Thanks,
Paul

Hi Hans,

I looked into the MedChex question.

When I called Open Advanced MRI of Round Lake to get the amount owed I was referred to their corporate office. The corporate office had told me my balance was $0.00. They looked into who paid the bill and mailed me a breakdown of everything they charged, payments made and any adjustments. The corporate office at OPEN ADVANCED MRI did not know who MedChex was. They said it looked like an insurance payment was what paid my bill. Below is a breakdown of the billing from the corporate office at OPEN ADVANCED MRI.

Original charges from open advanced MRI of round lake.

$1510.00 for the MRI on 02/03/2012
$75.00 for the injection on 02/03/2012

$1585.00 total charges from open advanced MRI of round lake on 02/03/2012

MedChex paid

$800.00 for the MRI on 02/23/2012
$0.00 for the injection on 02/23/2012

An adjustment was made to the original charges from open advanced MRI in the amounts of

$710.00 for the MRI on 02/23/2012
$75.00 for the injection on 02/23/2012

My balance due reads $0.00

After a bit of searching the web I came across the contact info for MedChex, gave them a call and asked how they came to pay off my bill with OPEN ADVANCED MRI and what their terms were for paying off the bill.

MedChex claimed I owe them $3,390.00 for the MRI as of 08/22/2012

The customer Representitives supervisor I spoke with at medchex was named Tish.
Telephone number: (866) 959-1100
Extension: 109

Tish would not provide me with the terms or how MedChex came to negotiate and pay off my bill with OPEN ADVANCED MRI. She would simply repeat that they are a service to help those with no insurance and will be receiving a settlement for injuries. She told me that i did not need to worry about the increased amount from the original billing from OPEN ADVANCED MRI because a settlement would be paying for it. She demanded that I fax her a copy of the billing breakdown from Open Advanced MRI at 888-317-0260. She said that I was never supposed to see what the original billing was and that it is just wrong that I have it and that she would not discuss the terms or how MedChex became involved till I sent this copy to her office. That ended the conversation.

Hans, the only person/firm I ever authorized to handle any and all of my negotiations for medical billing is you and your firm. I will

bring in the breakdown from OPEN ADVANCED MRI to your office on Monday along with a few other bills I have collected.

Subject: **Medical update**

Hi Hans,

Had another Dr's appointment with Dr. Sagerman at hand surgery associates. He read me the findings from the surgery. He said the chainsaw did not cut the ulnar nerve but the nerve was compressed in the ulnar groove at the elbow. Probably from scar tissue growing in the forearm and pulling the nerve tight in the ulnar groove. The scar tissue had apparently grown and attached my muscles to the skin and each other. Dr Sagerman said they managed to separate the muscles and skin.

I have another appointment with Dr.Sagerman in a month and am doing physical therapy.

I will send a few pictures of what the arm looks like 1 month after the surgery as soon as I can get someone to use the camera for me today.

Thanks,
Paul

He said that getting in physical therapy quickly and with a lot of luck it should help to keep it all from bonding together again. transposition because he said it seemed like it would be stable enough still in the ulnar grove.

Hope that was a good explanation of what happened. I'm not all with it just yet. I should be feeling better in a few days.

Hi Hans,

I couldn't help but to laugh at that. The reason I left Dr. Talerico and went to Dr. Sagerman was because he couldn't listen worth a darn and went on a 20 minute rant about prescribing pain medication to me when I never received any prescriptions from him nor did I ever ask him for any pain medication or any other prescription for that matter. Each time I went there it was as if he confused me with someone else. On my last visit with him he couldn't even remember why I was even there and went on another rant about insurance companies. He never even asked or looked at the X-rays from the hospital and I had to ask him numerous times just to get him to read the physical therapy reports. Honestly, he scarred the heck out of me and we were at odds, so I went to see someone else whom I had more confidence in (Dr. Sagerman). I'm sure Dr. Talerico is a good Dr., just one that I felt was probably over worked, was getting confused between his patients and couldn't give me the attention I needed. In retrospect, it fits that his notes are messed up and confirms my feeling about him and why I went to another Dr.

I just called the libertyville office for MidAmerica Hand and Shoulder Clinic. Talked with Gabby. She told me she could not change the record but would make an addendum to the record to clarify that I was not the one operating the chainsaw. She apologized for the confusion and said that it was lost between the Dr.'s notes and the person who transcribes the records. She is going to call your office and fax over the addendum.

Please let me know if you get the addendum and if it is ok

Thanks,
Paul

Hi Hans,

Wednesday I met with Dr. Sagerman and I signed the papers for surgery on my right arm. They are going to do an ulnar nerve decompression and transposition, and a neurolysis in the forearm. They are also going to explore and repair any other damage they find with the muscles, tendons and remove scar tissue. I am waiting on a call to find out when and where the surgery will be. They said it should be in the next 4 weeks.

I also need to get some sort of medical release signed by my primary care physician for the surgery so I met with Dr. Sek yesterday and he gave me a checkup and signed the forms.

On another note, when we last met you asked if any of the Dr.'s had been paid yet. I answered no but that wasn't true. I have paid Dr. Sek in full for each visit and Dr. Levin has been partially paid. I also had to just sign a form for Dr. Sangerman allowing them to charge my credit card $40 a month till my bill was paid in full. I asked if they would do the surgery on a lean against a settlement and gave them your name and number to contact you. They said they would but still required I give them permission to charge my credit card.

If you need anything else please let me know.

Thanks for everything,
Paul

Hi Hans,

Just set up an appointment with Sheila for 10:00 AM tomorrow to meet with you.

Just after I set up that appointment with your office my physical therapist called and discharged me until I see the Dr. Said my evaluation was bad and they sent the report to Dr.Sangermans office and for me to call them. After calling the Dr.'s office they bumped up my appointment to Wednesday of this week to discuss surgery.

See you in the morning,
Paul

Hi Hans,

I'm curious if David Gagnons home owners insurance policy number checked out?

Also, from what I understand this surgery that has been suggested by two different arm specialists, the neurologist and my primary physician is going to run in the neighborhood of $60,000.00. I want to be sure that it will be covered under the settlement before I decide to do it.
It is a direct result from the chainsaw cut and not anything else. Will it be covered or am I on my own to pay for it?

I am extremely nervous about the cost and getting stuck in bankruptcy and losing my house if it isn't covered.

Thanks,
Paul

Hi Hans and Janet,

I just got back from an appointment with Dr. Sam Biafora, another hand, wrist, elbow & shoulder specialist at hand surgery associates. He did what seemed to be a very thorough evaluation. He dug around pretty deep in my arm and did many different tests on my hand, arm and elbow. He recommended doing surgery to get the scar tissue out of the affected nerve and surrounding area. He said not to have any hope of restoring strength, feeling or reversing the paralyzed muscle that pulls my pinky finger in. But he said that going in and removing the scar tissue from the area will bring relief to the nerve and should stop the pains I get. He said that it will leave a long scar from the back of my elbow to the wrist and they will need to move the ulnar nerve to the inside of the elbow and that it will take approximately 3 months to recuperate. I mentioned the new medication I just started taking that was supposed to help fix the signals from the nerve. He said that all that will do is mask the symptoms for a while and that the only way to actually fix it is to go in and remove the scar tissue and see if any of the cut fibers can be grafted back together. He said that grafting the fibers probably won't work since its been almost a year since they were cut but removing the scar tissue should release the pain and should make a huge difference. He was ready to set up the surgery and I told him I needed a some time to talk with my mom and think about it. He set up another appointment for a month from now so I have time to think it over and said to call Dr. Sagerman if I should decide sooner.

Hi Hans and Janet,

Forgive me for combining this e-mail to both of you but both of you need the same information.

Met with Dr. Levin today at Associated Neurology. She prescribed Neurontin / Gabapentin 300 MG. I am supposed to take it in the evening for 1 week then move to 2 times daily. Then call her in 2 weeks to see how it's going. She said that it is supposed to help correct the signals from the misfiring nerve in my right arm which is causing the pain when I use my hand. And that the dosage may change depending on how and if it's working. This treatment was suggested by Dr. Sagerman to help try and avoid surgery. If it works I think this is a long term treatment because the prescription lasts for a year and the pharmacist said it goes hand in hand with the other medications I'm taking for long term pain management treatment.

I see Dr. Sagerman and his partner tomorrow for an evaluation at Hand Surgery Associates in Vernon Hills. I will let you know what happens.

Thanks to both of you,
Paul

M. Margaret Bradshaw,

I received the results from the MRI done on my right arm and Dr. Levin said the MRI came up negative. The physical therapist had already told me that this type of damage seldom shows up on an MRI. Dr. Levin said it was all muscle and tendon damage. Dr. Levin and the physical therapist both suggested I see an hand and arm orthopedic specialist.

Today my GP, Dr. Sek, wants me to get an MRI done on my neck. This would not be covered in the lien against the claim for my right arm. So I am at a loss as to how to go about getting this done. While talking to you, I heard you mention Northwestern University. How do I go about applying for this? I would appreciate any help or assistance you may have that will allow me to get this done.

I applied for help at DHS in Woodstock. They received a copy of all my medical records and approved a two month SNAP benefit. Not sure if this will be extended or if they will do any further follow-up. This is a new process for me and I'm not sure how all this works. They said they sent my application for Medicaid to the state and I guess I am waiting for a response.

Thank you for any help you can provide.

Paul

Yes, this is the correct application form. You could go ahead and complete the application yourself and send it in now. Margaret should be sending you some information soon on your claim. We have a process that we have to complete to open new files and we are still working on yours. Once you receive anything, please give me a call if you have any questions or concerns.

Thank you.

Hi Janet/Margret,

At our appointment you mentioned you could perhaps help me get medical work done thru Northwestern University. I have e-mailed you twice requesting the forms/applications needed to get this medical help. You have not yet responded. I did try to do a search for these forms and came up with the PDF attached to this e-mail. Is this the correct form? Not sure if you want me to contact NU myself or if you are the one that should be handling this for me. Dr. Sek wants to get another look at my neck because he thinks disc bulging may have increased and that there is further degeneration. There is no way I can afford to get this procedure done and you said you would assist me in getting some sort of medical assistance.

The interview we had is somewhat fleeting as I did get extremely tired. I remember something about family services but can't recall what it was I was supposed to do. Please feel free to call me with anything I should be doing.

Thanks again for all your help,
Paul

Today I received a letter for authorization to disclose information to SSA.
The letter was addressed to your office.
Should I sign and return the letter or have you already taken care of this?

Your case is in prehearing review as of 10/28/16. I don't think it will be much longer but we have to wait for the judge's scheduler to call us. It all depends on the judge's schedule and order of cases to be scheduled. They schedule the older cases first.
We will notify you as soon as we get a date.

It's the original x-ray from 6-28-11. It looks much deeper than I thought.

I have 2 dr's visits on Monday and Tuesday next week. will let you know how they go.

Thank you very much for helping me with all this,

Hans,

I have found in the paperwork you provided me of the notice of discovery for the Dr's depositions.

All of the paperwork clearly states they were to be deposed before Merrill Legal Solutions on various dates.

Upon contacting Merrill Legal Solutions, none of the Dr's depositions were recorded by that company. In fact, Merrill claims that they did not record any depositions in my case whatsoever.

So, what company did the recording of the Dr's depositions you claimed to have attended?

Paul

Subject: Case files

Hi Hans,
Sorry I need to bother you again.
I need your electronic case file for Paul Dulberg along with all paper files you have.
I did get the paper files from Brad Balke however of the plaintiffs/defendants depositions I received sections are missing in each and there are no dr's depositions at all. Brad promises he turned over everything he received from you.
Please collect all relevant information you have for this and notify me when it will be available to be picked up.
Thank you in advance for your help with this matter,
Paul

Thanks for the reply.
I will need a check for the money Hans Mast sent you regarding the McGuires insurance.

Morning Brad,
Any chance I could get the electronic file anytime soon?
In the Paper file I received It appears that it is incomplete, sections of the depositions are missing as well as all the Dr's depositions.
Makes me wonder what else isn't included.
Any chance you have the complete file?
Thanks,
Paul

Hi Brad,
Called your office numerous times today and was told you would return my call.
You failed to call me back each time.

I want a copy of my file including the digital file along with a release of all interest in any fees in the case before 9am court at the McHenry County Courthouse.

If not I'm informing Judge Meyer of your attempts to block this case from moving forward by Holding both the file and the Lean and calling the Illinois State Bar.

Paul

Hans,
If your referring to Brad Balky, he no longer represents me in this case And I am unaware of the deal you two agreed upon.

Here's the deal;
I'm offering cash in return for all leans on this case before Friday or no one gets anything.
Let me know what you want, cash amount or nothing?

Hope your vacation is wonderful,
Paul

Brad,

Before I decide to sign this release I'd like to know exactly why it is you don't think this case is easily winnable?
And please don't spout that it's his word vs mine. That is obvious and is the situation in most cases.
And don't give me the old your only getting 15k no matter what excuse because that's not about this case being winnable or not.

I want some honesty
I deserve that much

Brad,
You could have just stopped with this is the best deal you could get but you didn't.
You pulled a Hans and assaulted me when you threatened to remove yourself from this case if I didn't sign this release before you see the judge.

That's an ultimatum and it's not something I'm going to react to positively.

The way I see it, there is more than just the 2 options in your ultimatum...

A.) I can take this deal, shut up, go away and keep suffering and praying for SSDI

B.) I can refuse to take this deal, lose you as an attorney and have to find new council or simply represent myself and start over with the same 15k on the table and possibly an extra 15k in bankruptcy surplus while still suffering and preying for SSDI.

C.) I can stop this suit all together and lose 15k, in which no one gets anything while I suffer and prey for SSDI

Any which way I go, I'm the one who's getting thrown under the buss and I'm tired of being a victim of others threats.

As of now I'm leaning towards option "C".
As you said, the medical providers have already written off my accounts as loses and that leaves Option "C", me losing 15k, well, it is kind of a cheap way of saying how I feel about the state of my legal representation and their efforts because their afraid they can't prove the defendant put a chainsaw into my arm and that the defendants mother is an elderly woman with whom the jury may sympathize yet didn't see the actual incident, refused to call 911 for help, but did call her insurance followed by a call to the hospital and lied to the staff claiming to be my mother only to disrupt the emergency room treatment not to ask how I was doing but to tell me she was insured. Good for granny, she is insured. Where was her slick phone skills when I needed an ambulance and for god sakes why lie to the hospital staff and call me in the emergency room to tell me the most important thing on her mind... The fact that she was insured. Big deal what did it do to help me?

These people had no concern for anyone's well being other than their own.
They are the type that deserve to get sued. Granny or not.

This may all make a great documentary one day about the state of legal representation and their ethical commitment to following through once they commit themselves to a client. A series false dichotomies of sorts.

It is just a leaning towards option "C" not an actual commitment yet.

I need to sleep on the options for a couple nights

I'll get back to you with my answer just before court starts later this week.

Please remind me, what is the time and date the judge set?

Thanks for everything,
Paul

Morning Brad,

Talked with my mom and it seems to us that if all I'm going to get is 15k even if we max out the defendants policy limit then I should seriously look at taking this to trial and leaving it up to a jury to decide an appropriate amount. 15k might as well be 0 because it doesn't even begin to pay for the damages I've suffered.

I know the risks and that it would cost me almost 20k more in expenses and that the defendant can run off and pay nothing beyond his insurance limits.

Assuming that Allstate may claim the act was criminal and that their not responsible has to be overcome. I'm not a mind reader and can't make any claim as to their clients intentions and their client isn't going to self incriminate himself so I don't see how their claim of something criminal can hold water. Especially since their client hasn't been charged with any crimes associated with his actions on that day.

At the last court date, The judge asked if I was doing this for principles. I answered no.
However, after thinking it through... Seeing as how I'm getting virtually nothing out of this and will eventually lose my home, that I was working most of my life to keep, because SSDI can't cover living here or almost anywhere that I can consider worthy, my principles are evolving and I'm not opposed to going the distance and taking this to trial. I'm willing to make a principled point that people should not get off 'scot free' other than having to find a new insurance company after using a chainsaw on another person causing real life threatening harm with permanent damages.

I'm more than positive that a jury will award more than the insurance limits and that we will not recover anything more than those limits, but one thing is almost for sure, the defendant will most likely have to file bankruptcy to protect his assets and the next person he hurts over the next 7-10 years will have full access to his assets because he won't be able to file bankruptcy again for that period.

Either way, I get virtually nothing so principles are all I have.

On the positive side, If the jury does award an amount more than the insurance limits we get to see if the defendant has any assets that can't be protected and if he does I stand to get the costs of a trial covered a perhaps a smidgen more than 15k, if not, well then I'm in the same boat I am already and nothing changes.

Have you talked with the trustee?

My understanding was its over and that if I felt strongly about paying those I owed I still could but wasn't required to anymore.

If it turns out the suit is still in play for the bankruptcy I wonder why the order from the court I sent you doesn't list the suit as an exemption from the order. On the back of the order it details what the exemptions listed on the front mean and my order didn't have any exemptions listed.

Either way it doesn't matter.
My thoughts are, if we get enough to pay the debts all the better.
Perhaps we can get enough to undo the bankruptcy altogether.
Would be nice not having a bankruptcy on the record.

Thanks again,
Paul

Hi Brad,
My mom came up with a good question.
Doesn't David Gagnons homeowners insurance have different parts to the policy that apply?
Parts for just the medical, parts for just damages, parts for pain and suffering, etc...
I suppose it depends on his actual policy and how it's written but I wanted to understand your take on David's policy

Hi Brad,
Thanks for the heads up.
My understanding was the 15k bankruptcy protection limit included all my assets, not just the proceeds from this settlement. I was also informed that I can receive much more than just 15k if the settlement or trial verdict produced enough to satisfy the creditors.

Just so you know...
I won't settle just for the insurance. It isn't enough.
I don't know what a crippled dominate hand/arm is worth but it would seem to me that it is worth a whole lot more than the insurance limits the defendant has.

Thanks and feel free to call me,
Paul

Morning Brad,

You have power of attorney to endorse the draft on my behalf.

Paul

Ps. Wish I could make Hans choke on this check for his lies/incompetence that lead to such a small amount!

Hi Brad,

As we discussed, I was to receive via certified US Mail depositions and communications between Hans Mast and myself from Saul Ferris an attorney in Gurnee, IL. Saul Ferris number is (847) 263-7770

I called Saul Ferris office last week and was assured they were sent. I was told to give it another week.

I called Saul Ferris office again today to find out they were mailed to and signed for at 3416 W. Elm St. McHenry, IL. by someone named Anne Oupl on March 7th. This is Hans Mast office.

I called Hans office and apparently no one by that name works there and no one knows anything about receiving the certified mail.

I'm at a loss as to how these documents were sent to the wrong place and am a bit furious because it has the memo about the pre-trial settlement you wanted to see.

Please advise.

Thank you in advance for your help with this matter,
Paul

Hans,

May I remind you, Less than 2 weeks ago you said in an email you had all the records ready for my new attorney. I can provide a copy of that email if you can't even remember two weeks ago or can't figure out how to go back that far in your email account.

Now that you removed yourself, you claim that you cannot turn over the records until your paid.

The lean is your only guarantee. It's the same guarantee all the medical professionals have against this case.

If you are unwilling then This has all the makings of what society calls a shyster lawyer.

Please Turn over all records pertaining to this case from start to finish for you may not speak with my new council.

I most likely already have to pay double attorney fees for this case thanks to you.

Please don't cost me any more money or I may just let this case expire and you get nothing.

Is that what you want?

I'm giving you the opportunity to remedy this coarse of action you have chosen.

Do you chose to be professional and do the job your capable of or do you chose to remove yourself for some made up reason. Our emails alone show there is no breakdown in communication. We are still communicating. This email proves that.

So, unless you can explain your action to remove yourself from this case for some excusable reason I see no reason why you feel your entitled to being able to get excused from it at all.

I put you to task to do as you agreed to and represent me to whatever ends this case comes to. Will you be professional and finish what you started?

Damn these emails hurt to type...

Wish you had it in you to go after the bad guy who did this and not your innocent client.

Find an attorney and I will talk to them about the lien.

Hans,

Your cornering of me and my brother in your office, bullying me into signing off on The McGuires policy citing cases that have nothing to do with the agency clause in the homeowners policy, which clearly makes her policy accountable.
You sir are the one whom told me that I would never see a dime from either case if I didn't sign that piece of paper before leaving your office that day. You wouldn't even let me sleep on it as I had asked. You said you needed the $5,000 settlement with the McGuire's insurance to help fund your costs for the case with David Gagnon.

Then when the physical therapists tried to demand payment in full you told me and my mother that medical leans against lawsuits often expire before the case is resolved saying yes the medical providers can proceed in collecting funds from my assets. Meaning my home. Forcing me into bankruptcy. Then, after filing for bankruptcy, denying you ever said that to both me and mother and going on to say to us that filing for bankruptcy protection had ruined the case.

All that followed up by getting a brief to review from you on the David Gagnon case that was of such a poor understanding of the facts are what lost any hope of respect I had.

I am and have been trying to get you to be professional and earn that respect back at every step.

If you had not taken advantage of my ignorance you would not be receiving this letter nor trying to squirm your way out of representing me today.

As far as your costs and in light of your poor performance to date, it throws into question all of the work you have done on this case. Even the depositions you sat in on are in question. Do you actually think anyone in their right mind wouldn't see it that way.

You may argue strategy as a defense for incompetence but since you sat in on the medical depositions and don't even know what medications I was and wasn't prescribed after almost 3-1/2 years on this case I highly doubt anyone will see your defense as viable.

Exactly, What part of being harmed by both the McGuires and Gagnon through no fault of my own is 9 out of 10 times a losing case?

Exactly what part of you manipulating me into a settlement for only $5000 was seeing to my best interests?

Exactly how is lying in a briefing you were prepared to put before a judge is in my best interests?

Exactly how is giving you chance after chance to correct yourself not giving you the respect you think you deserve from me?

I can keep going...
I have witnesses to all of this. It's not just your word vs mine.

Bottom line is if you want out simply because you feel I have no respect for you then all of your fees are subject and any lean you have is subject.

The only breakdown was a very poorly written brief you asked me to look over in which the only truthful substance in it was the names and dates. Oh and the fact that you did manage to put the chainsaw in the correct persons hands.

I hope to be able to review your revised copy of this brief again soon.

Respect for your thoughts does not constitute a breakdown in communications.

Respect is earned through truth, hard work and results.

You should have the billing for Dr. Kujawa ending on my last visit.

Today I had another appointment with her. She set me up to see her again in 6 months on September 15th and it will be every 6 months from this point on. This visit is not included in the Billing you received.

Technically it's one third of the recovery but obviously that's not going to work because your attorney needs to be paid for something too. The whole calculation is done at the end of the case. There's simply no way to do it until the case is settled and we know what the amount is.

Technically it's one third of the recovery but obviously that's not going to work because your attorney needs to be paid for something too. The whole calculation is done at the end of the case. There's simply no way to do it until the case is settled and we know what the amount is.

Hans,

If I have to get a new attorney in the 11th hour of this, The damage done to my case far outweighs your lean.

If you sign off the lean I'll see to it your paid for your real costs.

Hans,
I'm just a laymen but my eyes are opening, As you should very well know, I can't have a new attorney until we are dissolved. So, your suggestions to me for over a year to get a new attorney is in error, one of many to my dismay.
I no longer feel you or your firm are seeing to my best interests and most likely haven't been since I signed on.
It's a shame because you come across to me as a Jon Stewart type and I honestly thought you would be good.

Hans,
I'm not asking to see you.
I'm asking for a copy of the policy numbers and an accounting of all the fees your firm feels it's entitled to.
Please have someone at the office print them out and have them available for pickup.
Thanks in advance again,

All that needs to be done is deposing experts and going to trial. But don't get me wrong I think we can work out something very reasonable. Typically any type of lien arrangement is done when the case is concluded.

To be honest, you took this case knowing it was my word vs. his.
Now you back out because the value of the case isn't worth your time?
You got some nerve and your earning the reputation of a shady lawyer

This is as total as it gets for us in the working class short of being paralyzed or dead.

I need someone who is on my side, top of their game and will see to it that I'm comfortable after all this is over.

What I feel is an attempt to settle for far less than this is remotely worth just to get me off the books.

I know you don't believe I'm hurt...
I'm not interested in belief, I think the facts speak volumes above belief

I question who's side your on?
Your comments about believing David's deposition, etc...

Hans, I have no degrees but I was better at my career in printing and graphic design than anyone I ever worked with who did. If I need character references from past clients, employers, coworkers, teachers, etc... I have an army of people who know I'm one of the most genuine, honest, dedicated hard working persons who takes responsibility for my actions. David on the other hand isn't a stand up guy at all. He couldn't even take responsibility for his actions not to mention his attempts at collecting from this, which I believe constitutes insurance fraud.

Oh and I'm contacting the McHenry county states atty... I know too much time has passed since the threats but those threats were for a future time once all this was settled. If he attempts to collect or make good on his threats and if I end up back in the hospital I want everyone to know who to go get. I'm done playing nice with this guy and I can only hope I have an attorney who feels the same.

I have to ask since you think I don't understand, what is it your trying to do?

Paul

important. This is just a memo to introduce the judge to the case. If there are different ways you want to say things I'm happy to do that. It's going to serve it's purpose perfectly.

One more ?
Why isn't David Gagnon being charged for either the chainsaw incident or his coercion and intimidation to try and get money out of this in a criminal court?

Hans,

Would giving David Gagnon and his insurance Allstate the chance to do an independent medical examination of my impaired arm help any?

This could diffuse any idea that I'm exaggerating or that they would even want to try to claim that it's not as bad as I make it out to be.

Who knows, perhaps the 7th dr to evaluate the injury knows something that the others didn't and they could actually improve my condition

I have to wonder...

Is it the fact that David Gagnon doesn't have a bigger insurance policy?

Or perhaps that I didn't lose my arm?

What is it that isn't good enough for your firm that they would actually drop a client they chose to represent?

I'm betting in the end it's all about the amount of money your firm can make off of my injuries because I've done nothing to exaggerate or hide anything.

Have a merry Xmas, now I'm late to see a dr and my arm muscles are in spasm from trying to type this waisted email as fast as I can.

Oh and that stupid statement I heard you say in the past that part of my injuries were to distal from the cut...

I dare you to Try fending off a chainsaw that's violently cutting into you unexpectedly and survive without any other issue other than where the chainsaw cut you.

And if during that event you should twist an ankle, hit your head, another part of the body or anything else from trying to save yourself... Remember it's too distal from the wound so you lose...

That is absolutely retarded to think that my elbow was too distal from the cut... Think about what it takes to fend off an aggressive chainsaw cutting into you and then tell me if any other smaller, at first unnoticed injury is too distal to be real?

I'm tired of this crap

Talk with you after Monday,

On another note,

David Gagnon already received more than any lawsuit will bring me...
If this was someone I didn't know...
I'd find out how to put the guy in prison for as many years as I could.

No one should be allowed to use a chainsaw like he did and get away with it!

The gift I gave David by providing him with the benefit of the doubt has turned out priceless for him...

What I received is a life sentence even if I win some lawsuit...
What can I do with the money, pay someone else to do the things I would have been able to do myself if this didn't happen?
What part of life makes that appealing?
And how long will that last?

I went from being a doer with some potential to being a watcher and beggar. There is nothing that can change that...

Neither David nor his insurance policy can fix any of this.

Your position of fear in this case is appalling.

Oops, hit send accidentally. . Another issue from a shaky muscle in my forearm...

Hans,

What and where does "you weren't hurt that bad" mean or come from?

It was a deep laceration from a chainsaw and I'm only hurt as bad as it is and that's it.
I obviously have long term issues with/from the injury so no exaggeration is needed on my part.

Whether or not it's considered disabling is the only real question and that is being decided for us at the federal level with other dr's and vocational experts that I didn't pick.

All that I hope for is that I'm treated by those like you as you would want to be treated.

Thanks for the honesty and I will get back with you after Monday.

Hi Hans,

Just got a call from associated neurology because of the bankruptcy notice they received.

Tried to explain that the leans on the lawsuit expired after 3 years and I really don't have any choice.

They said they never heard of such a thing and are looking into the lean issue and will get back to me.

On another note, Baudin's firm must not be interested because they never called me.

Do I need to find a new firm or what?

Hans,
Your risk...

I just had to file bankruptcy because of that incident 3-1/2 years ago. I could no longer make all the payments to my creditors. I also have a disability suit because of it.

I don't care about a settlement unless it's enough to drag David Gagnon through bankruptcy for his idiotic use of a chainsaw and made up story under oath. Gagnon sure showed his true colors when he was deposed, he just isn't a standup guy at all.

Either way it goes, (settlement or trial) I'm not going to make anything near what I've already lost or what my future losses are going to be so it just doesn't matter.

The only thing that would be remotely satisfying is knowing that David Gagnon had to go through a settlement or trial and lose, then find himself actually having to face bankruptcy.

I can only hope he has enough assets that it actually hurts.

I just had to file bankruptcy because of that incident 3-1/2 years ago. I could no longer make all the payments to my creditors. I also have a disability suit because of it.

I don't care about a settlement unless it's enough to drag David Gagnon through bankruptcy for his idiotic use of a chainsaw and made up story under oath. Gagnon sure showed his true colors when he was deposed, he just isn't a standup guy at all.

Either way it goes, (settlement or trial) I'm not going to make anything near what I've already lost or what my future losses are going to be so it just doesn't matter.

The only thing that would be remotely satisfying is knowing that David Gagnon had to go through a settlement or trial and lose, then find himself actually having to face bankruptcy.

I can only hope he has enough assets that it actually hurts.

Hi Hans,
Just got a call from associated neurology because of the bankruptcy notice they received.
Tried to explain that the leans on the lawsuit expired after 3 years and I really don't have any choice.
They said they never heard of such a thing and are looking into the lean issue and will get back to me.
On another note, Baudin's firm must not be interested because they never called me.
Do I need to find a new firm or what?
Thanks,
Paul

Hi Hans,

I heard from Meredith (my lawyer for SSDI) about when I should expect a response from SSDI.
Apparently the SSDI courts are understaffed and it may take up to a year or a little longer from the date the appeal was filed.

I'm unsure of the exact date it was filed but the last hearing was in April or May and I believe the appeal was filed just after that so it may be a while before I hear anything and then it all depends if it's dismissed and I actually have to sue or its remanded back to the lower court for reconsideration.
Either route it's going to be many months before I know anything more.

At my last visit with Dr. Kujawa she said she is filing my injury as permanent but I'm not sure if that is admissible to the appeal at this point. Meredith is working on that.

On another note, I called Randal Baudin's office again and am waiting to hear back again.

Thanks for everything,
Paul

Hi Hans,

Coleen at dynamic hand therapy called with a proposal.
She is going to write up an agreement.
It will be $25.00 per month till the SSDI judgement is finished.
After that it will increase to $100 per month if the SSDI judgement is favorable or stay at $25 per month if it isn't.
Payments end once your case against David Gagnon is settled and they receive their share of the settlement.

This keeps it out of collections.

Does this sound fair?

Also, I spoke with Rene at dynamic hand therapy and tried to give her my insurance info. she informed me that they only take Medicaid once and a while and probably won't in my case. She is having someone named Colleen call me tomorrow about it.
Can medical providers actually deny my insurance after they already treated me knowing before hand that with my injury I was most likely going to end up disabled and on the states medical insurance?
Also, does it help to give you or your secretary a copy of the Medicaid card?
Thanks,
Paul

Just so you know...

Last week when Coleen from dynamic hand called to inform me that the lean against the suit expired, I offered to make payments and that was also refused.

So technically this is the second time they refused compensation.

I can send a List of Providers to you. We don't need the Medicaid info unless they end up paying your bills.

Hans,

Apparently Dynamic Hand Therapy has a lean that expired.
It's for $23,900.00 and they said they will give me a 30% discount if I pay within the next few days or they could take me to trial over it.

Colleen with their corporate office said she contacted you on Aug. 6th about this.

Her number is 815-986-1564

Please advise,
Paul

Hans,

Last evening I was in the hospital with the most severe migraine I've ever had.

This morning I filed for bankruptcy with David Stretch.

This afternoon I spent with my regular physician Dr Zaide doing a follow up from yesterday.

And right now, I have to email you. All when I still have a slight residual headache and should be in bed.

At first I thought the migraine was brought on by the medications I'm taking but it wasn't, it was brought on after our discussions. Now I can't prove that but it seems pretty obvious to me. Joke no pun intended there!

That migraine made me realize I need the stress of this situation over with. All the stress on top of losing everything is too much and I'd rather live than die from it all before my body does something worse.

My body is not reacting well and the migraines are getting more frequent and worse. Have you ever vomited at the same time as deficating while being in some of the most excruciating pain in your life?

If not, neither did I till the chainsaw went through my arm. That's when the migraines became more frequent, stronger and faster coming on. And now for the first time during the day.

Ever since I awoke this morning, all I can I think is the stress of it all is killing me more and more as the reality sets in and I just can't afford to care about it anymore.

My health means more than some lawsuits and the lure of money.

All because some idiot named David Gagnon forgot to tell me to move out of the way and he can't seem to admit it.

Yes, after reading his deposition and hearing it was my fault I was pissed.

In my anger I suspected all sorts of things. Including it being intentional especially after my discussions at his home only trying to get his homeowners policy number and him wanting money and threatening me for it.

Yes, my arm and elbow were hurt from his stupidity irregardless if some dr can link the two together or not.

Yes, there will be ongoing medical as a result of all this because it still hurts and doesn't work right.

Yes, I am now disabled irregardless of what SSDI appeal goes because of this.

Yes, I understand I'm screwed because of a system that allows one person to hurt another and even after a trial and judgement entered all they have to do is go file for bankruptcy in the same courthouse on the same day.

Yes, it just took me almost an hour just to type this.

Yes, yes, yes...

but none of it matters anymore!

Bottom line Hans... Do the best you can with what you got, I've got nothing more to lose or give. I need it all to just go away.

Paul

I have to be very realistic about things and honest with my opinion. It doesn't do you any good if I do not feel strongly about the case.

That's the very reason why I wanted to have this discussion. I want to give you the option of finding other counsel at this point if you really want to take the case to trial which I think ultimately will be necessary. I just do not believe strongly that defense counsel will offer much in the way of a settlement. Although I will ask him if he is going to make an offer and maybe that will allow you to make a better judgment on this.

Hi Hans,

I spoke with dr. Kujawa's assistant Elsie by phone on Friday. I updated her on how the increased dosages of Neurontin/Gabapentin are having an effect on the burning spasms in my arm. I told her that each week that I increased the dose I was able to get a 75-80% reduction in the amount of burning spasms for approximately 2-1/2 to 3 days tops before I adjusted to the new dosage and the beneficial effects wore off. Unfortunately, I also sleep for 2-1/2 to 3 days each time the dosage is increased.
I am now at the recommended level of 1800mg a day and don't have anymore dosage increases scheduled and it's as if I'm not getting any relief again. She said dr. Kujawa wants to keep me at that dosage until our next office visit.
As far as the Botox injections go, I told her this time it definitely had an effect. My hand is now weaker and I can't even my full coffee cup up straight. She said that's what it's supposed to do and that as it wears off the spasms may get stronger and that we will do another round of injections at the 3 month office visit. She also said that I shouldn't be grabbing anything more than a couple of pounds.

Subject: Bankruptcy ?

Hi Hans,
I spoke with David Stretch, a bankruptcy lawyer, about possibly going the route of Bankruptcy. He said if I have a pending a suit that it is considered a possible asset and may allow the court to hold off any bankruptcy judgement pending the outcome and that I would only be able to exempt 15,000 before the creditors get their share.
He also said if all I default on is credit cards but keep up on the mortgage and basic needs all that can happen is a judgement will be issued against me and it goes on my credit report and it can be cleared later by filing.

I know my personal financial issues are not your problem but I am to a point for the first time ever that I am stopping all payments to my credit cards and focusing on the house, food and utilities. Or rather I should say my Mom is thanks to the chainsaw.

Does filing bankruptcy make any difference on your end and would it complicate anything?

In your opinion what would be the better route, file bankruptcy now or just default on the credit cards and deal with it later?

I added the contact info for David Stretch below

Thanks,
Paul

Hi Hans and Meredith,

I had an appointment with Dr. Kujawa yesterday.
She said the Botox injections will not solve the spastic pains you saw marked on my arm in the video I sent you but it should help with opening and closing my hand so I did another round of injections.

Of coarse I asked, am I stuck with those pains the rest of my life, it's been almost 3 years?

She replied, most likely but that's what the Neurontin/Gabapentin are for and it should help curb some of those pains.

She prescribed Neurontin/Gabapentin for the pains and asked that I report any changes to her and to see her again in another 3 months.

My next appointment is set for August 14th.

Thanks again,
Paul

I spoke with my counselor at Rosecrance, Dennis, he said the issue is the old records are kept on their old system. He is going to try and have them for me Monday morning.

I got the records from rosecrance (minus the original councilors stuff and gave them to Meredith the day of the hearing. Rosecrance was in the process of getting the original records. I'll call and see if they have them.

I hope the dep with dr Kujawa is after the May 8th appointment.
Her assistant Elsie is the one who told me to start logging the issues and Dr. Kujawa hasn't seen any of the video logs I have yet.

Paul. We've been talking this case over a bit at the office. As Ive tried to advise you during our several meetings, I do not believe we can adequately prove our case at trial. Its your word against Mr. Gagnons. Most times, that means we lose - as plaintiff. I don't think we want to invest the time and expense to get to that result. Im happy to try to settle the case for you, but it will probably be a low amount. So, I want to advise you now should you wish to retain other counsel to try the case for you. Please advise how you wish to proceed. I know this is not good news, but I have learned a long time ago, some cases just are not proveable - not because you are not credible, but because jurys demand more than we can give at trial.

Paul,

I was able to get this email! I had written Meg to see the status of the records.

Again, here is what we discussed:
(1) the medical expert gave you a closed claim of benefits - we don't want to take that (i want you to have the ability to appeal any unfavorable decision/not be foreclosed from getting a closed period of benefits and then reapplying if need be) so that is why we went to the vocational expert testimony.
(2) when we went to the Vocational Expert, he gave jobs that conflicted with his testimony so I eliminated the jobs through his testimony (I just need to write a post-hearing memo for that and I am holding off and waiting for the medical records from Dr. Kujawa so i can address ongoing treatment in a memo to the judge as well)
(3) your psych records also reflect you can't do the jobs the vocational expert listed because they all require social contact which your records reflect that you really shouldn't do and the ALJ didn't develop the testimony there - kept saying we were running late - i will address that as well in the memo to the judge.

The records we addressed were requested previously by Meg and from my knowledge we are still waiting on the records (medical records often take quite a long time to come in).

I'll be happy to follow up with Meg/Janet tomorrow to find out the status of the records and if we may require you to get the updated records. While the Dr. Kohn records would show old treatment, it is Dr. Kujawa's records that are more useful (they show ongoing issues during the period in which you are claiming disability). Old records from 2002 will only show that you had problems in 2002 - updated records (from 6/28/11 onward) are key to your case at this point.

I'll be in the office tomorrow to speak further as well (312) 561-3030 if you have any questions.

Hi Janet,
I had the SSDI hearing last Thursday. It was a learning experience and I am not sure how it went. Much of it I didn't understand.
We were missing some of the reports. Particularly anything from Dr. Kujawa showing ongoing care for post traumatic Dystonia in the right forearm and some old reports from Dr. Kohn who was the Dr. who gave me over 100 shots in my neck, shoulders and back for severe muscle spasms after the car accident over a decade ago. Dr. Kohn from Kohn medical group in McHenry, I completely forgot about until the questions about muscle

spasms came up in the hearing.
The judge left open the record for 30 days for us to add anything to the medical record.
Should I be the one to get the old reports from dr Kohn and the ongoing reports from dr Kujawa?
Also, Meredith Marcus, the attorney from Daley Disability law, asked me to send her Dr. Kujawa's contact information but her email (mmarcus@fdaleylaw.com) keeps getting sent back to me with an error saying its undeliverable. I'm not sure how to get around the emails being sent back. What should I do?

Thanks again for everything,
Paul

Ok, it's signed and in the mail.
Hope that some yahoo in the govt. doesn't someday decide to go after everyone they think they might get a dollar out of and end up holding me responsible for the McGuires fees incurred while they fight it out.
I'm not in the business of warranting, insuring or protecting the McGuires from government. Especially for only 5 grand. For that kind of protection it could cost millions but I trust your judgement.

David was the one the neighbor talked to. The neighbor did not know Dave's name but described him to a T and did say he would know him if he saw him.

On another note: I noticed David had the order of cutting down the apple tree before or after the pine tree goofed. Not a big deal but I think Bill, Carols and my own deps agree it was done prior. I remember the same neighbor talking about that day prior to the big trees coming down.

That neighbor has a better view from inside his house of the McGuires back yard than the McGuires do from their own house.

I think David wasn't just confused about the timing, he was trying to show he hadn't done any work prior to this incident. Not sure why but the complete fabrication as a whole shows that David was right, he wouldn't lie to help me but he would lie to help himself.

I'm done ranting...
Reading that dep got me going. Need to let this thing rest for a bit.

Have a good day and enjoy your holidays,
Paul

Hi Hans,

A while back I sent you the name and number of the McGuires neighbor. I don't have it in front of me at the moment but it's in our correspondence.

The neighbor claimed that the McGuires had asked him to borrow his chainsaw to cut down the trees on the McGuires property just a few days prior to the trees coming down.

It would seem to reason that the McGuires did not own a chainsaw at that point and tried to borrow one from a neighbor before going out and purchasing one specifically for that project.

So my question is, if the McGuires can be proved to be hiding the reason and timing of purchasing the chainsaw can this benefit us in any way?

Thanks,
Paul

Hans,

I read through David's dep. it's mostly lies with a few truths.

Where should I begin or better yet where would you like me to begin?

Almost everything he said was made up, from which end of the branch I was holding, at who's direction I was doing it under and even as to why I was even there on the McGuires property, etc...

Not to mention the nonsense of $10,000.
The only good thing he has coming from me is my ability to hold back my primal side be civil.
It's a shame we don't live in ancient times under the old eye for an eye philosophy of justice.
I'd much rather take a chainsaw to his arm than get any money.

As far as the McGuires are concerned give me a call.

Paul

Hans,

I wanted to review David Gagnons dep before letting the McGuires off the hook.

And that word "foreseeable" in the McGuire suite...
Well I suppose if I gave anyone a chainsaw and told them to use it, given enough time, an injury is foreseeable, very foreseeable just not hoped for.

And the comment about people not liking friends who sue friends, um well we all should know other than entirely random acts such as auto accidents, train derailments, air plane accidents, etc. Etc.. That most of the time it's those we know who hurt us most often than not. and if it's serious we must be able to sue even if it is or once was a friend.

Hi Hans,

After reading the McGuire deps it lead me to do a lot more searching online and now I realize the difficulties I created in my own dep when asked about the right elbow and left arm tennis elbow being a natural progression of injury from the original cause. I probably shouldn't have commented on them at all even though I believe it's all connected.

Is there any way to amend the suit to correct for my ignorance and confusion?

I'm not a dr and tried to say in my dep that I don't want to pretend to know what dr's mean when they say things.

Thanks,
Paul

I hope not.
Sounded to me like they claimed to be hiding in their home all day when the neighbor saw them outside actively participating all day.
And carol seeing me pick up a 200 lb. tiller alone with her own eyes when it was really someone she knew very well since the 1970's and sees once a week at least. This shows a desperate wanting to prove my claim of injury as false.
Those are a bit more than a bad recollection by anyone's standard.
I would feel better if we had in reserve and were ready to use all tools needed to win.

Hans,
If we take the McGuires off the suit can their deps still be used against us in any way?

John Choyinski stopped by yesterday and I asked him about the tiller. He openly admits being the one who loaded and unloaded the tiller. I recorded the conversation and my Mom was also present and on the tape. Both knew I was recording it in my home. I can send it to you if you need it.

Brian Beebe, McGuires neighbor told me he saw the McGuires out working in the yard most of the day. He doesn't know their names but said he would recognize them if he saw them.

If their deps can or will be used in any way against us can or should we bring provable perjury charges and have them thrown out?

Thanks,
Paul

Hans,
Just got done reading those deps.

First off, Glad I'm not a lawyer.
Secondly, it's full of half truths and flat out lies.

Your right, going after those half truths are probably not worth anything in the long run but I do have to comment about the tiller because that one was hysterical.

Dave's best friend John Choyinski was with me when I delivered the tiller and he was the one unloading the trailer and I'm more than positive he would testify to that effect.
It's just amazing how families lie and exaggerate to protect each other but I do understand it, it is Caroline's son.

Hans,
I'd like to read David's dep before accepting the McGuire offer.

Even after reading the McGuire deps and seeing how things easily get skewed in all honesty, I can't blame Carol or Bill for Dave's actions I just thought I was covered under their insurance. I know Carol & Bill thought I was covered as well irregardless of all the half truths in their dep.

Thanks again,
Paul

Hans,
Just got done reading those deps.

First off, Glad I'm not a lawyer.
Secondly, it's full of half truths and flat out lies.

Your right, going after those half truths are probably not worth anything in the long run but I do have to comment about the tiller because that one was hysterical.

Dave's best friend John Choyinski was with me when I delivered the tiller and he was the one unloading the trailer and I'm more than positive he would testify to that effect.
It's just amazing how families lie and exaggerate to protect each other but I do understand it, it is Caroline's son.

If there is anything in them we could use or need to be weary of let me know and we can go over it.

Thanks,
Paul

Hi Hans,
Talked with the McGuire neighbor Brian Beebe

Brian Beebe
815-669-0655
1015 oak leaf ave.
McHenry, IL 60051

He remembers the day the tree work was done and said he watched for a while and talked with the people over there because they had asked him to borrow his chainsaw for the same project but doesn't remember the incident itself. He did tell me he has been used as an expert witness for chainsaw incidents because of the kind of work he does.
He did say that his "x" lived with him at the time and is going to ask her if she remembers anything at all and will get back to us. He seems very willing to help.
He has both yours and my number.

Morning Hans,
Ok we can meet. I will call Sheila today and set up a time.
Please send me a link to the current Illinois statute citing that the property owner is not liable for work done on their property resulting in injury to a neighbor.
I need to read it myself and any links to recent case law in this area would be helpful as well.
Thanks,
Paul

The legality of it all is that a property owner does not have legal liability for a worker (whether friend, son or otherwise) who does the work on his time, using his own independent skills. Here, I deposed the McGuires, and they had nothing to do with how Dave did the work other than to request the work to be done. They had no control on how Dave wielded the chain saw and cut you. its that simple. We don't have to accept the $5,000, but if we do not, the McGuires will get out for FREE on a motion. So that's the situation.

Hans,

A while back you told me that the jury's here in this county are primarily conservative and that they know the only reason we are before them is for money.

Not sure if that statement was meant to scare me or not but I do agree, they are, for the most part conservative and I would hope we should make it known we want money for damages, lawyers fees and the medical bills, etc... loud and clear.

We should also make it known to the jury that the parties or their insurance companies have never even offered to pay 1 cent for any of the medical damage and that's why we seek the juries help in settling this dispute. Perhaps if the insurance companies would have paid for these basic things none of us would even be here. but they didn't and now yes after years of waiting I am seeking money to pay for the medical treatments, you as the lawyer and finally myself as I'm the one who has had to suffer the consequences of the Gagnon/McGuire choices on that day.

I cannot believe that a conservative jury isn't going to award anything less than the cost of the medical damages and lawyer fees from them unless something catastrophic changes. I do see them being conservative as to what I will end up with at the end but not the real medical and lawyers bills. Even the conservative juries in this county are not so conservative that they won't give the base bills.

The McGuires insurance is free to go after David for damages if they lose.

Other than fearing a motion to dismiss the suit against the McGuire's insurance based on some false concept that because they didn't have their finger directly on the chainsaw trigger they hold no responsibility for damages.

what are the real benefits of letting them off so easy?

And I don't want to hear its because 2 parties vs 1 is much easier.

Letting off the McGuires insurance for such a small amount is anything but reasonable and I just can't see any ethical judge in this county not keeping them in the suit all the way for a jury to decide whether they had any part to play in the days events and the level of responsibility they share with David for the consequences considering it was the McGuires project, their land, their choice of who did the labor etc. etc...

When you advised me to seek a settlement with the McGuires insurance, I agreed to look at it only because they didn't have their hands directly on the trigger of the chainsaw and That you would get at the least the medical bills paid for out of it. I thought that was made clear in your office.

I know you work on approximately 33%. Is 33% of 5,000 even worth the time and money you already invested? It's only $1650 for you and I'm sure your hourly fee eats that up rather quickly, I know mine did back when I had hands and arms that worked so I could charge.

That's their personal issues of control with their own son. I will testify all day long about the things they wanted him to do that he did do throughout the day.

By claiming they had no control over the work dave did after all the preparation, money and time spent out in the yard yelling at him that they wanted certain things done in a particular way I don't see how they get out of the direct over site of the project because now that there is an injury they don't feel they had any real direct control over their own workers actions?
This is ridiculous.
Hans, they have to do better than claim they had no control over David that day. If that's the case why were they there watching the work most of the day? Even Bill had hands on doing some of the work and rarely let David go to long without checking and seeing if things were being done the way Carol and Him wanted it.

If you want a negligence case for the homeowners ask what happened immediately after the accident.

Neither of them offered me any medical assistance nor did either of them call 911 and all Carol could think of besides calling David an idiot was calling her homeowners insurance.

Only 5, That's not much at all.
Is this a take it or leave it or do we have any other options?

If you want a negligence case for the homeowners ask what happened immediately after the accident.

Neither of them offered me any medical assistance nor did either of them call 911 and all Carol could think of besides calling David an idiot was calling her homeowners insurance.

They all left me out in the yard screaming for help while they were busy making sure they were covered.

She even went as far as to finally call the Emergency Room after I was already there just to tell me she was covered.

How selfish are people when they worry about if their insured over helping the person who was hurt and bleeding badly in their yard.

I'm glad she got her answer and had to share it with me only to find out her coverage won't even pay the medical bills.

I'm not happy with the offer.

As far as John Choyinski, he knows he has to call you and said he will tomorrow.

In addition, the McGuire's atty has offered us (you) $5,000 in full settlement of the claim against the McGuires only. As we discussed, they have no liability in the case for what Dave did as property owners. So they will likely get out of the case on a motion at some point, so my suggestion is to take the $5,000 now. You probably won't see any of it due to liens etc. but it will offset the costs deducted from any eventual recovery....

Let me know what you think..

Oh and I know that nothing that happened right after the incident makes any difference as to the validity of the injuries but David's

conduct immediately after the incident does show his lack of moral values for other humans and what he was willing and was not willing to do to help me get medical help. For his actions towards me or any other human being is enough to sue the shit out him alone. It is the things that happened afterwards that upset me the most.
Sorry for the rant but Dave was a complete ass all the way and deserves this.

Subject: Sagerman deposition

Hi Hans,

Reading through the summary of Dr. Sagermans Deposition I'm curious as to whether Dr. Levin has been deposed? The reason for this question is because of the EMG tests. Dr. Levin only conducted both the tests from just above the scar in the right forearm to the right hand and fingers. She never tested the right elbow which most likely would have identified the compression in the ulnar nerve earlier. She told me she didn't see any reason to give a full test beyond the scarred area even though The Dr asked for a full test of the nerve. She did tell me that all of the branch nerves in the forearm were severed but that is considered minor nerve damage and most likely wouldn't repair itself. Those minor nerves that were ripped out is what caused the loss of feeling in the right forearm and loss of fine motor skills in the areas they control. Again, no major nerve damage was found, only minor nerves but they still hurt like hell and play a significant part.

As far as the MRI, I was told the test cannot tell the difference between scar tissue and good tissue by both Dr. Sagerman and Dr Levin and neither expected to see much from the test.

As far as proving the elbow is a direct, indirect or hypersensitive result from the chainsaw, I don't think anyone can prove or disprove this let alone bet their medical license on this. All I can say to this is that it never bothered me before the incident and I didn't have any of the numbness or tingling prior to the incident. It is possible that the compression existed before the incident and that the trauma to the arm aggravated the nerve causing a hyper sensitivity resulting in the sensations or lack of them. I don't know how or when the compression in the elbow happened. I believe it happened during the incident but cannot prove it. I was in panic mode followed by extreme shock following the chainsaw being lifted into my arm. All I do know is it didn't bother me at all prior to the chainsaw incident or I would have seen a Dr. about it.

On another note, Dr. Sagermans comment about sitting in front of a computer all day shows he has no idea how repetitious keyboarding is or how much work a graphic designer does. I'm curious as to the context of the question he was asked to reply this way and why he doesn't see typing as an extremely repetitious task requiring good dexterity. Every time I try to go at the keyboard, mouse or even write I don't get very far without suffering a spasm in the damaged muscles. It affects much more than just typing. My grip is shot as well and I have a lot of trouble doing regular daily activities like cooking, cleaning, driving, etc... Those spasms happen anytime I try to use those muscles for more than a few minutes repetitiously. Sit at your keyboard and type with your right hand and feel the muscles in your forearm at the same place the chainsaw entered, dug deep and tore out a huge chunk of my arm and ask yourself if issues in those muscles would affect your ability to type or use your fingers for anything. This is a no brainer, of coarse they do. I don't believe dr Sagerman gave this much thought or may have been asked this question in a context that would put computer keyboarding as a physically non stressful job overall but did not consider the extreme repetition, dexterity or fine motor control it takes to be a professional keyboardist 40-70 hours a week. If all I did was sit in front of a computer all day his statement would be true but to do my job requires one hell of a lot of keyboarding. Wish I could get paid to just sit in front of a computer and not have to type anything. Lol.

On another note, I did not see anything about the self dissolving stitches the Hospital used the day of the incident that never dissolved and Dr. Sagerman had to remove later. He said that accounted for the feeling of needles poking me in my arm and I believe he was right as those feelings stopped after he removed them. That was over a year of feeling those stitches aggravate the forearm and was a huge relief when they were found and removed. Removing those helped to pinpoint the Dystonia.

As far as the disability claim. This incident is what triggered me to file for disability but is only the piece of straw that broke the camels back so to speak and not the sole reason I filed. Disability looks at the whole body and not just this incident. In no way do I suggest the chainsaw is the sole reason I may or may not get disability. It is a cumulation of serious injuries I have suffered that will be the determining factor.

That's all I have for now but I'm sure more will come to mind as time goes on.

Oh, one more thing... You said a trial is like a theatrical production. If we had to go to trial how much approximately would you need in cash to make an overwhelmingly convincing production happen. Let me know so I have an idea of the ballpark figure and can

secure the funds needed.

Hans, I'm asking that when you consider either a settlement or a trial that you ask yourself what it would be worth to you if you had to suffered this type of injury that profoundly changed your day to day living and career.

Thanks again,
Paul

Hi Hans,

Just spoke with John Choyinski a lifelong friend of myself and David Gagnon.

First off I should mention that John has suffered a brain injury in his youth and did spend a few months in a coma and rehab but that was over 20 years ago and he's improved dramatically since. If you should talk with him you will notice something's off about him and I thought the heads up would help. One important note and you have to take my word for this till you talk to him and realize it for yourself, it is that John is damn near incapable of lying. Ask him anything and he's so darn honest he gets himself in trouble and doesn't know it. He often says way too much and I'm sure that can't be good except its what makes him so darn believable.

John is willing to talk about certain aspects of what David has said to him in confidence. John is extremely hesitant to go against David in fear of retribution and rejection from his lifelong friend and is on guard in his reactions and words but this can easily be avoided by asking him questions that skirt around the issue rather than directly at it until he already answered it.

John explained to me tonight that Dave is not the same person I knew a decade ago. These days Dave is all about himself and he has become money hungry. John told me I would have known that if I hadn't been off working all those years and been around more often. John went on to say that he knows that David is lying about how it happened because David seems to think he will have to pay more for insurance and he's so cheap he'd rather screw Paul over than paying 1 penny more or have to admit he did something wrong for no money. John went on to say that David was upset at having to do his Moms tree, didn't want to be there because he wasn't getting money for it and that he was trying to go too fast, didn't tell Paul what he was doing and that's how it happened. At this point Johnny showed confusion and said "um well I mean Paul moved his arm.... Ohhh whatever, I don't want to talk about it any more."

Hans, Johnny is David's longest lasting friend. These two were the closest of buddies growing up. Johnny said he would be willing to talk with you not to go against David but because he knows the troubles I have doing normal things that I used to be able to do very well.
If you start by asking Johnny about my grip or things I have trouble with like hand shakes or opening jars, writing or typing he will go on and on, he needs to be guided a bit in the right direction and soon you will have what you should need about his conversations with David.
But be forewarned, Johnny can go off on tangents and most of what you hear won't have anything to do with what he is there for and I'm more than positive he will say things that will ruin his own credibility.

When I asked johnny if it was ok for you to speak with him he said yes but to give you his home number and not his cell because he doesn't answer calls if he doesn't know the number. He also went on to say his parents told him to stay out of the issue between Dave and I because of David. They fear David may do something drastic if he feels Johnny went against him.

Best time to call him at home is either early morning before 9 am or at 6 pm but he is in and out all day.

John Choyinski Jr.
Home. (815) 385-8483

Hans, John has issues and may not make the best witness in my opinion but he is Dave's lifelong friend and if handled correctly can't lie or should I say can't keep one up for very long.

Paul

Hans,
I don't believe that any reasonable person sitting in a jury is going to give dr talerico's 5 minute evaluation much credit next to dr Sagerman's extensive examinations. I'd bet the farm on Dr. Sagerman over Talerico any day.

And in cases that have complicated medical issues, many times the jury will not be so accommodating and give you the benefit of the doubt. That's why Plaintiff's always have a more difficult time at trial, because they have the burden of proof. And, if the jury doesn't like the evidence they can find against you.

Paul, here are my thoughts regarding your case. There are two issues. The first liability, or whether Mr. Gagnon is liable for your injury. If he is not proven liable, then it does not matter how badly you were hurt since he will not be found responsible for your damages. The second issue is your damages, or to what extent you were injured due to Mr. Gagnon's acts.

Both of these issues are strongly contested in your case.

As to liability, there were no witnesses to the accident. So, whether Mr. Gagnon will be held responsible for your damages is uncertain and a gamble. That is because it is your word against his word. Our argument is that you were simply holding a limb when he caused the chain saw to strike you. His argument is that you moved your arm in the path of the chain saw unexpectedly. If the jury determines that we did not prove your "version" of the accident, then they can find against you and in favor of Mr. Gagnon at trial.

As to damages, the issue is complicated. That is because your treating physicians do not all agree on exactly what injury you suffered or whether your had a fully recovery or not.

Dr. Talerico at MidAmerica Hand and Shoulder, saw you twice. The first time was in December, six months after your injury. He was not supportive of your claim in most respects. He didn't really feel there was anything wrong with you - as to the forearm. He said that you complained mostly of pain radiating down the forearm from the laceration site with numbness and tingling. On exam he noted no tenderness and it was mostly a normal presentation. Strength was good. He did not see any nerve problem. He prescribed physical therapy due to a muscular sort of symptomology - not nerve related. Apparently you did only 2 sessions of therapy and returned January, 2012. No new complaints at the time. The EMG was normal. He did not believe you were disabled. He continued you on therapy. He saw no evidence of nerve problems. The only symptoms were subjective - not represented by any abnormal exam finding.

Dr. Sagerman has also been deposed. I will summarize his testimony for your soon. His was more favorable, but still limited in what he related to the chain saw accident. Apparently he does not believe you presently have any symptoms relatable to the chain saw injury.

Think about these issues. I will provide you Dr. Sagerman's summary soon.

Hans

Subject: Medical depositions
Morning Hans,
Wanted to touch base this morning because the call from you about something not being medically linked has been on my mind.
I'm not sure what was said during that deposition with the drs that prompted the call but I have been thinking about what it could be. Most likely it was the right elbow procedure.
During my deposition I remember being asked if the two were linked and I answered yes. Let me explain my answer to you.
If the chainsaw had not gone through my arm then the procedure on my elbow wouldn't have happened. That procedure was exploratory to find what was bothering the arm from the chainsaw. Upon opening up the arm they did find some compressions which from my understanding was nothing unusual for a male of my age and very well may or may not have happened during my retreat from the

chainsaw when I ended up half way across the yard on the ground. Incidental finding or not it still would not have been found if I hadn't had the chainsaw incident. So as I see it they are linked good or bad and cannot be separated. The exploratory procedure was to find and possibly fix issues relating to the chainsaw incident. They also removed a ton of scar tissue in the forearm on the same day during the same exploratory procedure that was a direct result of the chainsaw.
Hope this helps explain things better.
Let me know,
Thanks,
Paul

Ask dr Talerico that question.

This dr Talerico guy has no intimate knowledge of my injuries other than 2 very short visits that I walked out of feeling like I was waisting my time because there was no real examination.

I don't even agree with paying for his services.

I have been seeing Dr. Levin and Dr. Sagerman for a couple of years now. And I get to choose who is the best dr for me. Not David or his insurance.

That is because it is your word against his word. Our argument is that you were simply holding a limb when he caused the chain saw to strike you. His argument is that you moved your arm in the path of the chain saw unexpectedly. If the jury determines that we did not prove your "version" of the accident, then they can find against you and in favor of Mr. Gagnon at trial.

As to damages, the issue is complicated. That is because your treating physicians do not all agree on exactly what injury you suffered or whether your had a fully recovery or not.

Dr. Talerico at MidAmerica Hand and Shoulder, saw you twice. The first time was in December, six months after your injury. He was not supportive of your claim in most respects. He didn't really feel there was anything wrong with you - as to the forearm. He said that you complained mostly of pain radiating down the forearm from the laceration site with numbness and tingling. On exam he noted no tenderness and it was mostly a normal presentation. Strength was good. He did not see any nerve problem. He prescribed physical therapy due to a muscular sort of symptomology - not nerve related. Apparently you did only 2 sessions of therapy and returned January, 2012. No new complaints at the time. The EMG was normal. He did not believe you were disabled. He continued you on therapy. He saw no evidence of nerve problems. The only symptoms were subjective - not represented by any abnormal exam finding.

Dr. Sagerman has also been deposed. I will summarize his testimony for your soon. His was more favorable, but still limited in what he related to the chain saw accident. Apparently he does not believe you presently have any symptoms relatable to the chain saw injury.

Think about these issues. I will provide you Dr. Sagerman's summary soon.

Hans

Subject: Medical depositions
Morning Hans,
Wanted to touch base this morning because the call from you about something not being medically linked has been on my mind.
I'm not sure what was said during that deposition with the drs that prompted the call but I have been thinking about what it could be. Most likely it was the right elbow procedure.
During my deposition I remember being asked if the two were linked and I answered yes. Let me explain my answer to you. If the chainsaw had not gone through my arm then the procedure on my elbow wouldn't have happened. That procedure was exploratory to find what was bothering the arm from the chainsaw. Upon opening up the arm they did find some compressions which from my understanding was nothing unusual for a male of my age and very well may or may not have happened during my retreat from the chainsaw when I ended up half way across the yard on the ground. Incidental finding or not it still would not have been found if I hadn't had the chainsaw incident. So as I see it they are linked good or bad and cannot be separated. The exploratory procedure was to find and possibly fix issues relating to the chainsaw incident. They also removed a ton of scar tissue in the forearm on the same day during the same exploratory procedure that was a direct result of the chainsaw.
Hope this helps explain things better.
Let me know,
Thanks,
Paul

Are they pitting Dr. Talerico against My other dr's?
He only saw me twice for approx 5-10 minutes and there is a reason I stopped seeing dr Talerico.

I'm not sure what you meant by saying there was no medical link from dr Sagermans deposition.
Medical link to what?
Weakness, spasms, loss of feeling, etc...
What has to be linked and why?

Hi Hans and Janet,

Today I met with Dr. Kathryn Kujawa at Alexian brothers hospital. She diagnosed my right arm as task specific Focal Dystonia and said it can be treated on a temporary basis with Botox injections every 3 months or so. My next appointment is for November 19th at 9:45 am to start the treatments. She said it is definitely caused from the trauma in my right arm. I have included her offices contact info below.
If you need anything else please let me know.
Thanks,
Paul

Hans,

Mike Thomas just told me he doesn't want to be involved because he is afraid that it will be found out he paid me in cash rather than a 1099 or w2 and he doesn't want any trouble with the IRS.
I tried to tell him none of that matters but he is afraid and won't call you.

Here is his contact info if you want to try.

Hi Hans,

Thanks for the reminder on the bills. Should have new printouts of the totals by next week.

I have scheduled an appointment with Dr.Kathleen Kujawa on November 14th, 2:30pm at alexian brothers hospital for an evaluation/consultation to see if is in fact Dystonia affecting the severed muscles and branch nerves in my right arm.

Dr. Sagerman told me to finish physical therapy at home for the left arm and left scheduling another visit up to me if I should need it.

Thanks,
Paul

Thanks for the update.

On another note, I went in to see Dr. Levin earlier this week. She said I'm stuck with something called Dystonia in my right arm. Not sure exactly what that is yet but I do have to see dr Sagerman on the 26th and plan to ask about it.

Ok,
Thanks

One more thing, I am calling dr Sagerman this morning to set up an appointment. He offered cortisone shots and I had decided to give it more time to heal. Enough Time has passed and it has improved but still catches me off guard and is quite acute so I'm going to go ahead with the shots. I'll let you know.

Thanks,

Hi Hans,
Missed your call this morning. I'm here all day so feel free to call when you have time.

I'd suppose they want to know what I did for Mike Thomas.

Here is a brief summary,
I placed an ad to sell off some printing equipment and Mike Thomas came out to see if he wanted anything. This was the first time I met him.
In the process he mentioned that he was setting up a print shop in Richmond IL and asked if we (Mike McArtor and myself) could help. We did help him on and off over the next few months. Mike McArtor still helps out to this day and I do offer them advise when asked. My brother Scott Dulberg and Tom Kost also help Mike Thomas from time to time.

Mike Thomas wanted me to work for him on a regular basis. He offered many different proposals from direct employment, sub contracting, part time, etc... I had to decline after a few months of working with him on and off because I knew I couldn't do that type of work anymore on a regular basis. My arms and hands just can't be relied on.

Working with Mike Thomas taught me what I was and was not capable of doing. I did try to do many things for Mike Thomas that probably was things that I now know I shouldn't do anymore. I had to try, how would I know what i could do if I didn't.

It was a good test to see if I could go back to work on a regular basis. I did try many different types of work for Mike Thomas. It was everything from graphic design to doing little fix it up jobs around his building and even his house in Twin Lakes WI. I introduced my brothers, Scott & Tom, to Mike Thomas to recruit their help with what needed to be done because I wasn't able to do all the things myself anymore. All three, Tom, Mike McArtor and Scott filled in and acted as my hands to get things done.

I did receive compensation in the form of cash for my time. It wasn't much perhaps a few thousand in total but I'm not exactly sure what the exact total was. All the money went to my mother to help out with the bills she was paying on my behalf.

Other than that there isn't anything else I can think of that the defense counsel could hope to get from him.

Feel free to call or I could come in to discuss.

Thanks again,
Paul

Hi Hans,

I dropped off the billing today. There is still dynamic hand therapy and Dr. Sagerman who have more to add to the list.

If you have any questions please let me know.

Hans,

Mike is what/who your looking for. He seen and heard David's rant and threat about a lawsuit and any possible monies paid out. I expect him to be off work around 6 pm and I'm sure once he gets your message he will call you.
I'm not sure Mike has even thought about that event since it happened but he doesn't forget things too easily. I'm sure whatever he remembers he would be happy to testify to.

David did not come into the hospital with me. He dropped me at the door and was parking the car. He was brought into the ER and questioned by the staff that was there. You can check with whoever was working the ER that day. It's not really my word against David's but David's word against those that were working in the ER.

There is one witness as to David talking about making money off of this accident. David did not come into the hospital with me. He dropped me at the door and was parking the car. He was brought into the ER and questioned by the staff that was there. You can check with whoever was working the ER that day. It's not really my word against David's but David's word against those that were working in the ER.

There is one witness as to David talking about making money off of this accident. Mike Mcartor heard David say this to me in David's garage the day I went up to David's house to get his home owner's insurance policy number per your request.
Mike Mcartor is a friend that grew up with David and myself and is currently living at my residence.

Will sign and drop off the medical release forms you requested.

Paul

Hans,

In response to your letter about Gagnon's deposition:

In the first place, why would I hold up the very end of a branch with my damaged left arm? And if I did do it as Dave Gagnon said, I would have had my back to him. What he said makes no sense.

In the second place, if you have ever been cut by a chain saw, the last thing on anyone's mind would be making a profit. I was in so much pain that I could not have talked seriously about anything other than stopping the bleeding and getting to a hospital fast.

David did not come into the hospital with me. He dropped me at the door and was parking the car. He was brought into the ER and questioned by the staff that was there. Your job at the deposition is only to answer the questions asked of you

Your purpose at the deposition is NOT to explain, convince, argue or otherwise defend your case. If the attorney questioning you does not seem to understand something about your case, TOO BAD. Unless asked a specific question on a matter, you are not to explain or clarify things voluntarily.

The attorney's job is to disbelieve you. Don't think you will convince him/her to change his mind. Don't worry about this.

EXAMPLES

Q: How did you accident happen?

BAD RESPONSE: I was walking out of the store and I wanted to get to the car so I walked down the sidewalk and didn't see anyting until after I fell.

GOOD RESPONSE: I was walking down the sidewalk.

REASONING: You were not asked what you were intending to do or what you were thinking.

QUESTION: Did you miss any work due to the accident?

BAD RESPONSE: Yes, I did not go back to work for 2 weeks and lost about $800.

GOOD RESPONSE: Yes.

REASONING: You were not asked how long you missed from work or how much income you lost. Therefore, don't volunteer this info.

QUESTION: **Were you injured in the accident?**

BAD RESPONSE: Yes, I hurt my head, back and neck.

GOOD RESPONSE: Yes

Get the idea? If not, we can discuss any questions you have. Please call.

Thanks Paul

Hi Hans,
Just wanted to say its a good thing we rescheduled the deposition because I'm simply not doing well today at all after having the hemroids removed yesterday. I wouldn't have been able to make it in today at all and from what the surgeon said, I wont be able to walk or sit very well for 3 to 5 days. Let me know when you want to do another practice session but its probably best to do anytime after this weekend.

Thanks for all your help,

Hi Janet,
I met with Dr. Sagerman (hand and arm surgeon) for a follow up on Monday for both my right and left arms. He scheduled another follow up in March and prescribed more physical therapy.

I mentioned a new issue I had to Dr. Sagerman, (hemroids) that I first noticed on Saturday and asked him where I should go. He sent me to Dr. Rosenova an internist. Dr. Rosenovas office had me come in the same day. Dr. Rosenova took one look and sent me to Dr. Daniel Conway a general surgeon to have it removed ASAP.

Dr. Conway took one look and surgically removed the hemroid right there on the spot. I have a follow up with Dr. Conway on February 13th.

I was told by the dr's that hemroids can happen at any age however it usually doesn't happen till after 50 years of age. One of the things that may cause it earlier that seemed to hit home with me as to the cause is stress. With everything I've been through stress makes the most sense to me. Hemroids hurt bad and it's going to take me a few days to recuperate. It hurts to walk, sit, stand, etc...

On another note, I missed my appointment at rosecrance earlier this month because I had a bad neck day and didn't get out of bed all day. I rescheduled with them and will be meeting with them again in February.

I have those forms from SSDI and am going to try and fill them out today and get them to you but i cant promise that i will get it done. The pain meds are simply kicking my butt. With everything that happened this week (hemroid issue) I don't know if I am over the 10 day demand they gave me but I am doing my best. I need to go lay down.

Thanks for everything,
Paul

Hi Hans,

I went to see Dr. Sagerman this morning for a follow up from the surgery on my right arm almost 6 months ago. He wants to see me again in 6 weeks for another follow up.

My Mom, Barb, went with me this morning to make sure I talked to him about my left arm. It has been hurting bad for 3 to 4 weeks now and she wanted me to get his advice. Dr. Sagerman had an X-ray done and said it looks good but I have what is called lateral epicondylitis or tennis elbow in my left elbow. He said it was probably just from over use due to me not using my right arm and could be treated. He said I need therapy for the left arm and prescribed 6 weeks of therapy 2 times a week and would follow up with it at the same time as my next appointment for my right arm.

I went to Fox Lake dynamic hand therapy with the prescription to schedule the appointments. They set the appointment for this Friday at 1:30 pm.

When I got home Dynamic Hand Therapy called. They said they cannot see me because this is not part of the litigation pending from my right arm unless the Dr. says it is. And because I have no insurance it would cost me $70.00 a visit.

Which there is no way I can afford. I have no income.

Any advice?

Thanks,
Paul

Hi Hans,

I looked into the MedChex question.

When I called Open Advanced MRI of Round Lake to get the amount owed I was referred to their corporate office. The corporate office had told me my balance was $0.00. They looked into who paid the bill and mailed me a breakdown of everything they charged, payments made and any adjustments. The corporate office at OPEN ADVANCED MRI did not know who MedChex was. They said it looked like an insurance payment was what paid my bill. Below is a breakdown of the billing from the corporate office at OPEN ADVANCED MRI.

Original charges from open advanced MRI of round lake.

$1510.00 for the MRI on 02/03/2012
$75.00 for the injection on 02/03/2012

$1585.00 total charges from open advanced MRI of round lake on 02/03/2012

MedChex paid

$800.00 for the MRI on 02/23/2012
$0.00 for the injection on 02/23/2012

An adjustment was made to the original charges from open advanced MRI in the amounts of

$710.00 for the MRI on 02/23/2012
$75.00 for the injection on 02/23/2012

My balance due reads $0.00

After a bit of searching the web I came across the contact info for MedChex, gave them a call and asked how they came to pay off my bill with OPEN ADVANCED MRI and what their terms were for paying off the bill.

MedChex claimed I owe them $3,390.00 for the MRI as of 08/22/2012

The customer Representitives supervisor I spoke with at medchex was named Tish.
Telephone number: (866) 959-1100
Extension: 109

Tish would not provide me with the terms or how MedChex came to negotiate and pay off my bill with OPEN ADVANCED MRI. She would simply repeat that they are a service to help those with no insurance and will be receiving a settlement for injuries. She told me that i did not need to worry about the increased amount from the original billing from OPEN ADVANCED MRI because a settlement would be paying for it. She demanded that I fax her a copy of the billing breakdown from Open Advanced MRI at 888-317-0260. She said that I was never supposed to see what the original billing was and that it is just wrong that I have it and that she would not discuss the terms or how MedChex became involved till I sent this copy to her office. That ended the conversation.

Hans, the only person/firm I ever authorized to handle any and all of my negotiations for medical billing is you and your firm. I will

bring in the breakdown from OPEN ADVANCED MRI to your office on Monday along with a few other bills I have collected.

Hi Hans,

Had another Dr's appointment with Dr. Sagerman at hand surgery associates. He read me the findings from the surgery. He said the chainsaw did not cut the ulnar nerve but the nerve was compressed in the ulnar groove at the elbow. Probably from scar tissue growing in the forearm and pulling the nerve tight in the ulnar groove. The scar tissue had apparently grown and attached my muscles to the skin and each other. Dr Sagerman said they managed to separate the muscles and skin.

I have another appointment with Dr.Sagerman in a month and am doing physical therapy.

I will send a few pictures of what the arm looks like 1 month after the surgery as soon as I can get someone to use the camera for me today.

Thanks,
Paul

The surgeon said today that he removed a bunch of scar tissue in my right forearm that bonded the muscles and skin as one. He said its all free to move separate now but the scar tissue will return. He said that getting in physical therapy quickly and with a lot of luck it should help to keep it all from bonding together again. He also had to release the ulnar nerve from compression at the elbow. It seems it bound up was under compression and formed a bit of scarring on the nerve. He did not perform the ulnar nerve

transposition because he said it seemed like it would be stable enough still in the ulnar grove.

Hope that was a good explanation of what happened. I'm not all with it just yet. I should be feeling better in a few days.

Hi Hans and Janet,

Just thought I'd let you know the surgery on Monday went well. I'm still under heavy medication and a bit sore. The surgeon said today that he removed a bunch of scar tissue in my right forearm that bonded the muscles and skin as one. He said its all free to move separate now but the scar tissue will return. He said that getting in physical therapy quickly and with a lot of luck it should help to keep it all from bonding together again. He also had to release the ulnar nerve from compression at the elbow. It seems it bound up was under compression and formed a bit of scarring on the nerve. He did not perform the ulnar nerve transposition because he said it seemed like it would be stable enough still in the ulnar grove.

Hope that was a good explanation of what happened. I'm not all with it just yet. I should be feeling better in a few days.

Paul

Hi Hans,

I couldn't help but to laugh at that. The reason I left Dr. Talerico and went to Dr. Sagerman was because he couldn't listen worth a darn and went on a 20 minute rant about prescribing pain medication to me when I never received any prescriptions from him nor did I ever ask him for any pain medication or any other prescription for that matter. Each time I went there it was as if he confused me with someone else. On my last visit with him he couldn't even remember why I was even there and went on another rant about insurance companies. He never even asked or looked at the X-rays from the hospital and I had to ask him numerous times just to get him to read the physical therapy reports. Honestly, he scarred the heck out of me and we were at odds, so I went to see someone else whom I had more confidence in (Dr. Sagerman). I'm sure Dr. Talerico is a good Dr., just one that I felt was probably over worked, was getting confused between his patients and couldn't give me the attention I needed. In retrospect, it fits that his notes are messed up and confirms my feeling about him and why I went to another Dr.

I just called the libertyville office for MidAmerica Hand and Shoulder Clinic. Talked with Gabby. She told me she could not change the record but would make an addendum to the record to clarify that I was not the one operating the chainsaw. She apologized for the confusion and said that it was lost between the Dr.'s notes and the person who transcribes the records. She is going to call your office and fax over the addendum.

Please let me know if you get the addendum and if it is ok

Thanks,
Paul

Hi Hans,

Wednesday I met with Dr. Sagerman and I signed the papers for surgery on my right arm. They are going to do an ulnar nerve decompression and transposition, and a neurolysis in the forearm. They are also going to explore and repair any other damage they find with the muscles, tendons and remove scar tissue. I am waiting on a call to find out when and where the surgery will be. They said it should be in the next 4 weeks.

I also need to get some sort of medical release signed by my primary care physician for the surgery so I met with Dr. Sek yesterday and he gave me a checkup and signed the forms.

On another note, when we last met you asked if any of the Dr.'s had been paid yet. I answered no but that wasn't true. I have paid Dr. Sek in full for each visit and Dr. Levin has been partially paid. I also had to just sign a form for Dr. Sangerman allowing them to charge my credit card $40 a month till my bill was paid in full. I asked if they would do the surgery on a lean against a settlement and gave them your name and number to contact you. They said they would but still required I give them permission to charge my credit card.

If you need anything else please let me know.

Thanks for everything,
Paul

Hi Hans,

Just set up an appointment with Sheila for 10:00 AM tomorrow to meet with you.

Just after I set up that appointment with your office my physical therapist called and discharged me until I see the Dr. Said my evaluation was bad and they sent the report to Dr.Sangermans office and for me to call them. After calling the Dr.'s office they bumped up my appointment to Wednesday of this week to discuss surgery.

See you in the morning,
Paul

Hi Hans,

I'm curious if David Gagnons home owners insurance policy number checked out?

Also, from what I understand this surgery that has been suggested by two different arm specialists, the neurologist and my primary physician is going to run in the neighborhood of $60,000.00. I want to be sure that it will be covered under the settlement before I decide to do it.
It is a direct result from the chainsaw cut and not anything else. Will it be covered or am I on my own to pay for it?

I am extremely nervous about the cost and getting stuck in bankruptcy and losing my house if it isn't covered.

Thanks,
Paul

Hi Hans and Janet,

I just got back from an appointment with Dr. Sam Biafora, another hand, wrist, elbow & shoulder specialist at hand surgery associates. He did what seemed to be a very thorough evaluation. He dug around pretty deep in my arm and did many different tests on my hand, arm and elbow. He recommended doing surgery to get the scar tissue out of the affected nerve and surrounding area. He said not to have any hope of restoring strength, feeling or reversing the paralyzed muscle that pulls my pinky finger in. But he said that going in and removing the scar tissue from the area will bring relief to the nerve and should stop the pains I get. He said that it will leave a long scar from the back of my elbow to the wrist and they will need to move the ulnar nerve to the inside of the elbow and that it will take approximately 3 months to recuperate. I mentioned the new medication I just started taking that was supposed to help fix the signals from the nerve. He said that all that will do is mask the symptoms for a while and that the only way to actually fix it is to go in and remove the scar tissue and see if any of the cut fibers can be grafted back together. He said that grafting the fibers probably won't work since its been almost a year since they were cut but removing the scar tissue should release the pain and should make a huge difference. He was ready to set up the surgery and I told him I needed a some time to talk with my mom and think about it. He set up another appointment for a month from now so I have time to think it over and said to call Dr. Sagerman if I should decide sooner.

Hi Hans and Janet,

Forgive me for combining this e-mail to both of you but both of you need the same information.

Met with Dr. Levin today at Associated Neurology. She prescribed Neurontin / Gabapentin 300 MG. I am supposed to take it in the evening for 1 week then move to 2 times daily. Then call her in 2 weeks to see how it's going. She said that it is supposed to help correct the signals from the misfiring nerve in my right arm which is causing the pain when I use my hand. And that the dosage may change depending on how and if it's working. This treatment was suggested by Dr. Sagerman to help try and avoid surgery. If it works I think this is a long term treatment because the prescription lasts for a year and the pharmacist said it goes hand in hand with the other medications I'm taking for long term pain management treatment.

I see Dr. Sagerman and his partner tomorrow for an evaluation at Hand Surgery Associates in Vernon Hills. I will let you know what happens.

Thanks to both of you,
Paul

M. Margaret Bradshaw,

I received the results from the MRI done on my right arm and Dr. Levin said the MRI came up negative. The physical therapist had already told me that this type of damage seldom shows up on an MRI. Dr. Levin said it was all muscle and tendon damage. Dr. Levin and the physical therapist both suggested I see an hand and arm orthopedic specialist.

Today my GP, Dr. Sek, wants me to get an MRI done on my neck. This would not be covered in the lien against the claim for my right arm. So I am at a loss as to how to go about getting this done. While talking to you, I heard you mention Northwestern University. How do I go about applying for this? I would appreciate any help or assistance you may have that will allow me to get this done.

I applied for help at DHS in Woodstock. They received a copy of all my medical records and approved a two month SNAP benefit. Not sure if this will be extended or if they will do any further follow-up. This is a new process for me and I'm not sure how all this works. They said they sent my application for Medicaid to the state and I guess I am waiting for a response.

Thank you for any help you can provide.

Paul Dulberg

Paul

Yes, this is the correct application form. You could go ahead and complete the application yourself and send it in now. Margaret should be sending you some information soon on your claim. We have a process that we have to complete to open new files and we are still working on yours. Once you receive anything, please give me a call if you have any questions or concerns.

Thank you.

Hi Janet/Margret,

At our appointment you mentioned you could perhaps help me get medical work done thru Northwestern University. I have e-mailed you twice requesting the forms/applications needed to get this medical help. You have not yet responded. I did try to do a search for these forms and came up with the PDF attached to this e-mail. Is this the correct form? Not sure if you want me to contact NU myself or if you are the one that should be handling this for me. Dr. Sek wants to get another look at my neck because he thinks disc bulging may have increased and that there is further degeneration. There is no way I can afford to get this procedure done and you said you would assist me in getting some sort of medical assistance.

The interview we had is somewhat fleeting as I did get extremely tired. I remember something about family services but can't recall what it was I was supposed to do. Please feel free to call me with anything I should be doing.

Thanks again for all your help,
Paul

Hi Meredith,
Today I received a letter for authorization to disclose information to SSA.
The letter was addressed to your office.
Should I sign and return the letter or have you already taken care of this?
Thanks,
Paul

Your case is in prehearing review as of 10/28/16. I don't think it will be much longer but we have to wait for the judge's scheduler to call us. It all depends on the judge's schedule and order of cases to be scheduled. They schedule the older cases first. We will notify you as soon as we get a date.

In most cases, you must let your doctor check you again. Tell your doctor about any new or lasting problems. We cannot recognize and treat all injuries or illnesses in one Emergency Department visit. If you had special tests, such as EKG's or X-rays, we will review them again within 24 hours. We will call you if there are any new suggestions. You were treated today by: Ford, Apiwat W..

After your visit to our Emergency Department, you may receive a survey in the mail. We want to be sure we have given you very good care and we ask that you please fill out the survey and return it in the mail.

After you leave, **please follow the instructions below.**

This Information is About Your Follow Up Care

Call as soon as possible to make an appointment to see your doctor in 10 days for suture removal. You can reach your doctor by calling their clinic phone number.

Please return to the Emergency Department in 10 days for suture removal if you would prefer to have the sutures removed in the ER. We do recommend that you follow-up with your Primary Care Physician but you can return to the ER for removal of your stitches if you choose..

This Information is About Your Illness and Diagnosis

WOUND CARE (with stitches)
Your wound was closed with stitches. These are small threads that keep the skin closed to help it heal. You have 3 internal and 11 external stitches. These should be removed in 10 days.

At home, please follow these instructions:
- Wash your hands before touching the dressing or wound.
- Keep the wound clean and dry.
- After 2 days, wash the wound gently with warm water and soap. Pat it dry.
- Put a light dressing on it if it rubs or there is drainage.

Call your doctor if:
- you have redness, pain, or swelling in the area of your stitches.
- your wound drains pus.
- your stitches come out before your wound is healed.
- you have any new or bothersome symptoms.

This is Information About Your New Medications - Start taking as prescribed.

HYDROCODONE and ACETAMINOPHEN (Vicodin, Vicodin ES, Lortab, Lortab elixir, Zamicet, Norco, Zydone, Anexsia, Anolor, Bancap HC)

Take this medicine by mouth with food in the following dose: one 10mg/325mg tablet every 4 to 6 hours if needed for pain. Do not take more than as directed per day (24 hours).

This is a mixture of medicines (hydrocodone and acetaminophen) used to relieve moderate to severe pain. This medicine may be used for other reasons, as prescribed by your doctor.
Side effects may include:

Follow these instructions:

- Read the labels of non-prescription medicines before taking them. Many contain acetaminophen. To avoid an overdose, do not take any other medicines that contain acetaminophen.
- Talk to your doctor or pharmacist before taking medicines for sleep, colds or allergies. Severe drowsiness may occur.
- Do not share this medicine with others as this medicine is a controlled-substance. Sharing this medicine with others is against the law.
- To avoid constipation while taking this medicine:
  - Drink plenty of liquids. Try to drink 8 to 10 eight-ounce glasses of water or juice each day.
  - Include extra fiber in your diet.
  - Exercise daily.

Side effects may include:

- diarrhea
- upset stomach, nausea or vomiting

Other side effects may occur, but are not as common. An upset stomach is not a sign of allergy. Allergy would show up as **rash or itching, facial or throat swelling, wheezing or shortness of breath.**

Follow these instructions:

- Space your medicine doses evenly throughout the day. This medicine works best if there is a constant amount in your blood.
- Take this medicine **with food** to avoid an upset stomach.

- If you miss a dose, take it as soon as possible. If it is almost time for your next dose, skip the missed dose. Do not double the doses.

  - ongoing diarrhea
  - stomach pain or cramping
  - blood or mucus in your bowel movements
- any new or bothersome symptoms.

SMOKING CESSATION

Smoking is the nation's leading preventable cause of death. It significantly increases the risk of coronary heart disease, stroke and cancer. In fact, more than half of all smoking related deaths in America each year are from heart disease, stroke, or other cardiovascular diseases. The good news is, that one year after quitting, the risk of heart disease is cut in half. After five to fifteen smoke-free years, the risk is that of a person who never smoked!

If you or someone you love is interested in quitting, consider joining our "Freedom From Smoking "classes for adults. Centegra Health System and the McHenry County Department of Health have partnered together to bring you an effective program that will help you quit smoking. Call 877-CENTEGRA, (877-236-8347) for more information regarding this program. To speak with a counselor immediately, call the Illinois Tobacco line at 1-866-QUIT-YES.

PAIN MANAGEMENT AFTER DISCHARGE:

A person may feel less pain just by being in familiar surroundings. Here are some frequently asked questions about your pain management:

- What can I do to help my pain management? A person's level of relaxation and their environment can affect their pain. If you are tired, over stimulated (too many visitors) are anxious about your diagnosis, or a past experience with a hospitalization, your pain perception may be impacted and your tolerance decreased. Ask questions, and inform us about any problems or concerns that you may have, re: pain. Partner with your health team for your best pain management.
- What if the medication is not working? Tell your health-care provider; physician, home health nurse, etc. You may need a different dose or type of medicaton.
- What if I feel I'm not getting enough pain control? Talk to your physician or home health nurse about it. Together you may be able to develop a plan to prevent or ease your pain. Depending on the cause of your pain, your health-care provider may suggest exercise, use of heat/cold, massage, repositioning, immobilization of the affected part, or distraction such as music or rest.
- There are other methods of pain management. Let your health-care provider assist you in finding the best one for you.

Weight management is one step to help maintain a healthy lifestyle. For certain medical problems, such as congestive heart failure, weight should be monitored daily.

YOU ARE THE MOST IMPORTANT FACTOR IN YOUR RECOVERY.

Follow the above instructions carefully. Take your medicines as prescribed. Most important, see a doctor again as discussed.
If you have problems that we have not discussed, or your problem changes or gets worse, Call or visit your doctor right away. If you cannot reach your doctor, return to the Emergency Department immediately.

Centegra Health System is very concerned about your safety and well being. As part of our efforts to always provide very good care, any medications you received during this visit were reconciled with medication you are currently taking. This reconciliation was based on the information you or your representative provided regarding your current medications and allergies.

"I have received this information and my questions have been answered. I have discussed any challenges I see with this plan with the nurse or physician."

Dear Paul Dulberg,

As you may or may not be familiar with our Neurology Group, please allow me to introduce us. Our name is ***Northwest Neurology, Ltd.*** and we are a group of 14 Physicians and 3 Mid-Levels with offices in Lake Barrington, Rolling Meadows, South Barrington, Crystal Lake and Libertyville. We are on staff and examine patients at Condell Hospital, Good Shepard Hospital, Northwest Community Hospital and St. Alexius Medical Center.

Our newest location, 1900 Hollister, Suite 210 in Libertyville coincides with our being asked by Advocate to help them expand neurological services at Condell Hospital. Interestingly, while searching for space in the 1900 Hollister building, we were shown an empty suite that contained medical records (paper charts) that at one time belonged to the neurology practice of Drs. Grobman and Levin. The building management asked us to assist them in confidentially advising patients that their chart is being kept under lock and key, and that if you would like us to forward the chart to another medical professional we would be happy to do so. As a service to you, the patient, we agreed to assist them in this effort. As a fully functioning medical practice we are well versed in the privacy rules that govern access to medical records and in turn how the actual paper medical record should be handled.

Should you want us to send your chart to your neurologist please fill out the enclosed form and fax it to the number provided, and we will securely forward your chart.

Lastly, if you have not located a new neurologist in the area, please consider joining our practice, as we have provided excellent care to patients for over 33 years and have specialists who treat various neurological conditions. The physicians of Northwest Neurology are dedicated to providing comprehensive patient care with passion and years of collective experience. Northwest Neurology's doctors and nursing staff have developed multiple "Centers of Excellence" over the years and gained specialized expertise working together so as to collaborate and implement best medical practices. The practice treats patients with the following medical conditions.

- If you would like to make an appointment with a Northwest Neurology Physician please call ***847-882-6604***

RE: Paul Dulberg

Dear Mr. Mast,

Mr. Dulberg was previously seen by my associate, Dr. Mitchell Grobman, in 2002 for left ulnar neuropathy, and had surgery and essentially became asymptomatic by 2007 and who had never had difficulty in his right arm. Approximately a month prior to the evaluation, he had been holding a branch for a neighbor when the chainsaw came up and cut his right forearm. He was taken to Northern Illinois Medical Center where they put in inner stitches in the muscle and outer stitches. He originally had very significant pain, but as the pain was getting better, he started noticing that he had numbness in his fifth digit in the inner aspect of his forearm. He had not been dropping things. It was mostly just a tingling and a numb feeling. He denies ever having any right-sided symptoms or right-sided injuries. His examination was significant for a healing scar in the right forearm and for decreased light touch, pinprick, and temperature sensation in the ulnar distribution of the right arm. His strength was normal. Given the distribution, it was felt that this was a branch neuropathy to the sensory nerves. I did have him undergo nerve conductions to make sure that the median and ulnar nerves were all without involvement and they were. I recommended that he see a hand surgeon as well just to be certain that there were no other treatment options for him; however, most likely this was just a sensory branch neuropathy that may improve or may result in permanent numbness in the distribution that he was showing numbness. Mr. Dulberg should followup if any additional symptoms develop or if he wished to try any neuropathic pain treatment if it became painful and not just numb.

Sincerely,

Karen Levin, MD (mdm)

PATIENT:	DULBERG, PAUL	**PHYSICIAN:**	LEVIN, MD, KAREN
MRN:	1585839	**EXAM:**	MR FOREARM W/ AND W/O 73220
DOB:	03/19/1970	**DOS:**	02/03/2012

EXAMINATION: MRI examination of the right forearm without and with intravenous contrast infusion..

CLINICAL HISTORY: History of right forearm trauma with a chainsaw. Possible neuroma, nerve impingement or injury in the forearm. Possible tendon disruption. It appears that the patient had some difficulty holding still during image acquisition. There is motion artifact on this examination. Weakness in the fourth and fifth fingers. Pain in the forearm and hand.

TECHNIQUE: Multiplanar T1 and T2-weighted spin-echo pulse sequences and STIR sequence. Post-infusion multiplanar T1-weighted sequences were performed. A skin marker was taped to the point of maximal symptoms.

Contrast: 15 cc of gadolinium was infused.

FINDINGS: There is no bone abnormality seen. The bone marrow signal characteristics are normal.

There is no cystic or solid mass appreciated. The visualized muscles have normal signal characteristics.

There is no abnormal soft tissue infiltration or induration. Specifically, in the area of the skin marker which is marking the point of maximal symptoms, there is no soft tissue abnormality appreciated.

There is no abnormality identified along the course of the ulnar nerve in the forearm.

IMPRESSION: There is no forearm abnormality appreciated. This does not exclude the possibility of an ulnar nerve impingement or injury but there is no gross mass or abnormal infiltration along the expected course of the ulnar nerve. No obvious tendon or muscle abnormality appreciated at this time.

Thank you for referring your patient to Open Advanced MRI. If you have any questions, Dr. Levin, please feel free to contact me at my direct line which is: 630.885.2100.

Home Care Instructions

IMPORTANT: We examined and treated you today on an emergency basis only. This was not a substitute for, or an effort to provide, complete medical care. In most cases, you must let your doctor check you again. Tell your doctor about any new or lasting problems. We cannot recognize and treat all injuries or illnesses in one Emergency Department visit. If you had special tests, such as EKG's or X-rays, we will review them again within 24 hours. We will call you if there are any new suggestions. You were treated today by: Ford, Apiwat W..

After your visit to our Emergency Department, you may receive a survey in the mail. We want to be sure we have given you very good care and we ask that you please fill out the survey and return it in the mail.

After you leave, please follow the instructions below.

This Information is About Your Follow Up Care

Call as soon as possible to make an appointment to see your doctor in 10 days for suture removal. You can reach your doctor by calling their clinic phone number.

Please return to the Emergency Department in 10 days for suture removal if you would prefer to have the sutures removed in the ER. We do recommend that you follow-up with your Primary Care Physician but you can return to the ER for removal of your stitches if you choose..

This Information is About Your Illness and Diagnosis

WOUND CARE (with stitches)
Your wound was closed with stitches. These are small threads that keep the skin closed to help it heal. You have 3 internal and 11 external stitches. These should be removed in 10 days.

At home, please follow these instructions:
- Wash your hands before touching the dressing or wound.
- Keep the wound clean and dry.
- After 2 days, wash the wound gently with warm water and soap. Pat it dry.
- Put a light dressing on it if it rubs or there is drainage.

Call your doctor if:
- you have redness, pain, or swelling in the area of your stitches.
- your wound drains pus.
- your stitches come out before your wound is healed.
- you have any new or bothersome symptoms.

SMOKING CESSATION

Smoking is the nation's leading preventable cause of death. It significantly increases the risk of coronary heart disease, stroke and cancer. In fact, more than half of all smoking related deaths in America each year are from heart disease, stroke, or other cardiovascular diseases. The good news is, that one year after quitting, the risk of heart disease is cut in half. After five to fifteen smoke-free years, the risk is that of a person who never smoked!

If you or someone you love is interested in quitting, consider joining our "Freedom From Smoking "classes for adults. Centegra Health System and the McHenry County Department of Health have partnered together to bring you an effective program that will help you quit smoking. Call 877-CENTEGRA, (877-236-8347) for more information regarding this program. To speak with a counselor immediately, call the Illinois Tobacco line at 1-866-QUIT-YES.

PAIN MANAGEMENT AFTER DISCHARGE:

A person may feel less pain just by being in familiar surroundings. Here are some frequently asked questions about your pain management:

- What can I do to help my pain management? A person's level of relaxation and their environment can affect their pain. If you are tired, over stimulated (too many visitors) are anxious about your diagnosis, or a past experience with a hospitalization, your pain perception may be impacted and your tolerance decreased. Ask questions, and inform us about any problems or concerns that you may have, re: pain. Partner with your health team for your best pain management.
- What if the medication is not working? Tell your health-care provider; physician, home health nurse, etc. You may need a different dose or type of medicaton.
- What if I feel I'm not getting enough pain control? Talk to your physician or home health nurse about it. Together you may be able to develop a plan to prevent or ease your pain. Depending on the cause of your pain, your health-care provider may suggest exercise, use of heat/cold, massage, repositioning, immobilization of the affected part, or distraction such as music or rest.
- There are other methods of pain management. Let your health-care provider assist you in finding the best one for you.

Weight management is one step to help maintain a healthy lifestyle. For certain medical problems, such as congestive heart failure, weight should be monitored daily.

YOU ARE THE MOST IMPORTANT FACTOR IN YOUR RECOVERY.

Follow the above instructions carefully. Take your medicines as prescribed. Most important, see a doctor again as discussed.

If you have problems that we have not discussed, or your problem changes or gets worse, Call or visit your doctor right away. If you cannot reach your doctor, return to the Emergency Department immediately.

Centegra Health System is very concerned about your safety and well being. As part of our efforts to always provide very good care, any medications you received during this visit were reconciled with medication you are currently taking. This reconciliation was based on the information you or your representative provided regarding your current medications and allergies.

"I have received this information and my questions have been answered. I have discussed any challenges I see with this plan with the nurse or physician."

Home Care Instructions

IMPORTANT: We examined and treated you today on an emergency basis only. This was not a substitute for, or an effort to provide, complete medical care. In most cases, you must let your doctor check you again. Tell your doctor about any new or lasting problems. We cannot recognize and treat all injuries or illnesses in one Emergency Department visit. If you had special tests, such as EKG's or X-rays, we will review them again within 24 hours. We will call you if there are any new suggestions. You were treated today by: Ford, Apiwat W..

After your visit to our Emergency Department, you may receive a survey in the mail. We want to be sure we have given you very good care and we ask that you please fill out the survey and return it in the mail.

After you leave, please follow the instructions below.

This Information Is About Your Follow Up Care

Call as soon as possible to make an appointment to see your doctor in 10 days for suture removal. You can reach your doctor by calling their clinic phone number.

Please return to the Emergency Department in 10 days for suture removal if you would prefer to have the sutures removed in the ER. We do recommend that you follow-up with your Primary Care Physician but you can return to the ER for removal of your stitches if you choose..

This Information Is About Your Illness and Diagnosis

WOUND CARE (with stitches)
Your wound was closed with stitches. These are small threads that keep the skin closed to help it heal. You have 3 internal and 11 external stitches. These should be removed in 10 days.

At home, please follow these instructions:
- Wash your hands before touching the dressing or wound.
- Keep the wound clean and dry.
- After 2 days, wash the wound gently with warm water and soap. Pat it dry.
- Put a light dressing on it if it rubs or there is drainage.

Call your doctor if:
- you have redness, pain, or swelling in the area of your stitches.
- your wound drains pus.
- your stitches come out before your wound is healed.
- you have any new or bothersome symptoms.

This is Information About Your New Medications - Start taking as prescribed.

HYDROCODONE and ACETAMINOPHEN (Vicodin, Vicodin ES, Lortab, Lortab elixir, Zamicet, Norco, Zydone, Anexsia, Anolor, Bancap HC)

Take this medicine by mouth with food in the following dose: one 10mg/325mg tablet every 4 to 6 hours if needed for pain. Do not take more than as directed per day (24 hours).

This is a mixture of medicines (hydrocodone and acetaminophen) used to relieve moderate to severe pain. This medicine may be used for other reasons, as prescribed by your doctor.

Side effects may include:
- sleepiness or dizziness
- upset stomach, nausea or vomiting

Other side effects may occur, but are not as common. Allergy would show up as: **rash or itching, facial or throat swelling, wheezing or shortness of breath.** This medicine can be habit forming if used for a long period of time.

Follow these instructions:
- Never take more of this medicine than prescribed. Too much acetaminophen in your body can cause liver damage.
- Read the labels of non-prescription medicines before taking them. Many contain acetaminophen. To avoid an overdose, do not take any other medicines that contain acetaminophen.
- Talk to your doctor or pharmacist before taking medicines for sleep, colds or allergies. Severe drowsiness may occur.
- Do not share this medicine with others as this medicine is a controlled-substance. Sharing this medicine with others is against the law.
- To avoid constipation while taking this medicine:
  - Drink plenty of liquids. Try to drink 8 to 10 eight-ounce glasses of water or juice each day.
  - Include extra fiber in your diet.
  - Exercise daily.
- Watch for signs of dependence:
  - feeling that you "cannot live without this medicine".
  - you need more of this medicine than before to get the same relief.
- Do not drink alcohol, drive or operate machinery until you know how this medicine affects you.
- Store this medicine away from heat, moisture or direct light.
- If you are taking this on a regular schedule and you miss a dose, take it as soon as possible. If it is almost time for your next dose, skip the missed dose and return to your regular schedule. Do not double the doses.
- **Talk with your doctor before taking any other medicines (including vitamins and herbals) as you may require additional monitoring.**

Call your doctor if you have:
- any sign of dependence or allergy.

Side effects may include:

- diarrhea
- upset stomach, nausea or vomiting

Other side effects may occur, but are not as common. An upset stomach is not a sign of allergy. Allergy would show up as **rash or itching, facial or throat swelling, wheezing or shortness of breath**.

Follow these instructions:

- Space your medicine doses evenly throughout the day. This medicine works best if there is a constant amount in your blood.
- Take this medicine **with food** to avoid an upset stomach.
- Swallow the capsule and tablet form of this medicine whole with a full 8-ounce glass of water.
- For diabetics, this medicine can cause false test results when testing your urine for sugar. Talk with your doctor if you have questions.

- Store the tablet or capsule form of this medicine away from heat, moisture or direct light.
- Store the liquid form of this medicine in the refrigerator. Shake the liquid well before each use.
- If you miss a dose, take it as soon as possible. If it is almost time for your next dose, skip the missed dose. Do not double the doses.

  - ongoing diarrhea
  - stomach pain or cramping
  - blood or mucus in your bowel movements
- any new or bothersome symptoms.

SMOKING CESSATION

Smoking is the nation's leading preventable cause of death. It significantly increases the risk of coronary heart disease, stroke and cancer. In fact, more than half of all smoking related deaths in America each year are from heart disease, stroke, or other cardiovascular diseases. The good news is, that one year after quitting, the risk of heart disease is cut in half. After five to fifteen smoke-free years, the risk is that of a person who never smoked!

If you or someone you love is interested in quitting, consider joining our "Freedom From Smoking "classes for adults. Centegra Health System and the McHenry County Department of Health have partnered together to bring you an effective program that will help you quit smoking. Call 877-CENTEGRA, (877-236-8347) for more information regarding this program. To speak with a counselor immediately, call the Illinois Tobacco line at 1-866-QUIT-YES.

PAIN MANAGEMENT AFTER DISCHARGE:

A person may feel less pain just by being in familiar surroundings. Here are some frequently asked questions about your pain management:

- What can I do to help my pain management? A person's level of relaxation and their environment can affect their pain. If you are tired, over stimulated (too many visitors) are anxious about your diagnosis, or a past experience with a hospitalization, your pain perception may be impacted and your tolerance decreased. Ask questions, and inform us about any problems or concerns that you may have, re: pain. Partner with your health team for your best pain management.
- What if the medication is not working? Tell your health-care provider; physician, home health nurse, etc. You may need a different dose or type of medicaton.
- What if I feel I'm not getting enough pain control? Talk to your physician or home health nurse about it. Together you may be able to develop a plan to prevent or ease your pain. Depending on the cause of your pain, your health-care provider may suggest exercise, use of heat/cold, massage, repositioning, immobilization of the affected part, or distraction such as music or rest.
- There are other methods of pain management. Let your health-care provider assist you in finding the best one for you.

Weight management is one step to help maintain a healthy lifestyle. For certain medical problems, such as congestive heart failure, weight should be monitored daily.

YOU ARE THE MOST IMPORTANT FACTOR IN YOUR RECOVERY.

Follow the above instructions carefully. Take your medicines as prescribed. Most important, see a doctor again as discussed.

If you have problems that we have not discussed, or your problem changes or gets worse, Call or visit your doctor right away. If you cannot reach your doctor, return to the Emergency Department immediately.

Centegra Health System is very concerned about your safety and well being. As part of our efforts to always provide very good care, any medications you received during this visit were reconciled with medication you are currently taking. This reconciliation was based on the information you or your representative provided regarding your current medications and allergies.

"I have received this information and my questions have been answered. I have discussed any challenges I see with this plan with the nurse or physician."

RE: Paul Dulberg

Dear Mr. Mast,

Mr. Dulberg was previously seen by my associate, Dr. Mitchell Grobman, in 2002 for left ulnar neuropathy, and had surgery and essentially became asymptomatic by 2007 and who had never had difficulty in his right arm. Approximately a month prior to the evaluation, he had been holding a branch for a neighbor when the chainsaw came up and cut his right forearm. He was taken to Northern Illinois Medical Center where they put in inner stitches in the muscle and outer stitches. He originally had very significant pain, but as the pain was getting better, he started noticing that he had numbness in his fifth digit in the inner aspect of his forearm. He had not been dropping things. It was mostly just a tingling and a numb feeling. He denies ever having any right-sided symptoms or right-sided injuries. His examination was significant for a healing scar in the right forearm and for decreased light touch, pinprick, and temperature sensation in the ulnar distribution of the right arm. His strength was normal. Given the distribution, it was felt that this was a branch neuropathy to the sensory nerves. I did have him undergo nerve conductions to make sure that the median and ulnar nerves were all without involvement and they were. I recommended that he see a hand surgeon as well just to be certain that there were no other treatment options for him; however, most likely this was just a sensory branch neuropathy that may improve or may result in permanent numbness in the distribution that he was showing numbness. Mr. Dulberg should followup if any additional symptoms develop or if he wished to try any neuropathic pain treatment if it became painful and not just numb.

Sincerely,

Karen Levin, MD (mdm)

The patient was in the office today for evaluation of left elbow. He is doing well. His arm is feeling much better. The strength in his hand has improved dramatically. He is very pleased with the results of his surgery. He does not report any paresthesias in his hand.

PHYSICAL EXAMINATION: The left elbow scar is stable. Range of motion is full. Sensation around the scar is decreased as expected. This should improve with time. Intrinsic strength is 5/5. Pulp-to-palm distance is 0. Sensation is intact in all distributions.

TREATMENT PLAN: He will continue home exercises as directed by the therapist. He may resume use of his left hand for activities as tolerated. He was cautioned to limit heavy lifting activities if any symptoms arise.

He did not wish to schedule a follow-up appointment. He was invited to return back to the office at his discretion if any further problems or concerns arise. Follow-up PRN. Work status is no restriction.

NEXT VISIT: PRN.

CHART NOTES

The patient was in the office today for evaluation of left elbow. He is doing okay. Overall, his ulnar nerve symptoms have improved. He still has intermittent medial elbow pain and paresthesias associated with movement of his elbow. He is concerned about the persistent snapping of the ulnar nerve.

PHYSICAL EXAMINATION: Left elbow scar is stable. The ulnar nerve is nontender. There is no Tinel's sign. Range of motion is full. Sensation is intact distally. Intrinsic strength is normal. There is marked left ulnar nerve subluxation at the cubital tunnel.

TREATMENT PLAN: I reviewed the clinical findings. The patient's questions were answered. Treatment options were discussed.

Additional surgery may be indicated to address the ulnar nerve instability. Options would include ulnar nerve transposition or medial epicondylectomy. The timing of additional surgery would be elective, and I believe observation is appropriate at this time.

I asked the patient to obtain a second opinion regarding additional surgery. Follow up for second opinion with HSA M.D. Work status is no restriction.

NEXT VISIT: After second opinion.

CHART NOTES

The patient was in the office today for evaluation of left elbow. The history is as given by Dr. Sagerman.

PHYSICAL EXAMINATION: On examination, his symptoms are reproduced with elbow flexion and extension with subluxation of the ulnar nerve.

The soft tissues are soft. I don't think that there would be a problem with proceeding with a second surgery at this point.

Because his symptoms are present both at rest, though aggravated with flexion extension, it may be that an epicondylectomy would not be enough. I would favor a submuscular transposition and have reviewed reasonable expectations of outcome of such a surgery with Mr. Dulberg as well as potential risks and complications. He believes that he would proceed and I have discussed this

RE: Paul Dulberg
O/V: 9/11/03

Dear Dr. Grobman:

I had the opportunity to examine your patient, Paul Dulberg, concerning his left arm. He reports persistent numbness and tingling in the ulnar nerve distribution of the left hand following a motor vehicle accident which occurred in March, 2002. He has had conservative treatment including injections, medications and therapy. A nerve conduction study from May, 2002 and repeat study in December, 2002 showed evidence of ulnar neuropathy at the elbow.

PHYSICAL EXAMINATION: Examination in the left arm shows positive Tinel sign at the cubital tunnel with local sensitivity. Range of motion is full. Sensation is diminished in the ulnar nerve distribution. There is slight weakness of the intrinsic muscles and positive Froment's sign. There is no visible atrophy. Circulation is normal distally.

X-RAY EXAMINATION: X-rays of the left elbow are negative.

IMPRESSION: Left cubital tunnel syndrome.

TREATMENT PLAN: I explained the diagnosis and treatment options. Surgery is indicated on an elective basis for cubital tunnel release. The patient requested to proceed with surgery. This may be scheduled at his convenience.

Thank you for the opportunity to participate in his care.

Sincerely,

Scott D. Sagerman, M.D.

DSC OPERATIVE REPORT

DATE OF OPERATION: 03/10/2004

PREOPERATIVE DIAGNOSIS: Recurrent left ulnar neuritis at the cubital tunnel with ulnar nerve subluxation.

POSTOPERATIVE DIAGNOSIS: Recurrent left ulnar neuritis at the cubital tunnel with ulnar nerve subluxation.

PROCEDURE: Revision of left ulnar neurolysis at the cubital tunnel with anterior transposition.

SURGEON: Scott D. Sagerman, MD

ASSISTANT: John R. Ruder, MD

ANESTHESIA: General.

COMPLICATIONS: None.

TOURNIQUET TIME: 1 hour and 10 minutes.

OPERATIVE FINDINGS: The patient developed symptomatic ulnar nerve subluxation at the cubital tunnel with recurrent ulnar neuritis following previous cubital tunnel release surgery. Exploration revealed marked instability of the ulnar nerve which easily subluxated anterior to the medial epicondyle with elbow flexion. Scar formation was present surrounding the ulnar nerve within the cubital tunnel.

TECHNIQUE: Consent was signed by the patient, and he was taken to the operating room. General anesthesia was given. The left arm was prepped and draped sterilely. A sterile tourniquet was applied to the upper arm and inflated following exsanguination of the limb.

The previous longitudinal scar over the cubital tunnel was incised at the posteromedial aspect of the elbow, and the incision was extended proximally and distally in longitudinal fashion for additional exposure. Under loupe magnification, the subcutaneous tissue was dissected. The branches of the medial antebrachial cutaneous nerve were identified, dissected, and retracted safely. The skin flaps were elevated, and the ulnar nerve was exposed.

Neurolysis was performed to mobilize the ulnar nerve from surrounding scar tissue. The release was carried proximally and to the upper arm. The medial intermuscular septum was excised. The arcade of Struthers were absent. The release was then carried distally into the flexor/pronator musculature. The aponeurosis was divided to mobilize the ulnar nerve. The articular branch had to be divided to allow adequate mobility of the ulnar nerve for anterior transposition. Small horizontal vessels were ligated and divided, preserving the longitudinal blood supply to the ulnar nerve.

The ulnar nerve was then transposed to the medial epicondyle, assuring a straight line course of the nerve. There was no kinking of the nerve either proximally or distally. The transposition was then stabilized using submuscular flap. The flexor/pronator muscle fascia was incised to create a Z-plasty, permitting lengthening of the muscle fascia. The muscle fibers were then divided, with ligation of perforating vessels. The ulnar nerve was placed in the submuscular position, maintaining a thin layer of muscle fibers deep to the nerve. The fascia was then reapproximated in a lengthened position using 3-0 Vicryl sutures, maintaining the ulnar nerve in the transposed position without excessive tension on the nerve. The elbow was taken through a range of motion, and the nerve showed excellent gliding with no visible angulation of the nerve.

The field was irrigated with antibiotic solution. One free end of a cutaneous nerve branch was identified. This was placed deep to the medial arm fascia which was sutured with Vicryl, to prevent symptomatic neuroma formation.

The subcutaneous tissue was reapproximated with buried 5-0 Vicryl sutures, and the skin edges were reapproximated with 5-0 nylon sutures. A sterile bulky gauze dressing was applied followed by posterior plaster splint to maintain the elbow in a flexed position. The patient was awoken, extubated, and transported to the recovery room in stable condition. He tolerated the procedure well. There were no complications.

Scott D. Sagerman, MD

OPERATIVE REPORT

Preoperative Diagnosis:
Left cubital tunnel syndrome.

Postoperative Diagnosis:
Same.

Operation Performed:
Left cubital tunnel release.

Surgeon: Scott Sagerman, M.D.
Anesthesia: General.
Complications: None.
Tourniquet Time: 38 minutes.

OPERATIVE FINDINGS: The left ulnar nerve showed obvious constriction at the distal aspect of the cubital tunnel beneath the cubital tunnel ligaments. The ligament was thickened with several bands of deep layers over the area of nerve compression. The floor of the cubital tunnel was clear. The ulnar nerve did subluxate slightly over the medial epicondyle at end range of flexion. There was no arcade of Struthers.

PROCEDURE: Consent was signed by the patient, taken to the operating room, general anesthesia was administered. The left arm was prepped and draped sterilely. A tourniquet was inflated on the upper arm following exsanguination of the limb. A longitudinal incision was made over the cubital tunnel at the posteromedial aspect of the left elbow. Under loupe magnification the subcutaneous tissues dissected, superficial veins were ligated with bipolar cautery. Branches of the medial interbrachial cutaneous nerve were identified. These were dissected and gently retracted safely using a vessel loop. The fascia was incised proximal to the cubital tunnel to expose the ulnar nerve. The nerve was dissected distally by dividing the cubital tunnel ligament, until the nerve entered the flexor/pronator fascia of the proximal forearm. The fascia was incised distally and motor branches of the ulnar nerve were seen with normal perineural fat at this level. Proximally, the nerve was dissected by dividing the arm fascia for a distance of 10 cm proximal to the epicondyle.

The ulnar nerve was inspected, adhesions around the nerve were divided with gentle blunt dissection. The nerve was noted to be constricted at the distal aspect of the cubital tunnel. Following neurolysis, tendon gliding was found to be satisfactory with elbow motion. No other areas of nerve compression were seen.

The field was irrigated with antibiotic solution. The vessel loop was removed. The subcutaneous tissues were reapproximated with 5-0 Vicryl undyed buried sutures. The skin edges were reapproximated with 5-0 and 6-0 nylon sutures. A sterile bulky compressive dressing was applied. The tourniquet was deflated, circulation returned to the left hand with normal capillary refill. The patient was

awoken and transported to the recovery room in stable condition. The patient tolerated the procedure well, there were no complications.

RE: PAUL DULBERG
OV: 02/27/2012

Dear Dr. Sek:

On February 27, 2012, I evaluated your patient, Mr. Paul Dulberg, concerning his right arm. He sustained a laceration of his forearm from a chainsaw accident on June 28, 2011. He developed symptoms of numbness in the small finger with weakness. He was treated with therapy. He had an EMG test and MRI scan.

PAST MEDICAL HISTORY: Remarkable for arthritis and cervical disc disease

MEDICATIONS: Naproxen, Tramadol, Cyclobenzoprine, Flexetine.

PHYSICAL EXAMINATION: The right forearm shows a 7 cm. transverse scar at the ulnar aspect of the mid forearm. There is local tenderness and sensitivity to percussion with a positive Tinel sign and paresthesias radiating into the small finger. There is also sensitivity at the cubital tunnel region. Wrist and elbow motion are unrestricted. There is no visible atrophy. He is unable to adduct the small finger. Flexion strength is grossly normal. Sensation is decreased to light touch in the small finger only with inconsistent two point discrimination.

X-RAY EXAMINATION: Outside films of the right forearm from June 20, 2011 were reviewed. There is no fracture or foreign body.

MRI films of the right forearm from February 3, 2012 were reviewed. No abnormality is seen.

A nerve conduction study by Dr. Levin from August 10, 2011 shows no evidence of diffuse neuropathy.
Sparing Nerve damage.

IMPRESSION: Right forearm laceration with probable partial ulnar nerve injury.

TREATMENT PLAN: I explained the diagnosis. For further evaluation, the patient was referred for additional electrodiagnostic testing including an EMG.

Occupational therapy reports were reviewed.

I explained the potential indication for surgery for nerve exploration, pending review of the electrical study.

He will follow-up after the EMG. Work status is no restriction.

If you have any further questions regarding Mr. Paul Dulberg, please feel free to contact me.

Sincerely,

Scott D. Sagerman, M.D.

CHART NOTE:
The patient was in the office today for evaluation of the right hand. He reports no change in his symptoms.

He had an EMG test by Dr. Levin, and the report from March 13, 2012 shows no evidence for neuropathy. The EMG portion showed no denervation, and ulnar nerve conduction was within normal limits.

PHYSICAL EXAMINATION: The right forearm scar is stable and nontender. There is sensitivity to percussion with a positive Tinel sign at the ulnar aspect of the scar. Adduction of the small finger remains limited consistent with a positive Wartenberg's sign.

TREATMENT PLAN: I explained the findings of the EMG test. Treatment options were given. He does not wish to pursue any surgery at this time.

A therapy referral was given for strengthening exercises and scar management.

NEXT VISIT: Six weeks or PRN.

CHART NOTE:
The patient was in the office today for evaluation of the right arm. He reports persistent pain with use of his arm, especially gripping activities. He has had additional therapy which has been beneficial. He reports no change in his symptoms of numbness which is not bothersome. However, his function is limited due to his pain symptoms.

PHYSICAL EXAMINATION: The right forearm scar is tender at the ulnar aspect with a positive Tinel sign and local sensitivity. Composite finger flexion is full. There is no triggering or locking, there is no clawing. Wartenberg sign is positive. Intrinsic strength is slightly weak.

TREATMENT PLAN: I reviewed the diagnosis and treatment options. The possible surgical indication for ulnar nerve neurolysis was discussed. Before deciding on surgery, the patient will contact Dr. Levin for discussion of medication to address his nerve-related pain symptoms.

He will also see Dr. Biafora for a second opinion regarding possible surgical intervention.

CHART NOTE:
The patient was seen in the office today for evaluation of the right upper extremity. Mr. Dulberg is a patient of Dr. Sagerman's who presents today for a second opinion, referred by Dr. Sagerman. Briefly, Mr. Dulberg is a 41 year old, right hand dominant male who on June 28, 2011 sustained a chain saw injury to the right forearm. The patient states that he was told he had a partial nerve injury in the emergency room. Today, he reports some weakness in his right hand. He reports numbness in his right small and ring fingers at rest with occasional tingling. He also reports occasional shooting, burning type pain which radiates both proximally and distally from the area of the injury in the proximal forearm. This occurs several times a day at rest and more predictably with use. He denies ny previous injuries. He has undergone electrodiagnostic tests in the recent past. He was recently seen by Dr. Levin a few days ago and has been taking Neurontin over the past couple of days. The patient is currently applying for disability, secondary to his injury as he states that he is unable to perform his previous work activities.

PAST MEDICAL HISTORY: Arthritis, migraine headaches.

PAST SURGICAL HISTORY: Ulnar nerve decompression at the elbow with anterior transposition.

MEDICATIONS: Neurontin, Naproxen, Flexitine, Tramadol, Cyclobenzoprine.

ALLERGIES: No known drug allergies.

SOCIAL HISTORY: He smokes one pack of cigarettes per day.

PHYSICAL EXAM: Examination of the right upper extremity – elbow motion is from 0 to 140 degrees with full forearm rotation which is painless. There is a positive Tinel at the cubital tunnel through to approximately several centimeters distal to this. There is a transverse swelling and a healed scar, several millimeters in length in the proximal third of the forearm on the ulnar side. There is a positive Tinel over the scar at the most volar radial aspect of the scar. There is also significant tenderness at the scar to deep palpation on its most ulnar and distal border near the ulna. The Tinel over the most volar and radial aspect of the scar radiates into the ulnar digits. Moving two point discrimination in the small finger is 6-7 mm. There appears to be good strength to first dorsal

Interosseous testing. Negative Froment's sign. Positive Wartenberg's. Full digital motion. He has good strength to DIP flexion of the small and ring fingers. There is pain at the scar on its most dorsal and ulnar border with resisted DIP flexion of the small finger. FCU function also appears to be intact, also eliciting pain at the scar. Electrodiagnostic studies dated March 13, 2012 has been reviewed.

ASSESSMENT: Approximately one year status post right forearm laceration with likely partial ulnar nerve injury, with ulnar nerve neuritis.

PLAN: The nature of the patient's condition has been explained in detail. All of his questions were answered. The patient may benefit from an ulnar nerve exploration with neurolysis. I would recommend this also include a cubital tunnel decompression with possible anterior transposition. He understands that this will not likely improve the motor deficits in his hand, however, it may improve he pain to his forearm. An ulnar nerve repair of a partial laceration is unlikely at this point. He also has a separate and distinct tenderness in the most dorsal ulnar aspect of the wound. He may require exploration of this portion of the scar as well. The patient would like some time to think about this. He will continue to be treated with the Neurotin under the neurologist. He will follow-up with Dr. Sagerman in four weeks.

NEXT VISIT: Four weeks.

CHART NOTE:
The patient was in the office today for evaluation of the right elbow. He reports no change in his symptoms despite medication. He has side effects from the medication which interfere with functioning. He would like to proceed with surgery which was discussed with Dr. Biafora previously. He had additional therapy, but this was discontinued due to lack of progress.

PHYSICAL EXAMINATION: Examination of the right elbow and forearm is unchanged. A positive Tinel sign is present at the cubital tunnel without ulnar nerve subluxation. The forearm scar is stable with tenderness and sensitivity to percussion. He indicates pain with gripping activities localized to the forearm region and resulting in increased numbness in his ring and small fingers with weakness of his grip.

TREATMENT PLAN: I reviewed the diagnosis and treatment options. The surgical indication was discussed. Informed consent was obtained for the procedure. He understands the risks, benefits and possible complications of surgery as well as the expected outcome. The prognosis is guarded in terms of symptom improvement. However, he feels that any improvement in symptoms would be beneficial in terms of his arm functioning.

He was advised to contact the neurologist to report his symptoms associated with the use of Neurontin medication. Medical clearance will be obtained from his primary care physician before surgery is scheduled.

NEXT VISIT: After surgery.

DSC OPERATIVE REPORT

DATE OF OPERATION: 07/09/2012

PREOPERATIVE DIAGNOSES:
1. Right cubital tunnel syndrome.
2. Right ulnar nerve injury at the forearm.

POSTOPERATIVE DIAGNOSES:
1. Right cubital tunnel syndrome.
2. Right ulnar nerve injury at the forearm.

PROCEDURES:
1. Right cubital tunnel release.
2. Right ulnar neurolysis at the forearm.

SURGEON: Scott Sagerman, MD.

ASSISTANT: Sam Biafora, MD.

ANESTHESIA: Regional block.

COMPLICATIONS: None.

TOURNIQUET TIME: 1 hour.

FINDINGS: The right cubital tunnel showed thickening of the cubital tunnel ligament with scarring of the ulnar nerve to the floor of the cubital tunnel and local constriction. The nerve also appeared constricted at the flexor pronator aponeurosis at the distal aspect of the cubital tunnel. Also, a thick arcade of Struthers was present proximal to the cubital tunnel, though the ulnar nerve was not visibly constricted at this level.

The right forearm, the site of the previous chainsaw laceration revealed extension to the subcutaneous tissue and fascia overlying the flexor carpi ulnaris muscle. A piece of retained absorbable suture material was present. The muscle fibers were intact. The ulnar nerve was intact beneath the muscle belly. There was no visible scarring around the ulnar nerve at this level.

DESCRIPTION OF PROCEDURE: Informed consent was obtained from the patient. Prophylactic IV antibiotic was given. He received medical clearance from his primary care physician. Regional block anesthetic was administered by the

anesthesiologist in the right upper extremity. The right arm was prepped and draped sterilely. A sterile tourniquet was applied to the right upper arm, and it was elevated following exsanguination of the limb.

A longitudinal incision was made over the posteromedial aspect of the right elbow centered at the cubital tunnel. Under loupe magnification, the subcutaneous tissue was dissected. Superficial veins were ligated with bipolar cautery. A branch of the medial antebrachial cutaneous nerve was identified. This was gently retracted safely and protected. The fascia was incised proximal to the cubital tunnel, and the ulnar nerve was visualized. The cubital tunnel ligament was divided and completely released. The flexor pronator aponeurosis was also incised and released, and the nerve was dissected distally into the musculature where motor branches were identified. The release was then carried proximally, and the arcade of Struthers was divided and completely released. The ulnar nerve was inspected. The nerve was mobilized from adhesions with gentle blunt dissection. Nerve gliding was checked and found to be satisfactory. The ulnar nerve was stable at the cubital tunnel. The field was irrigated with antibiotic solution. The subcutaneous tissue was reapproximated with buried Vicryl sutures, and the skin edges were reapproximated with nylon sutures.

Attention was then directed to the forearm scar. A longitudinal incision was made over the ulnar aspect of the mid forearm centered at the site of the scar. Under loupe magnification, the subcutaneous tissue was dissected. The fascia was visualized. Superficial vein was ligated with bipolar cautery. The dermis was elevated off of the scarred fascia with blunt dissection. The retained suture material was removed. The muscle fibers were visualized and found to be in continuity. The ulnar nerve was exposed in the interval between the flexor digitorum and flexor carpi ulnaris muscle bellies. The nerve was dissected proximal and distal from the region of the laceration. The nerve was completely intact at this level with no visible scarring or adhesions. The field was irrigated with antibiotic solution. The subcutaneous tissue was reapproximated with buried Vicryl sutures, and the skin edges were reapproximated with nylon sutures.

A sterile bulky gauze dressing was applied. The tourniquet was deflated. Circulation returned to the right arm
with normal capillary refill distally. The patient was transported to recovery in stable condition. He tolerated the procedure well. There were no complications. An arm sling was applied for protection.

The patient was in the office today for evaluation of left elbow. He is doing well. His elbow feels better following therapy.

He has intermittent soreness in his right forearm area.

PHYSICAL EXAMINATION: The left elbow shows minimal tenderness at the lateral epicondyle. The skin is intact. Range of motion is full. There is slight pain with resisted wrist extension. There is no weakness.

The right forearm scar is stable. There is mild sensitivity at the most ulnar aspect.

TREATMENT PLAN: He will continue therapy and home exercises for the left elbow epicondylitis protocol. Continued improvement is expected over time. It does not appear that any invasive treatment is needed.

For the right forearm scar, a padded elbow sleeve was provided for protection.

He may return for follow up on an as-needed basis if symptoms worsen.

NEXT VISIT: PRN.

ACTIVITY/WORK STATUS: Restricted. Limited forceful gripping. Limited lifting/pushing/pulling.

Open Advanced MRI

PATIENT:	DULBERG, PAUL	PHYSICIAN:	LEVIN, MD, KAREN
MRN:	1585839	EXAM:	MR FOREARM W/ AND W/O 73220
DOB:	03/19/1970	DOS:	02/03/2012

EXAMINATION: MRI examination of the right forearm without and with intravenous contrast infusion..

CLINICAL HISTORY: History of right forearm trauma with a chainsaw. Possible neuroma, nerve impingement or injury in the forearm. Possible tendon disruption. It appears that the patient had some difficulty holding still during image acquisition. There is motion artifact on this examination. Weakness in the fourth and fifth fingers. Pain in the forearm and hand.

TECHNIQUE: Multiplanar T1 and T2-weighted spin-echo pulse sequences and STIR sequence. Post-infusion multiplanar T1-weighted sequences were performed. A skin marker was taped to the point of maximal symptoms.

Contrast: 15 cc of gadolinium was infused.

FINDINGS: There is no bone abnormality seen. The bone marrow signal characteristics are normal.

There is no cystic or solid mass appreciated. The visualized muscles have normal signal characteristics.

There is no abnormal soft tissue infiltration or induration. Specifically, in the area of the skin marker which is marking the point of maximal symptoms, there is no soft tissue abnormality appreciated.

There is no abnormality identified along the course of the ulnar nerve in the forearm.

IMPRESSION: There is no forearm abnormality appreciated. This does not exclude the possibility of an ulnar nerve impingement or injury but there is no gross mass or abnormal infiltration along the expected course of the ulnar nerve. No obvious tendon or muscle abnormality appreciated at this time.

Thank you for referring your patient to Open Advanced MRI. If you have any questions, Dr. Levin, please feel free to contact me at my direct line which is: 630.885.2100.

RE: Paul Dulberg

Dear Mr. Mast,

Mr. Dulberg was previously seen by my associate, Dr. Mitchell Grobman, in 2002 for left ulnar neuropathy, and had surgery and essentially became asymptomatic by 2007 and who had never had difficulty in his right arm. Approximately a month prior to the evaluation, he had been holding a branch for a neighbor when the chainsaw came up and cut his right forearm. He was taken to Northern Illinois Medical Center where they put in inner stitches in the muscle and outer stitches. He originally had very significant pain, but as the pain was getting better, he started noticing that he had numbness in his fifth digit in the inner aspect of his forearm. He had not been dropping things. It was mostly just a tingling and a numb feeling. He denies ever having any right-sided symptoms or right-sided injuries. His examination was significant for a healing scar in the right forearm and for decreased light touch, pinprick, and temperature sensation in the ulnar distribution of the right arm. His strength was normal. Given the distribution, it was felt that this was a branch neuropathy to the sensory nerves. I did have him undergo nerve conductions to make sure that the median and ulnar nerves were all without involvement and they were. I recommended that he see a hand surgeon as well just to be certain that there were no other treatment options for him; however, most likely this was just a sensory branch neuropathy that may improve or may result in permanent numbness in the distribution that he was showing numbness. Mr. Dulberg should followup if any additional symptoms develop or if he wished to try any neuropathic pain treatment if it became painful and not just numb.

Sincerely,

Karen Levin, MD (mdm)

HISTORY & PHYSICAL

PATIENT: Dulberg, Paul **AGE:** 41 years old **EXAM DATE:** 12/02/11

CHIEF COMPLAINT: Right forearm pain.

HPI: Patient is a 41-year-old male who is right-hand dominant. He was referred by Dr. Karen Levin, MD, neurology, for evaluation of an injury he sustained to his right medial forearm in June of 2011. He apparently was using a chain saw when he accidentally struck the volar medial aspect of his right forearm in roughly the mid forearm range with a chain saw. He had a large open wound down to muscle. He was seen in the emergency department where the wound is here it at the muscle was sewn together and the skin was closed. He followed up with his primary care provider. He has noted persistent pain which he describes as intermittent and shooting in character radiating from the laceration site. He occasionally has intermittent numbness and tingling in the ring and small finger. He reports grip weakness and no endurance with wrist flexion and gripping. He has not had therapy to date. He did have an EMG/NCS performed by Dr. Levin in August of 2011. Per the patient the study was normal. I do not have that study available at this moment. He currently is not working but is a graphic designer by training. He reports using a computer mouse for 20 minutes causes significant forearm pain.

MEDICATION: Patient has no current medications.
ALLERGIES: nkda
REFERRAL SOURCE: Not Referred By

ILLNESSES: Arthritis

PHYSICAL EXAM:

Report Date: June 21, 2012 **Patient:** Dulberg, Paul R **DOS:** 12/02/11

Vitals: **No data for Vitals.**

Appearance: No distress, good color on room air. Alert and cooperative.

Skin: Bilateral upper extremities: no open wounds or skin changes.

Neuro: Bilateral upper extremities: Median, radial and ulnar nerves are motor and sensory intact. Light touch intact all digits, no weakness or wasting.

Vascular: Bilateral upper extremities: palpable radial pulses and brisk capillary refill.

Focused Exam: Examination of his right upper extremity reveals his elbow has normal painless range of motion. No focal tenderness to palpation. Collateral ligaments are stable. His forearm compartments are soft. He has a well-healed transverse laceration on the volar medial mid forearm level. There is no erythema, drainage, or fluctuance at the level of the laceration. There is no tenderness to palpation at the laceration site. There is some apparent muscle incongruity. Distally his hand demonstrates no atrophy. He has 5 out of 5 intrinsic strength. 5 out of 5 APB strength. He can make a full fist with full extension of all digits. He does not demonstrate a clawed posture. He has a negative Froment sign. He has a positive Wartenberg sign. Wrist flexion and extension is 5 out of 5 strength. He has a palpable FCU and ECU tendons at the level of the wrist. They have appropriate tension.

IMAGING: None today.

ASSESSMENT:

DIAGNOSIS: 906.1-LATE EFFECT OPEN WND EXTREM

PROCEDURES: 99203-NEW Detailed, Low Complexity

PLAN:

Plan: I reviewed findings, treatment options, and recommendations with the patient concerning the forearm complaints he has. I would like to see the official report of the EMG/NCS. We will obtain this report. There is no evidence of a complete injury to his ulnar nerve on physical exam. His complaints are likely muscular in origin. He may have some superficial sensory complaints as well. I do not think he needs any surgical intervention at this time. I did recommend and provided him with a prescription for occupational therapy to work on strengthening and conditioning of the forearm muscles. They can also perform some pain control modalities. I would like to see him back in 4-6 weeks' time to see if therapy is of some assistance to him. I will contact him by phone if his EMG is significantly abnormal. Otherwise we will discuss it at the next followup visit. Patient was in agreement with the plan.

Prescription: No data for Prescription

Work Status: Not applicable.

I saw the patient a proximally one month ago recommended a course of occupational therapy. He has attended one or 2 sessions thus far. I also obtained and the EMG nerve conduction study to review. He also asked me about disability paperwork.

ASSESSMENT & PLAN:

Plan: I reviewed findings, treatment options, and recommendations with the patient concerning the forearm complaints he has. I reviewed the EMG/NCS which is a normal study. There is no evidence of ulnar nerve injury. Given the location of his injury this is the only significant problem I can imagine from this wound. There is no evidence of any nerve or tendon injury. He may have some residual soreness and some superficial sensory abnormalities but this should improve over time. Our recommendation is simply continued therapy. No need for surgical intervention that I can foresee. Unfortunately do not have anything further to offer the patient at this time. I would be happy to see him back in the future on an as needed basis.

HISTORY & PHYSICAL

PATIENT: Dulberg, Paul **AGE:** 41 years old **EXAM DATE:** 12/02/11

CHIEF COMPLAINT: Right forearm pain.

HPI: Patient is a 41-year-old male who is right-hand dominant. He was referred by Dr. Karen Levin, MD, neurology, for evaluation of an injury he sustained to his right medial forearm in June of 2011. He apparently was using a chain saw when he accidentally struck the volar medial aspect of his right forearm in roughly the mid forearm range with a chain saw. He had a large open wound down to muscle. He was seen in the emergency department where the wound is here it at the muscle was sewn together and the skin was closed. He followed up with his primary care provider. He has noted persistent pain which he describes as intermittent and shooting in character radiating from the laceration site. He occasionally has intermittent numbness and tingling in the ring and small finger. He reports grip weakness and no endurance with wrist flexion and gripping. He has not had therapy to date. He did have an EMG/NCS performed by Dr.Levin in August of 2011. Per the patient the study was normal. I do not have that study available at this moment. He currently is not working but is a graphic designer by training. He reports using a computer mouse for 20 minutes causes significant forearm pain.

MEDICATION: Patient has no current medications.
ALLERGIES: nkda
REFERRAL SOURCE: Not Referred By

ILLNESSES: Arthritis

PHYSICAL EXAM:

Vitals: **No data for Vitals.**
Appearance: No distress, good color on room air. Alert and cooperative.
Skin: Bilateral upper extremities: no open wounds or skin changes.
Neuro: Bilateral upper extremities: Median, radial and ulnar nerves are motor and sensory intact. Light touch intact all digits, no weakness or wasting.
Vascular: Bilateral upper extremities: palpable radial pulses and brisk capillary refill.
Focused Exam: Examination of his right upper extremity reveals his elbow has normal painless range of motion. No focal tenderness to palpation. Collateral ligaments are stable. His forearm compartments are soft. He has a well-healed transverse laceration on the volar medial mid forearm level. There is no erythema, drainage, or fluctuance at the level of the laceration. There is no tenderness to palpation at the laceration site. There is some apparent muscle incongruity. Distally his hand demonstrates no atrophy. He has 5 out of 5 intrinsic strength. 5 out of 5 APB strength. He can make a full fist with full extension of all digits. He does not demonstrate a clawed posture. He has a negative Froment sign. He has a positive Wartenberg sign. Wrist flexion and extension is 5 out of 5 strength. He has a palpable FCU

and ECU tendons at the level of the wrist. They have appropriate tension.

IMAGING: None today.

ASSESSMENT:

DIAGNOSIS: 906.1-LATE EFFECT OPEN WND EXTREM

PROCEDURES: 99203-NEW Detailed, Low Complexity

PLAN:

Plan: I reviewed findings, treatment options, and recommendations with the patient concerning the forearm complaints he has. I would like to see the official report of the EMG/NCS. We will obtain this report. There is no evidence of a complete injury to his ulnar nerve on physical exam. His complaints are likely muscular in origin. He may have some superficial sensory complaints as well. I do not think he needs any surgical intervention at this time. I did recommend and provided him with a prescription for occupational therapy to work on strengthening and conditioning of the forearm muscles. They can also perform some pain control modalities. I would like to see him back in 4-6 weeks' time to see if therapy is of some assistance to him. I will contact him by phone if his EMG is significantly abnormal. Otherwise we will discuss it at the next followup visit. Patient was in agreement with the plan.

Prescription: No data for Prescription

Work Status: Not applicable.

I saw the patient a proximally one month ago recommended a course of occupational therapy. He has attended one or 2 sessions thus far. I also obtained and the EMG nerve conduction study to review. The patient reports no improvement in symptoms. He thinks that therapy is not helpful. He feels he is getting weaker. He feels burning in the forearm region. He also asked me about disability paperwork.

He can make a full fist and has full extension of all digits. He has no intrinsic or thenar atrophy. He has 5/5 APB and intrinsic strength. He has a negative Froment sign. He does have a positive Wartenberg sign. FDP to the small finger is 5/5.

DIAGNOSIS: 906.1-LATE EFFECT OPEN WND EXTREM
PROCEDURES: 99213-ESTABLISHED Expanded, Low Complexity

ASSESSMENT & PLAN:
Plan: I reviewed findings, treatment options, and recommendations with the patient concerning the forearm complaints he has. I reviewed the EMG/NCS which is a normal study. There is no evidence of ulnar nerve injury. Given the location of his injury this is the only significant problem I can imagine from this wound. There is no evidence of any nerve or tendon injury. He may have some residual soreness and some superficial sensory abnormalities but this should improve over time. Our recommendation is simply continued therapy. No need for surgical intervention that I can foresee. Unfortunately do not have anything further to offer the patient at this time. I would be happy to see him back in the future on an as needed basis.

HISTORY & PHYSICAL

PATIENT: Dulberg, Paul **AGE:** 41 years old **EXAM DATE:** 12/02/11

CHIEF COMPLAINT: Right forearm pain.

HPI: Patient is a 41-year-old male who is right-hand dominant. He was referred by Dr. Karen Levin, MD, neurology, for evaluation of an injury he sustained to his right medial forearm in June of 2011. He apparently was using a chain saw when he accidentally struck the volar medial aspect of his right forearm in roughly the mid forearm range with a chain saw. He had a large open wound down to muscle. He was seen in the emergency department where the wound is here it at the muscle was sewn together and the skin was closed. He followed up with his primary care provider. He has noted persistent pain which he describes as intermittent and shooting in character radiating from the laceration site. He occasionally has intermittent numbness and tingling in the ring and small finger. He reports grip weakness and no endurance with wrist flexion and gripping. He has not had therapy to date. He did have an EMG/NCS performed by Dr.Levin in August of 2011. Per the patient the study was normal. I do not have that study available at this moment. He currently is not working but is a graphic designer by training. He reports using a computer mouse for 20 minutes causes significant forearm pain.

PHYSICAL EXAM:

Vitals: **No data for Vitals.**
Appearance: No distress, good color on room air. Alert and cooperative.
Skin: Bilateral upper extremities; no open wounds or skin changes.
Neuro: Bilateral upper extremities: Median, radial and ulnar nerves are motor and sensory intact. Light touch intact all digits, no weakness or wasting.
Vascular: Bilateral upper extremities: palpable radial pulses and brisk capillary refill.
Focused Exam: Examination of his right upper extremity reveals his elbow has normal painless range of motion. No focal tenderness to palpation. Collateral ligaments are stable. His forearm compartments are soft. He has a well-healed transverse laceration on the volar medial mid forearm level. There is no erythema, drainage, or fluctuance at the level of the laceration. There is no tenderness to palpation at the laceration site. There is some apparent muscle

incongruity. Distally his hand demonstrates no atrophy. He has 5 out of 5 intrinsic strength. 5 out of 5 APB strength. He can make a full fist with full extension of all digits. He does not demonstrate a clawed posture. He has a negative Froment sign. He has a positive Wartenberg sign. Wrist flexion and extension is 5 out of 5 strength. He has a palpable FCU and ECU tendons at the level of the wrist. They have appropriate tension.

IMAGING: None today.

ASSESSMENT:

DIAGNOSIS: 906.1-LATE EFFECT OPEN WND EXTREM

PROCEDURES: 99203-NEW Detailed, Low Complexity

PLAN:

Plan: I reviewed findings, treatment options, and recommendations with the patient concerning the forearm complaints he has. I would like to see the official report of the EMG/NCS. We will obtain this report. There is no evidence of a complete injury to his ulnar nerve on physical exam. His complaints are likely muscular in origin. He may have some superficial sensory complaints as well. I do not think he needs any surgical intervention at this time. I did recommend and provided him with a prescription for occupational therapy to work on strengthening and conditioning of the forearm muscles. They can also perform some pain control modalities. I would like to see him back in 4-6 weeks' time to see if therapy is of some assistance to him. I will contact him by phone if his EMG is significantly abnormal. Otherwise we will discuss it at the next followup visit. Patient was in agreement with the plan.

Prescription: No data for Prescription

ASSESSMENT & PLAN:

Plan: I reviewed findings, treatment options, and recommendations with the patient concerning the forearm complaints he has. I reviewed the EMG/NCS which is a normal study. There is no evidence of ulnar nerve injury. Given the location of his injury this is the only significant problem I can imagine from this wound. There is no evidence of any nerve or tendon injury. He may have some residual soreness and some superficial sensory abnormalities but this should improve over time. Our recommendation is simply continued therapy. No need for surgical intervention that I can foresee. Unfortunately do not have anything further to offer

HOME: 4646 Aden Court

PID: 1002454

CHIEF COMPLAINT: Right forearm pain.

Nurse's Notes: Patient doesn't feel occupation therapy is helping. He complaints of pain/soreness and loss of strength. MT

Referred by: Not Referred By

HPI: Patient is a 41-year-old male who is right-hand dominant. He was referred by Dr. Karen Levin, MD, neurology, for evaluation of an injury he sustained to his right medial forearm in June of 2011. He apparently was using a chain saw when he accidentally struck the volar medial aspect of his right forearm in roughly the mid forearm range with a chain saw. He had a large open wound down to muscle. He was seen in the emergency department where the wound was debrided and the muscle was sewn together and the skin was closed. He followed up with his primary care provider. He has noted persistent pain which he describes as intermittent and shooting in character radiating from the laceration site. He occasionally has intermittent numbness and tingling in the ring and small finger. He reports grip weakness and no endurance with wrist flexion and gripping. He has not had therapy to date. He did have an EMG/NCS performed by Dr.Levin in August of 2011. Per the patient the study was normal.
I saw the patient a proximally one month ago recommended a course of occupational therapy. He has attended one or 2 sessions thus far. I also obtained and the EMG nerve conduction study to review. The patient reports no improvement in symptoms. He thinks that therapy is not helpful. He feels he is getting weaker. He feels burning in the forearm region. He also asked me about disability paperwork.

MEDICAL HISTORY: Arthritis
MEDICATION: naproxen (Dosage: 375 mg Tablet, Delayed Release (E.C.) SIG: Take 1 tablet Oral twice a day Oral Dispense: 90 Refills: 2)
ALLERGIES: nkda
SOCIAL HISTORY Alcohol - Denies
Marital Status: Single
Smoking: current every day smoker

PHYSICAL EXAM:

Appearance: No distress. Alert and cooperative.
Skin: Bilateral upper extremities: no open wounds or skin changes. Well-healed laceration in the mid forearm region right side ulnar aspect. No evidence of infection.
Neuro: Bilateral upper extremities: light touch intact all digits, no weakness or wasting.
Focused Exam: Elbow with full and painless motion in the right side. Forearm compartments are soft there is no obvious deformity. He has preserved wrist flexion and extension strength. He can make a full fist and has full extension of all digits. He has no intrinsic or thenar atrophy. He has 5/5 APB and intrinsic strength. He has a negative Froment sign. He does have a positive Wartenberg sign. FDP to the small finger is 5/5.

IMAGING: None today.

DIAGNOSIS: 906.1-LATE EFFECT OPEN WND EXTREM
PROCEDURES: 99213-ESTABLISHED Expanded, Low Complexity

ASSESSMENT & PLAN:

Plan: I reviewed findings, treatment options, and recommendations with the patient concerning the forearm complaints he has. I reviewed the EMG/NCS which is a normal study. There is no evidence of ulnar nerve injury. Given the location of his injury this is the only significant problem I can imagine from this wound. There is no evidence of any nerve or tendon injury. He may have some residual soreness and some superficial sensory abnormalities but this should improve over time. Our recommendation is simply continued therapy. No need for surgical intervention that I can foresee. Unfortunately do not have anything further to offer the patient at this time. I would be happy to see him back in the future on an as needed basis.

Work Status: Not applicable.

HISTORY & PHYSICAL

PATIENT: Dulberg, Paul **AGE:** 41 years old **EXAM DATE:** 12/02/11

CHIEF COMPLAINT: Right forearm pain.

HPI: Patient is a 41-year-old male who is right-hand dominant. He was referred by Dr. Karen Levin, MD, neurology, for evaluation of an injury he sustained to his right medial forearm in June of 2011. He apparently was using a chain saw when he accidentally struck the volar medial aspect of his right forearm in roughly the mid forearm range with a chain saw. He had a large open wound down to muscle. He was seen in the emergency department where the wound is here it at the muscle was sewn together and the skin was closed. He followed up with his primary care provider. He has noted persistent pain which he describes as intermittent and shooting in character radiating from the laceration site. He occasionally has intermittent numbness and tingling in the ring and small finger. He reports grip weakness and no endurance with wrist flexion and gripping. He has not had therapy to date. He did have an EMG/NCS performed by Dr.Levin in August of 2011. Per the patient the study was normal. I do not have that study available at this moment. He currently is not working but is a graphic designer by training. He reports using a computer mouse for 20 minutes causes significant forearm pain.

MEDICATION: Patient has no current medications.

PHYSICAL EXAM:

Vitals:	**No data for Vitals.**
Appearance:	No distress, good color on room air. Alert and cooperative.
Skin:	Bilateral upper extremities: no open wounds or skin changes.
Neuro:	Bilateral upper extremities: Median, radial and ulnar nerves are motor and sensory intact. Light touch intact all digits, no weakness or wasting.
Vascular:	Bilateral upper extremities: palpable radial pulses and brisk capillary refill.
Focused Exam:	Examination of his right upper extremity reveals his elbow has normal painless range of motion. No focal tenderness to palpation. Collateral ligaments are stable. His forearm compartments are soft. He has a well-healed transverse laceration on the volar medial mid forearm level. There is no erythema, drainage, or fluctuance at the level of the laceration. There is no tenderness to palpation at the laceration site. There is some apparent muscle incongruity. Distally his hand demonstrates no atrophy. He has 5 out of 5 intrinsic strength. 5 out of 5 APB strength. He can make a full fist with full extension of all digits. He does not demonstrate a clawed posture. He has a negative Froment sign. He has a positive Wartenberg sign. Wrist flexion and extension is 5 out of 5 strength. He has a palpable FCU and ECU tendons at the level of the wrist. They have appropriate tension.
IMAGING:	None today.

ASSESSMENT:

DIAGNOSIS:	906.1-LATE EFFECT OPEN WND EXTREM
PROCEDURES:	99203-NEW Detailed, Low Complexity

PLAN:

Plan:	I reviewed findings, treatment options, and recommendations with the patient concerning the forearm complaints he has. I would like to see the official report of the EMG/NCS. We will obtain this report. There is no evidence of a complete injury to his ulnar nerve on physical exam. His complaints are likely muscular in origin. He may have some superficial sensory complaints as well. I do not think he needs any surgical intervention at this time. I did recommend and provided him with a prescription for occupational therapy to work on strengthening and conditioning of the forearm muscles. They can also perform some pain control modalities. I would like to see him back in 4-6 weeks' time to see if therapy is of some assistance to him. I will contact him by phone if his EMG is significantly abnormal. Otherwise we will discuss it at the next followup visit. Patient was in agreement with the plan.
Prescription:	No data for Prescription
Work Status:	Not applicable.

EXAMINATION: MRI examination of the right forearm without and with intravenous contrast infusion..

CLINICAL HISTORY: History of right forearm trauma with a chainsaw. Possible neuroma, nerve impingement or injury in the forearm. Possible tendon disruption. It appears that the patient had some difficulty holding still during image acquisition. There is motion artifact on this examination. Weakness in the fourth and fifth fingers. Pain in the forearm and hand.

TECHNIQUE: Multiplanar T1 and T2-weighted spin-echo pulse sequences and STIR sequence. Post-infusion multiplanar T1-weighted sequences were performed. A skin marker was taped to the point of maximal symptoms.

Contrast: 15 cc of gadolinium was infused.

FINDINGS: There is no bone abnormality seen. The bone marrow signal characteristics are normal.

There is no cystic or solid mass appreciated. The visualized muscles have normal signal characteristics.

There is no abnormal soft tissue infiltration or induration. Specifically, in the area of the skin marker which is marking the point of maximal symptoms, there is no soft tissue abnormality appreciated.

There is no abnormality identified along the course of the ulnar nerve in the forearm.

IMPRESSION: There is no forearm abnormality appreciated. This does not exclude the possibility of an ulnar nerve impingement or injury but there is no gross mass or abnormal infiltration along the expected course of the ulnar nerve. No obvious tendon or muscle abnormality appreciated at this time.

Thank you for referring your patient to Open Advanced MRI. If you have any questions, Dr. Levin, please feel free to contact me at my direct line which is: 630.885.2100.

AUTHORIZATION FOR PERIPHERAL NERVE BLOCK PLACEMENT

A peripheral nerve block has been chosen by both your surgeon and anesthesiologist as a way to manage your pain after surgery. The following information outlines the type of block that has been indicated for your procedure. Your anesthesiologist, who is specially trained in performing this procedure, and is an independent practitioner and not an employee of Northwest Community Healthcare, will be placing the nerve block.

Though peripheral nerve blocks have a good safety record, all the listed blocks below have possible adverse effects of incomplete block, infection, bleeding, hematoma formation, adverse drug reaction, local anesthetic systemic toxicity, damage to nerve and/or surrounding structures. The duration of block may vary between patients and some motor and sensory deficits may last longer then expected.

Right

___ **Brachial Plexus block**
This is performed to reduce post operative pain in the upper extremity. Possible specific adverse effects include but are not limited to dryness or numbness of the throat/facial region, hoarseness of the voice, redness of the eye, drooping of the eye lid, shortness of breath and rarely collapsed lung.

___ **Femoral, Sciatic, Popliteal nerve block(s)**
This is performed to reduce post operative pain in the lower extremity. This block(s) will reduce your sensation and muscle strength in your leg. You will be required to have a leg splint on at all times when standing or walking until full feeling and muscle strength has returned, otherwise a potential injury due to fall may occur.

___ **Lumbar Plexus block**
This is performed to reduce post operative pain in the hip and lower extremity. Possible specific adverse effects include but are not limited to hematoma of the retroperitoneal space, spread of local Anesthetic to epidural/subarachnoid space, hypotension, possible injury due to fall.

___ **Transversus Abdominis Plane Block (TAP block)**
This is performed to reduce post operative pain in the abdominal area. Possible adverse effects include inadvertent needle puncture of the peritoneal space or abdominal viscera, bowel hematoma.

Other regional nerve blocks: _____

I hereby consent to the administration and performance of all tests and treatments by members of the medical staff and personnel at Northwest Community Hospital, Northwest Community Day Surgery Center, and/or Northwest Community Medical Group ("NCH") which in the judgment of the physicians may be considered necessary or advisable for the diagnosis or treatment for the condition for which I am presenting myself. I understand that the practice of medicine and surgery is not an exact science and acknowledge that no guarantees have been made to me. I authorize NCH to request and receive information, including my medical record, from my treating physician(s) or agents.

DISCLOSURE STATEMENT [initials] (please initial)
My care will be managed by physicians who are not employed by or acting as agents of NCH but have privileges at these facilities. My physician may decide to call in consultants who are also not employed by or agents of NCH and who practice in other specialties to provide care to me. To provide specialized services such as emergency medicine, radiology, radiation oncology, pathology and anesthesiology, NCH has entered into agreements with independent physician groups. The members of these groups are not employees or agents of NCH. My care may be managed by allied health professionals such as nurse anesthetists, physician assistants, advanced practice nurses and nurse midwives who are not employees or agents of NCH. I understand that NCH does not exercise any control or authority over any physician's professional or allied health professional's judgment, diagnosis or treatment decisions. In consideration of those services, I hereby assign, transfer and convey to NCH, my treating physicians, and any ambulance providers all of my rights, title and interest in my medical insurance for medical expense reimbursement, including, but not limited to adding dependent eligibility, and to have a policy continued or issued in accordance with the terms and benefits under any insurance policy continued or issued.

I hereby authorize the NCH and any physician or other healthcare provider who may treat me to release, for the purpose of billing and collecting, any and all pertinent information contained in my medical records, including HIV, to one another and/or their billing agents, and third party payors responsible for payment of patient charges including but not limited to insurance companies, health benefit plans, employers involved in approval of benefit claims, government agencies or intermediaries representing any of the above.

PAYMENT GUARANTEE [PD] (please initial)
I hereby assume full responsibility for and agree to pay all costs, charges and expenses incurred by me for the medical care provided by NCH and/or my treating physicians, whether as an inpatient or outpatient, unless I qualify for financial assistance or charity care. If my medical insurance coverage is not sufficient to satisfy such costs, charges and expenses in full, or I do not follow guidelines of my insurer and the resulting balance is not covered by the Assignment of Insurance Benefits, I will be fully responsible for payment of the balance.

RECEIPT OF NOTICE OF PRIVACY PRACTICES [PD] (please initial)
I acknowledge that I have received NCH's Notice of Privacy Practices. Key Points to observe after hospital discharge:

1) Begin to take your oral pain medication when you start to have feeling in your operative limb. This will provide more effective pain relief than if you wait until the block wears off completely.

2) Start taking your home medications as directed by your family physician or surgeon.

3) You may notice a slight temperature difference between your "blocked" limb versus your other limbs. This is not unusual and is a normal occurrence for this type of anesthesia.

Upper Limb (Arm)

1) The nerve block will wear off in about 6 - 24 hours. Until then, your arm and shoulder area will be numb and weak. DO NOT lift or carry objects.

2) Limit your activities until full feeling and strength have returned to avoid injury due to altered sensation.

3) If given an arm sling, wear sling until you have feeling and muscle strength to control your arm or your surgeon tells you to remove it. This also is to prevent injury.

Lower Limb (Leg)

1) The nerve block will wear off in about 6 - 24 hours. Until then, your leg will be numb and weak. DO NOT try to bear weight on your leg or you might fall! When given a brace, wear it at all times that you are up and about, until your surgeon tells you otherwise.

2) Limit your activities until full feeling and muscle strength have returned to avoid injury due to altered sensation.

3) Use assistive devices such as crutches or a walker as ordered by your physician.

If you have redness or swelling at the injection site, metallic taste in your mouth, facial numbness or tingling, slurred speech, restlessness, or any question that is of concern please call the 847.618.7200 immediately and ask to talk to an anesthesiologist.

DSC OPERATIVE REPORT

DATE OF OPERATION: 07/09/2012

PREOPERATIVE DIAGNOSES:
1. Right cubital tunnel syndrome.
2. Right ulnar nerve injury at the forearm.

POSTOPERATIVE DIAGNOSES:
1. Right cubital tunnel syndrome.
2. Right ulnar nerve injury at the forearm.

PROCEDURES:
1. Right cubital tunnel release.
2. Right ulnar neurolysis at the forearm.

SURGEON: Scott Sagerman, MD.

ASSISTANT: Sam Biafora, MD.

ANESTHESIA: Regional block.

COMPLICATIONS: None.

TOURNIQUET TIME: 1 hour.

FINDINGS: The right cubital tunnel showed thickening of the cubital tunnel ligament with scarring of the ulnar nerve to the floor of the cubital tunnel and local constriction. The nerve also appeared constricted at the flexor pronator aponeurosis at the distal aspect of the cubital tunnel. Also, a thick arcade of Struthers was present proximal to the cubital tunnel, though the ulnar nerve was not visibly constricted at this level.

The right forearm, the site of the previous chainsaw laceration revealed extension to the subcutaneous tissue and fascia overlying the flexor carpi ulnaris muscle. A piece of retained absorbable suture material was present. The muscle fibers were in intact. The ulnar nerve was intact beneath the muscle belly. There was no visible scarring around the ulnar nerve at this level.

DESCRIPTION OF PROCEDURE: Informed consent was obtained from the patient. Prophylactic IV antibiotic was given. He received medical clearance from his primary care physician. Regional block anesthetic was administered by the

anesthesiologist in the right upper extremity. The right arm was prepped and draped sterilely. A sterile tourniquet was applied to the right upper arm, and it was elevated following exsanguination of the limb.

A longitudinal incision was made over the posteromedial aspect of the right elbow centered at the cubital tunnel. Under loupe magnification, the subcutaneous tissue was dissected. Superficial veins were ligated with bipolar cautery. A branch of the medial antebrachial cutaneous nerve was identified. This was gently retracted safely and protected. The fascia was incised proximal to the cubital tunnel, and the ulnar nerve was visualized. The cubital tunnel ligament was divided and completely released. The flexor pronator aponeurosis was also incised and released, and the nerve was dissected distally into the musculature where motor branches were identified. The release was then carried proximally, and the arcade of Struthers was divided and completely released. The ulnar nerve was inspected. The nerve was mobilized from adhesions with gentle blunt dissection. Nerve gliding was checked and found to be satisfactory. The ulnar nerve was stable at the cubital tunnel. The field was irrigated with antibiotic solution. The subcutaneous tissue was reapproximated with buried Vicryl sutures, and the skin edges were reapproximated with nylon sutures.

Attention was then directed to the forearm scar. A longitudinal incision was made over the ulnar aspect of the mid forearm centered at the site of the scar. Under loupe magnification, the subcutaneous tissue was dissected. The fascia was visualized. Superficial vein was ligated with bipolar cautery. The dermis was elevated off of the scarred fascia with blunt dissection. The retained suture material was removed. The muscle fibers were visualized and found to be in continuity. The ulnar nerve was exposed in the interval between the flexor digitorum and flexor carpi ulnaris muscle bellies. The nerve was dissected proximal and distal from the region of the laceration. The nerve was completely intact at this level with no visible scarring or adhesions. The field was irrigated with antibiotic solution. The subcutaneous tissue was reapproximated with buried Vicryl sutures, and the skin edges were reapproximated with nylon sutures.

A sterile bulky gauze dressing was applied. The tourniquet was deflated. Circulation returned to the right arm
with normal capillary refill distally. The patient was transported to recovery in stable condition. He tolerated the procedure well. There were no complications. An arm sling was applied for protection.
